VAM and MODI Method in Solving Transportation Problems

Since there is no negative index computed, it means that using the MODI method, the VAM solution is the optimal solution of the company. The Improvement Indices (I_{ij}) are computed as follows: $RA-W2$ index = $25 - R_1 - K_2 = 25 - 0 - 10 = 15$ $RB-W1$ index = $15 - R_2 - K_1 = 15 - (-2) - 10 = 7$ $RB-W3$ index = $8 - R_2 - K_3 = 8 - (-2) - 10 = 0$ $RD-W3$ index = $0 - R_3 - K_3 = 0 - (-10) - 10 = 0$
