This book constitutes the refereed proceedings of the 13th International Conference on Evaluation of Novel Approaches to Software Engineering, ENASE 2018, held in Funchal, Madeira, Portugal, in March 2018. The 17 revised full papers and 5 revised short papers presented were carefully reviewed and selected from 95 submissions. The papers are organized in topical sections on service science and business information systems and software engineering.

Theoretical Issues of Using Simulations and Games in Educational Assessment Routledge

This guide provides information on retiree destinations around the world, all based on research conducted by the authors and hands-on testimonies from each region. It consists of 10 chapters, starting with a general overview of retiree migration patterns, which examines the factors retirees consider when deciding on a destination. The following nine chapters each cover one particular region of the world that is attracting retirees. Mini-profiles of retiree migrants in each chapter include anecdotes and experiences from diverse destinations. The reader will hear, for example, from an American luxuriating on a Spanish island; a Brit building homes in the mountains and coast of BC, Canada; a New York filmmaker reinventing in Cuenca, Ecuador; and British skiers retiring to “encore careers” in the French Alps. Chapters also include “destination profiles”—short vignettes that analyze retirement from the destination perspective, again based on personal interviews with key stakeholders from a national, regional and local perspective.

HEALTH AND PERFORMANCE ASSESSMENT IN WINTER SPORTS

Springer

This report presents the conceptual foundations of the OECD Programme for International Student Assessment (PISA), now in its eighth cycle of comprehensive and rigorous international surveys of student knowledge and skills that are essential for full participation in modern societies. As in previous cycles, the 2022 PISA assessment covered reading, mathematics and science, with a major focus on mathematics, plus an evaluation of students’ creative thinking and financial literacy skills.

Research Anthology on Developments in Gamification and Game-Based Learning Human Kinetics

Celebrating Canadian athletes and sporting history. The cultural impact of sport on a nation is not slight. Famous for a Time explores a number of

important, if not well remembered, Canadian athletes and the sports they played to help explain the nation’s complicated history, sporting and otherwise. It is an exploration that reveals the socio-cultural trends that have shaped Canada since Confederation. Through the prism of some exceptional athletes, the prevailing attitudes of many Canadians about class, race, masculinity, femininity, and national identity are laid bare. Here, from the sidelines, we learn how these attitudes have changed — or not, as the case may be — over time. From team sports such as lacrosse, baseball, and cricket to Canada’s cycling craze, track and field, and boxing, each chapter offers insight into an important aspect of the nation’s narrative. The winners and losers of Canada’s games simply mirror the larger questions that have faced Canadian society across three centuries.

Runners of the Nish Dundurn

A travel guide for those in search of architectural quality, this book can be browsed in many ways. Written in a clear and concise manner by about thirty authors, it features a collection of editorials from the Canadian Competitions Catalogue (CCC), a large online digital archive open to the public since 2006. The editorials explore more than sixty Canadian architecture competitions held in the last seventy years. Especially in recent years, both public and private institutions have organized competitions across Canada, producing hundreds of architectural, urban planning, and landscape design projects. Together these proposals, most of which remain unbuilt, constitute a fantastic treasure in our tangible and intangible common heritage. Given that competition organizers, designers, juries, and critics never operate alone, there is no doubt whatsoever that this book results from the collaboration of a myriad of people, contributing to and competing for excellence in architecture. Includes 497 illustrations and analytical tables.

CHANGING ON THE FLY

Routledge

Childhood is a crucial period for establishing lifelong healthy nutritional habits. The environment has an important influence on children’s dietary intake. This book focuses on the influence of environmental factors on the dietary intake of children and adolescents (0-18 years of age) within various settings including home, early care and education, school, college, holiday clubs, neighborhoods, and supermarkets. The reported studies examine a variety of factors within these settings, including the influence of cooking and parenting, teacher style, resources and barriers within various settings, marketing, and many other factors. The dietary intake behaviors examined include snacking, fruit and vegetable intake, beverage intake, and also nutrition in general. In addition, several papers focus on problems caused by inadequate nutrition, such as hunger and obesity. This work underlines the importance of the environment in influencing children’s and adolescents’ dietary intake. In addition, the papers identified some crucial barriers and facilitators for the implementation of environmental changes to enable a healthy diet for young children. Therefore, it provides some important directions for both future research and practice.

Distributed, Ambient and Pervasive Interactions Rutgers University Press

On July 1, 2017, Canada celebrated the 150th anniversary of Confederation. The nation-wide festivities prompted ambiguous reactions and contradictory responses since they officially proclaimed to celebrate 'what it means to be Canadian.' Drawing on the analytical perspectives of Diversity Studies, this fifth volume of the 'Diversity / Diversité / Diversität' series explores the repercussions of 'Canada 150's' focus on identity. The contributions touch upon issues of Canada's French and English dualism; of its settler colonial past and present and the role of Indigenous Peoples in Canada's identity narrative; of Canada's religious, cultural, ethnic and racial diversity; and of the challenge of forging a 'Canadian' identity. The authors analyze these and other problems arising from the tensions between identity and diversity by empirically addressing topics such as multicultural memories, Canadian literary and political discourses, Métis history, Canada's Indigenous peoples, Canada's official federal discourse on language and culture, and Canada's evolving citizenship regimes. Contributors: Marie-Eve Beaulieu, Charles Blattberg, Paul Carls, Sarah Henzi, Jane Jenson, Wolfgang Klooss, Gillian Lane-Mercier, Pierre Lavoie, Ursula Lehmkuhl, Laurence McFalls, Nikolas Schall, Lisa Schaub, Elisabeth Tutschek *Birth Advantages and Relative Age Effects: Exploring Organisational Structures in Youth Sport* Elsevier Health Sciences

Firearms policy has periodically dominated Canadian politics since the late 1960s. Compared to the United States, however, there is little scholarship on firearms policy to the neighbouring north. Using Canadian firearms policy, *Aiming to Explain* examines five prominent policy process theories employed during the period from the 1989 Montreal Massacre to the 2012 cancellation of the universal firearms registry. Throughout, B. Timothy Heinmiller and Matthew A. Hennigar present rigorous applications of rational choice institutionalism, social constructivism, the advocacy coalition framework, the multiple streams framework, and punctuated equilibrium. The investigations draw on method-based best practices, while also making use of a wide range of data collection and analysis techniques, including inferential statistics, descriptive statistics, process tracing, congruence analysis, and qualitative content analysis. The goal of *Aiming to Explain* is not to select a single best theory, but to compare their relative strengths and weaknesses in an effort to direct future research and theoretical development efforts in the study of Canadian public policy.

GAME DEVELOPMENT FROM IDEA TO PROTOTYPE (UTeM PRESS)

Waxmann Verlag

The three-volume set LNCS 10277-10279 constitutes the refereed proceedings of the 11th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2017, held as part of the 19th International Conference on Human-Computer Interaction, HCI 2017, in Vancouver, BC, Canada in July 2017, jointly with 14 other thematically similar conferences. The total of 1228 papers presented at the HCI 2017 conferences were carefully reviewed and selected from 4340 submissions. The papers included in the three UAHCI 2017 volumes address the following major topics: Design for All Methods and Practice; Accessibility and Usability Guidelines and Evaluation; User and Context Modelling and Monitoring and Interaction Adaptation; Design for Children; Sign Language Processing; Universal Access to Virtual and Augmented Reality; Non Visual and Tactile Interaction; Gesture and Gaze-Based Interaction; Universal Access to Health and Rehabilitation; Universal Access to Education and Learning; Universal Access to Mobility; Universal Access to Information and Media; and Design for Quality of Life Technologies.

Debates Frontiers Media SA

La Pocha Nostra: A Handbook for the Rebel Artist in a Post-Democratic Society marks a transformation from its sister book, *Exercises for Rebel Artists*, into a pedagogical matrix suited for use as a performance handbook and conceptual tool for artists, activists, theorists, pedagogues, and trans-disciplinary border crossers of all stripes. Featuring a newly reworked outline of *La Pocha Nostra's* overall pedagogy, and how it has evolved in the time of Trump, cartel violence, and the politics of social media, this new handbook presents deeper explanations of the interdisciplinary pedagogical practices developed by the group that has been labeled "the most influential Latino/a performance troupe of the past ten years." Co-written by Guillermo Gómez-Peña in collaboration with *La Pocha Nostra's* artistic co-director Saúl García-López and edited by Paloma Martínez-Cruz, this highly anticipated follow-up volume raises crucial questions in the new neo-nationalist era. Drawing on field experience from ten years of touring, the authors blend original methods with updated and revised exercises, providing new material for teachers, universities, radical artists, curators, producers, and students. This book features: Introductions by the authors and editor to *Pocha Nostra* practice in a post-democratic society. Theoretical, historical, poetic, and pedagogical contexts for the methodology. Suggestions for how to use the book in the classroom and many other scenarios. Detailed, hands-on exercises for using *Pocha Nostra*-inspired methods in workshops. A step-by-step guide to creating large-scale group performances. New, unpublished photos of the *Pocha Nostra* methods in practice. Additional texts by Reverend Billy and Savitri D., Dragonfly, Francesca Carol Rolla, VestAndPage, Micha Espinosa, Zulfikar Ali Bhutto, Praba Pilar, L. M. Bogad, Anuradha Vikram, and Annie Sprinkle and Beth Stephens, among many others. The book is complemented by the new book *Gómez-Peña Unplugged: Texts on Live Art, Social Practice and Imaginary Activism (2008-2019)*.

Designing for Inclusion Routledge

Presenting original studies and rich conceptual analyses, this volume reports on theoretical issues involved in the use of simulations and games in educational assessment. Chapters consider how technologies can be used to effectively assess, modify, and enhance learning and assessment in education and training. By highlighting theoretical issues arising from the use of games and simulations as assessment tools for selection and classification, training, and evaluation across educational and workplace contexts, the volume offers both broad conceptual views on assessment, as well as rich descriptions of various, context-specific applications. Through a focus that includes both quantitative and qualitative approaches, policy implications, meta-analysis, and constructs, the volume highlights commonalities and divergence in theoretical research being conducted in relation to K-12, post-secondary, and military education and assessment. In doing so, the collection enhances understanding of how games and simulations can intersect with the science of learning to improve educational outcomes. Given its rigorous and multidisciplinary approach, this book will prove an indispensable resource for researchers and scholars in the fields of educational assessment and evaluation, educational technology, military psychology, and educational psychology.

Canadian Almanac and Directory 2017 Potential Architecture Books

This handbook offers an important and timely contribution to the interdisciplinary field of Olympic studies. It brings together for the first time in a

single volume a complete analysis of current and future economic, commercial, socio-political, cultural and governance challenges facing both the Olympic and Paralympic Games, their athletes and institutions. The book presents new research and broad surveys exploring pressing debates, challenges and possible solutions surrounding the modern Olympic and Paralympic Games, across diverse socioeconomic and political contexts. Featuring chapters written by leading scholars, athletes and administrators from a range of disciplines and backgrounds, the handbook is divided into four main areas: athletes, business, governance and socio-cultural issues within the Olympic and Paralympic Games. Examining key themes, theories and new emerging issues within the field, the book offers expert insights into every major topic related to the Olympic and Paralympic Games, including doping, integrity, athletes' rights, culture, nationality, sponsorship, branding, governance, sports policy and law, marketing, social media, technology, e-sports, politics, ethics, international relations, legacy and impact. The only up-to-date handbook to reflect the true breadth and depth of this international field of research, the *Routledge Handbook of the Olympic and Paralympic Games* is a landmark publication for all students and scholars of sport studies, as well as those working in sport business, media, event management and administration, economics, marketing, management, politics, Olympic studies and cultural studies. It is also an important resource for sport management practitioners and sports officials.

Aiming to Explain Taylor & Francis

In the late summer of 2016, the X-Men gather at St. Francis Xavier University. From talented but inexperienced seventeen-year-olds, to elite fourth and fifth-year medal holders, revered Coach Bernie Chisholm has assembled a team of cross country runners determined to become the first in St. FX history to win a national championship. But college is college, and there are also parties to survive, video games to triumph in, and running jokes that will cost more than one X-Man a chunk or two of an eyebrow. Over the next three months, focus intensifies and the X-Men punish their bodies in the pursuit of precious fitness gains, redeemable only on the Plains of Abraham on judgment day, the Canadian Nationals: November 12th. As challenges continue to mount, the runners of St. FX endure grueling practices, time trials, and cuts to determine which seven men will represent the team at nationals. Competition creates a power struggle between the runners - and best friends - that threatens to undermine the strength of the team. Meanwhile, other obstacles inherent to intense, college-level distance running continue to mount; injury, burnout, and the perhaps impossible balancing of athletics, social life, and academics. From the vivid perspective of someone who lived it in all its exhausting, exhilarating, and sometimes crushing ups and downs, *Runners of the Nish* explores how a group of disparate young men learn to use a common goal to become the most powerful versions of themselves on the cross-country course and beyond. And through it all, the question looms larger and larger, will any of it be enough for the St. FX Blue and White to find glory on the Plains of Abraham?

Study Guide to AFCAT 2020 (Air Force Common Admission Test) 6th Edition Oxford University Press, USA

This second edition of the *Handbook of Employee Selection* has been revised and updated throughout to reflect current thinking on the state of science and practice in employee selection. In this volume, a diverse group of recognized scholars inside and outside the United States balance theory, research, and practice, often taking a global perspective. Divided into eight parts, chapters cover issues associated with measurement, such as validity and reliability, as well as practical concerns around the development of appropriate selection procedures and implementation of selection programs. Several chapters discuss the measurement of various constructs commonly used as predictors, and other chapters confront criterion measures that are used in test validation. Additional sections include chapters that focus on ethical and legal concerns and testing for certain types of jobs (e.g., blue collar jobs). The second edition features a new section on technology and employee selection. The *Handbook of Employee Selection, Second Edition* provides an indispensable reference for scholars, researchers, graduate students, and professionals in industrial and organizational psychology, human resource management, and related fields.

Long-Term Athlete Development Springer

"Game Development: From Idea to Prototype" is a book that brings together several articles written by those who are engaged in the field of gaming technology, especially in the development of game applications or in the areas of research related to games. Each chapter in this book is written in order of content so that it is easy to understand. This book is a great reference and read for anyone interested in the game technology world. By emphasizing the theory and conceptual game development process, clear and detailed explanations are very helpful and informative to readers. It is hoped that this book will be useful in disseminating knowledge as well as a guide to readers.

PISA 2022 Assessment and Analytical Framework Routledge

Technology has increasingly become utilized in classroom settings in order to allow students to enhance their experiences and understanding. Among such technologies that are being implemented into course work are game-based learning programs. Introducing game-based learning into the classroom can help to improve students' communication and teamwork skills and build more meaningful connections to the subject matter. While this growing field has numerous benefits for education at all levels, it is important to understand and acknowledge the current best practices of gamification and game-based learning and better learn how they are correctly implemented in all areas of education. The *Research Anthology on Developments in Gamification and Game-Based Learning* is a comprehensive reference source that considers all aspects of gamification and game-based learning in an educational context including the benefits, difficulties, opportunities, and future directions. Covering a wide range of topics including game concepts, mobile learning, educational games, and learning processes, it is an ideal resource for academicians, researchers, curricula developers, instructional designers, technologists, IT specialists, education professionals, administrators, software designers, students, and stakeholders in all levels of education.

Famous for a Time Cambridge Scholars Publishing

During more than forty years, Bruce Kidd has combined careers as an internationally ranked athlete, coach, sports administrator, professor and dean with critical scholarly and popular writing about sport, often on the issues in which he has been directly involved. Frequently called the conscience of Canadian sport, he defines his perspective as that of critical support: while he can be savage about the inequalities and abuses of power in contemporary sport, he seeks to reform sports so that many more people can enjoy their potential benefits. This book provides a sampling of Professor Kidd's scholarly writing. The issue begins with Kidd's reflection on the ways in which sport is constituted by society and a lifetime of simultaneous scholarship and intervention. The rest of the issue is organized around three themes: the Canadian sport system, the Olympic Movement, and his

recovery projects, historical writing that brought long-forgotten earlier initiatives and episodes back into public understanding. In each case, Kidd provides a brief introduction of 1000-1500 words that sets the context for the original article and provides an update on the subject matter. This book was previously published as a special issue of *Sport in Society*.

[Highlights in sports management, marketing and business: 2021/22](#) Frontiers Media SA

This proceedings book presents papers from the 10th Cambridge Workshops on Universal Access and Assistive Technology. The CWUAAT series of workshops have celebrated a long history of interdisciplinarity, including design disciplines, computer scientists, engineers, architects, ergonomists, ethnographers, ethicists, policymakers, practitioners, and user communities. This reflects the wider increasing realisation over the long duration of the series that design for inclusion is not limited to technology, engineering disciplines, and computer science but instead requires an interdisciplinary approach. The key to this is providing a platform upon which the different disciplines can engage and see each other's antecedents, methods, and point of view. This proceedings book of the 10th CWUAAT conference presents papers in a variety of topics including Reconciling usability, accessibility, and inclusive design; Designing inclusive assistive and rehabilitation systems; Designing cognitive interaction with emerging technologies; Designing inclusive architecture; Data mining and visualising inclusion; Legislation, standards, and policy in inclusive design; Situational inclusive interfaces; and The historical perspective: 20 years of CWUAAT. CWUAAT has always aimed to be inclusive in the fields that it invites to the workshop. We must include social science, psychologies, anthropologies, economists, politics, governance, and business. This requirement is now

energised by imminent new challenges arising from techno-social change. In particular, artificial intelligence, wireless technologies, and the Internet of Things generate a pressing need for more socially integrated projects with operational consequences on individuals in the built environment and at all levels of design and society. Business cases and urgent environmental issues such as sustainability and transportation should now be a focus point for inclusion in an increasingly challenging world. This proceedings book continues the goal of designing for inclusion, as set out by the CWUAAT when it first started.

OFFICIAL REPORT OF THE DEBATES OF THE HOUSE OF COMMONS

BRILL

Winner of the NASSS Outstanding Book Award Hockey and multiculturalism are often noted as defining features of Canadian culture; yet, rarely are we forced to question the relationship and tensions between these two social constructs. This book examines the growing significance of hockey in Canada's South Asian communities. The Hockey Night in Canada Punjabi broadcast serves as an entry point for a broader consideration of South Asian experiences in hockey culture based on field work and interviews conducted with hockey players, parents, and coaches in the Lower Mainland of British Columbia. This book seeks to inject more "color" into hockey's historically white dominated narratives and representations by returning hockey culture to its multicultural roots. It encourages alternative and multiple narratives about hockey and cultural citizenship by asking which citizens are able to contribute to the webs of meaning that form the nation's cultural fabric.
