### So WHAT'S NEW ABOUT SCHOLASTICISM?

Princeton University Press

The classic work on the sublime interplay between the arts and poetics This book explores the rich and complex relationship between art and poetry, shedding invaluable light on what makes each art form unique yet wholly interdependent. Jacques Maritain insists on the part played by the intellect as well as the imagination, showing how poetry has its source in the preconceptual activity of the rational mind. As Maritain argues, intellect is not merely logical and conceptual reason. Rather, it carries on an exceedingly more profound and obscure life, one that is revealed to us as we seek to penetrate the hidden recesses of poetic and artistic activity. Incisive and authoritative, this illuminating book is the product of a lifelong reflection on the meaning of artistic expression in all its varied forms.

"Examining the writings of Flannery O'Connor and Walker Percy against the background of the Southern Renaissance from which they emerged, Sykes explores how the writers shared a distinctly Christian notion of art that led them to see fiction as revelatory but adopted different theological emphases and rhetorical strategies"--Provided by publisher.

**Painting and Reality** Open Road Media

A classic study of the art of painting and its relationship to reality In this book, Étienne Gilson puts forward a bold interpretation of the kind of reality depicted in paintings and its relation to the natural order. Drawing on insights from the writings of great painters—from Leonardo, Reynolds, and Constable to Mondrian and Klee—Gilson shows how painting is foreign to the order of language and knowledge. Painting, he argues, seeks to add new beings to nature, not to represent those that already exist. For this reason, we must distinguish it from another art, that of picturing, which seeks to produce images of actual or possible beings. Though pictures play an important part in human life, they do not belong in the art of painting. Through this distinction, Gilson sheds new light on the evolution of modern painting. A magisterial work of scholarship by an acclaimed historian of philosophy, *Painting and Reality* features paintings from both classical and modern schools, and includes extended selections from the writings of Reynolds, Delacroix, Gris, Gill, and Ozenfant.

*A Comparative Analysis of Two Philosophies of Art* Paulist Press

In this authoritative, lively book, the celebrated Italian novelist and philosopher Umberto Eco presents a learned summary of medieval aesthetic ideas. Juxtaposing theology and science, poetry and mysticism, Eco explores the relationship that existed between the aesthetic theories and the artistic experience and practice of medieval culture. "[A] delightful study. . . . [Eco's] remarkably lucid and readable essay is full of contemporary relevance and informed by the energies of a man in love with his subject." --Robert Taylor, *Boston Globe* "The book lays out so many exciting ideas and interesting facts that readers will find it gripping." --Washington Post Book World "A lively introduction to the subject." --Michael Camille, *The Burlington Magazine* "If you want to become acquainted with medieval aesthetics, you will not find a more scrupulously researched, better written (or better translated), intelligent and illuminating introduction than Eco's short volume." --D. C. Barrett, *Art Monthly*

In a substantial philosophical work, Jacques Maritain designated Christianity as the sole full humanism. Defender of Catholic orthodoxy, he contributed to the renaissance of Thomism, which had a great influence on the philosophical renewal that took place between the two wars.

I. Since the appearance in 1902 of Benedetto Croce's *L'estetica come scienza dell' espressione e linguistica generale*, the problem of the ontology of the work of art or aesthetic object - what kind of thing it is and what its mode of being is - has come to occupy a central place in the philosophy of art. Moreover, a particular conception of the identity of art objects is at present a driving force in some quarters of the art world itself. As Harold Rosenberg so well points out, Minimalist or Reductive Art has attempted, sometimes quite self-consciously, to establish the autonomous physical reality of the work of art by emptying it of all expressive and representational content. ! What is the ontological problem? One rather crude way of stating it is to ask where the work of art or object of aesthetic contemplation exists. Is it, to pick some examples, to be identified with the material product of the artist's labors which exists spatially "outside of" and independently of artist and beholder? Or does it exist only "in the mind" of the beholder or the artist? Is it either one perception of a beholder or a series of his perceptions? Or is it the class of all perceptions of either all spectators or all "qualified" spectators? Put another way, it would be a question of whether and to what such purported names as 'Beethoven's Fifth Symphony' refer.

Introduction by Ralph McInerney The essays in this volume, indebted in great part to Jacques Maritain and to other Neo-Thomists, represent a contribution to an understanding of beauty and the arts within the Aristotelian-Thomistic tradition. As such they constitute a different voice in present-day discussions on beauty and aesthetics, a voice which nonetheless shares with many of its contemporaries concern over questions such as the relationship between beauty and morality, public funding of the arts and their educational role, objective and universal standards of what is beautiful. In the tradition in which the contributors of this volume reflect, beauty manifests itself in the order of the universe, an order that provides human reason with a window onto the transcendent. For Aristotle and Aquinas the natural order grounds both art and morality, and yet it is this very order which has been called into question by modern science and philosophy. Instead of pointing us to a suprahuman order, the beautiful then points to the order of human freedom and creativity. Reflection on the beautiful since the modern philosopher Immanuel Kant has thus often taken a subjectivistic turn. Because of the importance of beauty and art in human existence, in man's education and life as a moral and political being, an alternative should be sought to any reduction of the beautiful to a purely subjective experience or cultural construct. The Aristotelian-Thomistic tradition, in dialogue with modern and contemporary conceptions of the beautiful, provides us with just that alternative, and thus the essays herein represent a decisive step in the "journey for Thomistic aesthetics." THE CONTRIBUTORS: In addition to the editor, the contributors to the volume are: Brian J. Braman, Matthew Cuddeback, Christopher M. Cullen, S.J., Patrick Downey, Desmond J. *Man and the State* Springer Science & Business Media

The French philosopher's treatise on the nature of art and poetry includes enlightening critiques of major painters and dialogues with notable writers. Originally published in 1935 with the title *Frontières de la Poésie*, this work by Jacques Maritain explores the nature and subjectivity of art and poetry. As a philosopher, Maritain attempts to define the two concepts, describing them as virtuous, being primarily concerned with beauty. Rather than focusing on aesthetic theory, Maritain examines his ideas at a more tangible level, including a discussion of how art and poetry are produced. Art and Poetry further develops the principles established in Maritain's earlier work, *Art and Scholasticism*, which has deeply influenced contemporary artists. Those concepts are employed here to illuminate the creative works of such diverse artists as Georges Rouault, Marc Chagall, Gino Severini, and Arthur Lourié. Maritain also relates fascinating dialogues with notable

authors such as André Gide, Jean Cocteau, and others.

"Of time-transcending value, this book is probably the most succinct and clearest statement of Thomistic political theory available to the English-language reader. Written during his exile from war-torn Europe, *Man and the State* is the fruit of Maritain's considerable learning as well as his reflections on his positive American experience and on the failure of regimes he closely encountered on the Continent."--Jude P. Dougherty, The Catholic University of America "The lectures that were the basis for *Man and the State* were delivered at the University of Chicago at a time when Maritain was still in the first enthusiasm of his participation in the 1948 Universal Declaration of Human Rights. He devotes particular attention to the concept of rights, since, historically, rights theories were fashioned to supplant the natural law theory to which Maritain as a Thomist gives his allegiance. Maritain provides an ingenious and profound theory as to how natural law and natural rights can be complementary. For this reason alone it remains a fundamental contribution to political philosophy, but it is filled with other gems as well. Was Maritain too optimistic in his appraisal of modernity? Or have we unjustly lost the optimism that was his? *Man and the State* is an invitation to rethink the way we pose the basic questions of political philosophy."--Ralph McInerney, Jacques Maritain Center, University of Notre Dame ABOUT THE AUTHOR Jacques Maritain (1882-1973), distinguished French Catholic philosopher and writer, was the author of more than fifty books. A preeminent interpreter of the thought of Thomas Aquinas, Maritain was a professor of philosophy at the Institut Catholique de Paris, Columbia University, and Princeton University. He served as French Ambassador to the Vatican from 1945 to 1948. CONTENTS 1. The People and the State 2. The Concept of Sovereignty 3. The Problem of Means 4. The Rights of Man 5. As the title suggests, we are here addressing the most fundamental questions: Who is man? What is art? What is the bond that unites man, nature and art? The argument at the heart of this book is that what should be common to all men and women - a natural affinity with the sacred that holds out the promise of spiritual experience in everyday life - is in fact made all but impossible by the very nature of modern society. For what the modern world has set in place is nothing other than a pattern of life that prevents us from being what we truly are. The destruction of man that is part and parcel of the scientific, industrial view of our destiny cannot do otherwise than in turn destroy those values and meanings that have always been the bedrock of normal human existence. At a time when the inadequacy of modernism has become apparent, the author returns to the challenge of the English radical tradition of thought (Blake, Cobbett, Carlyle, Ruskin, Morris, Gill and others), with its critique of the industrial-now post-industrial-way of life. Through a series of highly original studies of several major English artists and craftsmen, and by addressing key themes that relate to the spiritual, cultural and environmental crisis that now confronts us, the author offers a positive development of the radical perspective. Can modern man survive the process of self-mutilation he has embarked upon? In this unique study of our present predicament, the author suggests we cannot do so by turning our back on the perennial wisdom that has always informed the wisest philosophies of life, with their intuition of the sacred nature of reality.

In *So What's New about Scholasticism?* thirteen international scholars gauge the extraordinary impact of a religiously inspired conceptual framework in a modern society. The essays that are brought together in this volume reveal that Neo-Thomism became part of contingent social contexts and varying intellectual domains. Rather than an ecclesiastic project of like-minded believers, Neo-Thomism was put into place as a source of inspiration for various concepts of modernization and progress. This volume reconstructs how Neo-Thomism sought to resolve disparities, annul contradictions and reconcile incongruent, new developments. It asks the question why Neo-Thomist ideas and arguments were put into play and how they were transferred across various scientific disciplines and artistic media, growing into one of the most influential master-narratives of the twentieth century. Edward Baring, Dries Bosschaert, James Chappel, Adi Efal-Lautenschläger, Rajesh Heynickx, Sigrid Leyssen, Christopher Morrissey, Annette Mülberger, Jaume Navarro, Herman Paul, Karim Schelkens, Wim Weymans and John Carter Wood reconstruct a bewildering, yet decipherable thought-structure that has left a deep mark on twentieth century politics, philosophy, science and religion.

In his best-selling book *You Must Change Your Life*, Peter Sloterdijk argued exercise and practice were crucial to the human condition. In *The Art of Philosophy*, he extends this critique to academic science and scholarship, casting the training processes of academic study as key to the production of sophisticated thought. Infused with humor and provocative insight, *The Art of Philosophy* further integrates philosophy and human existence, richly detailing the foundations of this relationship and its transformative role in making the postmodern self. Sloterdijk begins with Plato's description of Socrates, whose internal monologues were so absorbing they often rooted the philosopher in place. The original academy, Sloterdijk argues, taught scholars to lose themselves in thought, and today's universities continue this tradition by offering scope for Plato's "accommodations for absences." By training scholars to practice thinking as an occupation transcending daily time and space, universities create the environment in which thought makes wisdom possible. Traversing the history of asceticism, the concept of suspended animation, and the theory of the neutral observer, Sloterdijk traces the evolution of philosophical practice from ancient times to today, showing how scholars can remain true to the tradition of "the examined life" even when the temporal dimension no longer corresponds to the eternal. Building on the work of Husserl, Heidegger, Nietzsche, Arendt, and other practitioners of the life of theory, Sloterdijk launches a posthumanist defense of philosophical inquiry and its everyday, therapeutic value.

#### **THE ART OF PHILOSOPHY**

Yale University Press

*Creative Intuition in Art and Poetry* encompasses the six lectures Jacques Maritain delivered as the inaugural lecturer in the A. W. Mellon Lectures in the Fine Arts. The book paints a rich and compelling portrait of both Maritain's own philosophy and the debates surrounding art and meaning in the twentieth century as a whole.
