From the publishers of the market-
leading at a Glance series comes a wide-

ranging and succinct overview of the key
concepts of emergency care. Emergency
Nursing at a Glance uses the unique and
highly visual at a Glance format to
convey vital information quickly and
efficiently, ensuring that nursing
students have access to all the
important topics they need for an
emergency care placement. This highly
visual, easy-to-read guide is the ideal
companion for anyone entering fields
involving urgent or unscheduled care.

- Includes all aspects of emergency care,
including trauma, minor injury, triage
processes, patient assessment, common
emergency presentations, as well as
legal, ethical and professional issues.
- Covers care of adults, children, and
those with learning disabilities and
mental health conditions
- Presented in
the bestselling at a Glance format, with

superb illustrations and a concise approach Emergency Nursing at a Glance is an invaluable resource for nursing students, newly qualified nurses and other healthcare professionals working in emergency departments, urgent care centres, minor injury units and walk-in centres.

A Systems Framework for Catastrophic Disaster Response: Volume 1: Introduction and CSC Framework

Objective Plant Physiology 3rd Revised Edition: MCQs in Plant Physiology

A Medical disaster Handbook. The only comprehensive and integrated book on the subject written by eminent international contributors including: Dr. Linda Allison Dr. Kathleen Clem Medical Director Division of Emergency Medicine Regions Hospital Duke University St. Paul, MN, U.S.A. North Carolina, U.S.A. Dr. Gary Green Prof C.James Holliman Department of Emergency Medicine Professor of Emergency Medicine John Hopkins University Pennsylvania State University Maryland, U.S.A. Hershey, PA, U.S.A. Presents a practical, pragmatic approach and holistic view of EMS and disaster management in a global context. Key Features: Covers all aspects of EMS including medical transportation, train accidents, ambulance services and telemedicine Model disaster plans for hospitals

Emergency Medicine is becoming a highly valuable and popular branch of

medicine in Australasia and many parts of the world. Australasian emergency medicine is recognised as one of the best practised in the world. Multiple Choice Questions form an essential part of many formal assessment processes, however, it is notoriously difficult to study for. MCQs may come in various formats. Whatever the format they are in, they can cover essential knowledge required to practise emergency medicine that cannot be covered in other formal assessment processes. They are valuable to clinical practice, regardless of their use in assessment, as MCQs could target clinically and practically relevant evidence-based information. Emergency Medicine MCQs contains over 700 single answer MCQs covering both adult and paediatric emergency medicine categorised into 24 chapters. The associated iPhone app contains another 180 MCQs divided into 3 test papers of 60 questions. Each question is associated with a detailed answer describing essential evidence-based knowledge in an easily understandable format. These answers are well referenced to Australasian and well known international textbooks, peer reviewed emergency medicine and other journals and highly regarded web resources. The contributors to the book are 13 emergency physicians and a consultant psychiatrist. This book and the associated iPhone app are aimed at doctors practising emergency medicine, in particular residents and registrars, generalists and hospital practitioners. Emergency registrars in formal training can use these publications to improve essential knowledge, identify gaps in their knowledge, practise MCQs as well as to improve critical thinking skills. Emergency physicians will find these publications valuable as a tool in

continuing medical education.

Multiple-choice Questions in Accident and Emergency John Wiley & Sons

This book has been written to meet the specific needs of candidates appearing in Agriculture Research Services, CSIR, TIFR/NCBS, IISc (Bangalore), GATE, IIT-JAM, JRF, SRF, and Biology Olympiads and other competitive examinations. A large number of mind-boggling questions of advance levels are presented. We have tried our best with wide array of questions covering minutest details of the subject in simpler form. Objective Plant Physiology is an exclusive fundamental search based collection of multiple choice questions prepared for students mainly to help them revise, consolidate and improve their knowledge and skills. The book comprises of twenty nine chapters covering different aspects of plant physiology containing more than 2650 questions accompanied with their answers.

Environmental Studies CRC Press

This book contains more than 1400 multiple choice questions covering various environment-related topics, such as ecology and environment, biodiversity, natural resources, eco-marketing, environmental finance, air pollution, and water pollution. The first chapter is a comprehensive introduction to environmental studies. The book will prove beneficial for academicians, students pursuing courses on environmental studies, professionals, aspirants of various competitive exams, and stakeholders in the environment sector. It can also be handy for various quiz programmes.

MCQs in Plant Breeding Biotechnology and Seed Science Scientific Publishers

An invaluable self-assessment tool for emergency medicine trainees in Australasia. *Emergency Medicine MCQs*

is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in *Emergency Medicine MCQs* cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice - from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app - a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

Achieving Cultural Competency: A Case-Based Approach to Training Health Professionals provides the necessary tools to meet the ever-growing need for culturally competent practitioners and trainees. Twenty-five self-study cases cover a variety of medical topics, including cardiovascular, pulmonary, neurology, oncology, hematology, immunology, and pediatric disorders.

Actual scenarios that occurred in clinical settings help the user gain direct insight into the realities of practice today.

Cultural factors covered within the cases include cultural diversity plus gender, language, folk beliefs, socioeconomic status, religion, and sexual orientation. This book is an approved CME-certifying activity to meet physicians' cultural competency state requirements. Get 25 pre-approved self-study American Dietetic Association credits at no additional charge when you purchase the book. Email hark@lisahark.com for further instructions.

CA IPC IT-SM MCQ Book Oswaal Books and Learning Private Limited

Catastrophic disasters occurring in 2011 in the United States and worldwide--from the tornado in Joplin, Missouri, to the earthquake and tsunami in Japan, to the earthquake in New Zealand--have demonstrated that even prepared communities can be overwhelmed. In 2009, at the height of the influenza A (H1N1) pandemic, the Assistant Secretary for Preparedness and Response at the Department of Health and Human Services, along with the Department of Veterans Affairs and the National Highway Traffic Safety Administration, asked the Institute of Medicine (IOM) to convene a committee of experts to develop national guidance for use by state and local public health officials and health-sector agencies and institutions in establishing and implementing standards of care that should apply in disaster situations--both naturally occurring and man-made--under conditions of scarce resources. Building on the work of phase one (which is described in IOM's 2009 letter report, *Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations*), the committee developed

detailed templates enumerating the functions and tasks of the key stakeholder groups involved in crisis standards of care (CSC) planning, implementation, and public engagement--state and local governments, emergency medical services (EMS), hospitals and acute care facilities, and out-of-hospital and alternate care systems. *Crisis Standards of Care* provides a framework for a systems approach to the development and implementation of CSC plans, and addresses the legal issues and the ethical, palliative care, and mental health issues that agencies and organizations at each level of a disaster response should address. Please note: this report is not intended to be a detailed guide to emergency preparedness or disaster response. What is described in this report is an extrapolation of existing incident management practices and principles. *Crisis Standards of Care* is a seven-volume set: Volume 1 provides an overview; Volume 2 pertains to state and local governments; Volume 3 pertains to emergency medical services; Volume 4 pertains to hospitals and acute care facilities; Volume 5 pertains to out-of-hospital care and alternate care systems; Volume 6 contains a public engagement toolkit; and Volume 7 contains appendixes with additional resources.

MCQs and EMQs in Surgery: A Bailey & Love Companion Guide S. Chand Publishing

With over 1000 questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's *Short Practice in Surgery*. The book assists readers in their preparation for examinations and to test their knowledge of the principles and practice

of surgery as outlined within Bailey & Love. Sub-divided into 13 subject-specific sections, both MCQs and EMQs provide a comprehensive coverage of the surgical curriculum as well as the core learning points as set out in Bailey & Love: Each section emphasises the importance of self-assessment within effective clinical examination and soundly based surgical principles, while taking into account the latest developments in surgical practice. MCQs and EMQs in Surgery is an excellent companion to Bailey & Love and provides a valuable revision tool for those studying for MRCS.

Emergency Medicine MCQs DIWAKAR EDUCATION HUB

Since energy is an important aspect in all sectors, it needs to be given a due attention in education and awareness. Multiple Choice Questions on Energy y attempts to present the subject in a simple yet comprehensive manner for students and aspirants of various competitive exams. Keeping in view the present trend of various exams, the various types of energy have been presented in the form of multiple choice questions, which is the most common pattern of examination in every field of study in the science stream. Energy-related questions figure in various national-level competitive examinations, besides featuring in question papers for examinations in bachelor degree courses on engineering and technology. Multiple Choice Questions on Energy contains about 1300 multiple choice questions covering various sectors of energy, including mechanical energy, electrical energy, chemical energy, nuclear energy, thermal energy, magnetic energy, sound energy, energy from coal, petroleum oil and natural gas, renewable energy, and energy conservation. An introduction to energy has been presented in a comprehensive yet simplified form. This book is useful for academicians, students pursuing engineering or agriculture-related courses, aspirants of various competitive exams, professionals, and stakeholders

in the energy sector. It can also be a tool for various quiz programmes organized in schools, universities, engineering institutions.

A DISASTER MANAGER'S HANDBOOK

Saket Ghiria Classes

Social science research conducted since the late 1970s has contributed greatly to society's ability to mitigate and adapt to natural, technological, and willful disasters. However, as evidenced by Hurricane Katrina, the Indian Ocean tsunami, the September 11, 2001 terrorist attacks on the United States, and other recent events, hazards and disaster research and its application could be improved greatly. In particular, more studies should be pursued that compare how the characteristics of different types of events-including predictability, forewarning, magnitude, and duration of impact-affect societal vulnerability and response. This book includes more than thirty recommendations for the hazards and disaster community.

UPSSSC Rajasva Lekhpal Requirement Exam 2022 | 1300+ Solved MCQ Questions (10 Mock Tests + 12 Sectional Tests) by Mocktime Publication

The major challenges of the 21st century faced by human beings are how to achieve water security, food security, energy security and environmental security. Owing to enhanced natural/anthropogenic disasters worldwide, these challenges become much more complicated and daunting especially for developing countries. Therefore, it is important to highlight the risk of different disasters as well as the modern tools and techniques for minimizing disaster incidence and

losses. Disaster management being highly multidisciplinary in nature, a comprehensive book dealing with different aspects of disaster management, and encompassing important disasters faced by humankind is presently not available. This book is an attempt to fulfill this gap. It provides clear, comprehensive, and up-to-date information about different facets of disaster management along with salient case studies. The book highlights the current status of disaster management focusing on developing nations, discusses vital issues such as climate change and sustainable development, modern approaches and tools/techniques, and the challenges of and future R&D needs for sustainable disaster management.

S.Chand Environment Education for XI National Academies Press

Based on careful analysis of burden of disease and the costs of interventions, this second edition of 'Disease Control Priorities in Developing Countries, 2nd edition' highlights achievable priorities; measures progress toward providing efficient, equitable care; promotes cost-effective interventions to targeted populations; and encourages integrated efforts to optimize health. Nearly 500 experts - scientists, epidemiologists, health economists, academicians, and public health practitioners - from around the world contributed to the data sources and methodologies, and identified challenges and priorities, resulting in this integrated, comprehensive reference volume on the state of health in developing countries.

UNDERSTANDING HUMAN DIMENSIONS

Elsevier Health Sciences

The book on "MCQ's in Plant Breeding,

Biotechnology and Seed Science" has been prepared with the idea of exposing the students those who are preparing for the competitive examinations like Agricultural Research Services, NET, Public Service Commissions, Institute of Banking Personnel Selection, University and Institute admissions etc. It has three major parts viz., Plant Breeding, Biotechnology and Seed Science. The book has 80 chapters consisting more than 3000 multiple choice questions with answers. Genetics, breeding methods, resistance breeding, mutation breeding and polyploidy breeding in Plant Breeding; cell biology, molecular biology, tissue culture, animal biotechnology and bioinformatics in Biotechnology; and seed formation, biology, production, post harvest processing, storage, health, marketing and legislation in Seed Science are some of the important chapters covered in the book. The book is prepared with latest informations and therefore, it will be highly useful to the teachers, scientists and students for updating their knowledge.

FACING HAZARDS AND DISASTERS

Elsevier India

This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate

extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
