Urban ceremonial in the Middle Ages took various forms and served a number of different ends--private, collegial, political, and religious. Broadly construed, urban ceremonial included public functions of multiple sorts. From private, but public, celebrations of births, marriages, and deaths to the grand entries of rulers into cities, the spectacles were designed to impress events on collective memory. - from the Introduction.

BRILL

By the time he left office on May 16, 2011, Mayor Richard M. Daley had served six terms and more than twenty-two years at the helm of Chicago's City Hall, making him the longest serving mayor in the city's history. Richard M. Daley was the son of the legendary machine boss, Mayor Richard J. Daley, who had presided over the city during the post-World War II urban crisis. Richard M. Daley led a period of economic restructuring after that difficult era by building a vibrant tourist economy. Costas Spirou and Dennis R. Judd focus on Richard M. Daley's role in transforming Chicago's economy and urban culture. The construction of the "city of spectacle" required that Daley deploy leadership and vision to remake Chicago's image and physical infrastructure. He gained the

resources and political power necessary for supporting an aggressive program of construction that focused on signature projects along the city's lakefront, including especially Millennium Park, Navy Pier, the Museum Campus, Northerly Island, Soldier Field, and two major expansions of McCormick Place, the city's convention center. During this period Daley also presided over major residential construction in the Loop and in the surrounding neighborhoods, devoted millions of dollars to beautification efforts across the city, and increased the number of summer festivals and events across Grant Park. As a result of all these initiatives, the number of tourists visiting Chicago skyrocketed during the Daley years. Daley has been harshly criticized in some quarters for building a tourist-oriented economy and infrastructure at the expense of other priorities. Daley left his successor, Rahm Emanuel, with serious issues involving a long-standing pattern of police malfeasance, underfunded and uneven schools, inadequate housing opportunities, and intractable budgetary crises. Nevertheless, Spirou and Judd conclude, because Daley helped transform Chicago into a leading global city with an exceptional urban culture, he also left a positive imprint on the city that will endure for decades to come.

Join the conversation with one of sociology's best-known thinkers. It's the 21st century and the world is changing. Today's students have instant access to anyone, anything, anywhere, anytime. They want to be enlightened, entertained, and informed on their terms. They want to be shown the relevance of the introductory sociology course to their lives. Who better than George Ritzer, one of sociology's best-known thinkers, to do just that? While providing a rock-solid foundation of sociology, Ritzer illuminates traditional sociological concepts and theories, as well as some of today's most compelling social phenomena: globalization, consumer culture, and the internet. As technology flattens the globe, students are challenged to apply a sociological perspective to their world. Ritzer brings students into the conversation by bridging the divide between the outside world and the classroom.

Planning and Managing Smaller Events: Downsizing the Urban Spectacle explores the role of smaller scale events in contributing to the renewal and development of urban societies. This book adopts a case study approach to examine a diverse range of events taking place in towns and cities in Europe, Asia and North America. This volume begins by defining and classifying these kinds of events and then verifying if and how they can provide opportunities for cities and towns without the disadvantages of world-famous large events. It concludes by discussing the growing regional scale of urban phenomena and their transition in post-metropolitan spaces. Planning and Managing Smaller Events: Downsizing the Urban Spectacle will be of interest to government officials and policy makers involved in economic development, urban planning, parks, arts/culture as well as students and researchers interested in urbanism, event management, tourism and recreation.

Douglas Kellner's Media Spectacle and the Crisis of Democracy: 9/11, the War on Iraq, and Election 2004 investigates the role of the media in the momentous political events of the past four years. Beginning with the role of the media in contested election of 2000, Kellner examines how corporate media ownership and concentration, linked with a rightward shift of establishment media, have disadvantaged the Democrats and benefited George W. Bush and the Republicans. Exploring the role of media spectacle in the 9/11 attacks and subsequent Terror War in Afghanistan and Iraq, Kellner documents the centrality of media politics in advancing foreign policy agendas and militarism. Building on his analysis in Media Spectacle (Routledge 2003), Kellner demonstrates in detail how conflicting political forces ranging from Al Qaeda to the Bush administration construct media spectacles to advance their politics. Two chapters critically engage

the role of the media in the buildup to the Iraq war and the media-centric nature of Bush's Iraq invasion and occupation. Final chapters delineate the role of the media in the highly contested and significant 2004 election campaign that many believe to be one of the key political struggles of the contemporary era. Criticizing Bush's unilateralism, Kellner argues for a multilateral and cosmopolitan globalization and the need for democratic media to help overcome the current crisis of democracy in the United States.

The Dead City unearths meanings from such depictions of ruination and decay, looking at representations of both thriving cities and ones which are struggling, abandoned or simply in transition. It reveals that ruination presents a complex opportunity to envision new futures for a city, whether that is by rewriting its past or throwing off old assumptions and proposing radical change. Seen in a certain light, for example, urban ruin and decay are a challenge to capitalist narratives of unbounded progress. They can equally imply that power structures thought to be deeply ingrained are temporary, contingent and even fragile. Examining ruins in Chernobyl, Detroit, London, Manchester and Varosha, this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories, economic forces, power structures and communities of a given city, as well as to conflicting visions for its future.

Set against a backdrop of breathtaking natural beauty, Brazil's striking modernist architecture has long garnered international acclaim. But these well-known works are not fully reflective of the built environment of Brazil, and with this volume, Richard Williams unearths the rich architectural heritage of Brazil. Spanning from 1945 through today, the book examines Brazilian architecture beyond the works of renowned architects such as Oscar Niemeyer and the "Carioca" architects of Rio de Janeiro. Williams investigates issues such as the use of historic architecture, the importance

of leisure and luxury, the role of the favela as a backdrop and inspiration for development, and the rapid growth of cities. From the designated world heritage site of Brasilia—a capital city that was planned from the ground up—to the installation work of artists such as Hélio Oiticica, Brazil delves into the origins and far-reaching influence of Brazil's architectural modernism. At a moment when Latin America is of increasing importance in global business and culture, Brazil will be an essential read for all scholars of architecture and Latin American history.

"In The Art of Nation-Building, H. V. Nelles uses contemporary literary techniques to convey the scope, colour, and intensity of the tercentenary from various perspectives. Drawing on the intimate diaries and letters of leading social and political figures, he leads us behind the scenes, disclosing the politics of memory, the theatrics of history, and the making of a modern monarchy. Nelles reveals what we actually do when we commemorate, how we use the past, and the multivocal character of mass celebration."--BOOK JACKET.

**City Record** Routledge

We tend to think cities look the way they do because of the conscious work of architects, planners and builders. But what if the look of cities had less to do with design, and more to do with social, cultural, financial and political processes, and the way ordinary citizens interact with them? What if the city is a process as much as a design? Richard J. Williams takes the moment construction is finished as a beginning, tracing the myriad processes that produce the look of the contemporary global city. This book is the story of dramatic but unforeseen urban sights: how financial capital spawns empty towering skyscrapers and hollowed-out ghettos; how the zoning of once-illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages; how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy. It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks, concrete and glass that surround us. Thought-provoking and original, *Why Cities Look the Way They Do* will appeal to anyone who wants to understand the contemporary city, shedding new light on humanity's greatest collective invention.

*The Geopolitics of Spectacle* Berghahn Books

This collection offers a global perspective on the changing character of cities and the increasing importance that consumer culture plays in defining their symbolic economies. Increasingly, forms of spectacle have come to shape how cities are imagined and to influence their character and the practices through which we know them - from advertising and the selling of real estate, to youth cultural consumption practices and forms of entrepreneurship, to the regeneration of urban areas under the guise of the heritage industry and the development of a WiFi landscape. Using examples of cities such as New York, Sydney, Atlantic City, Barcelona, Rio de Janeiro, Douala, Liverpool, San Juan, Berlin and Harbin this book illustrates how image and practice have become entangled in the performance of the symbolic economy. It also argues that it is not just how the urban present is being shaped in this way that is significant to the development of cities but also that a prominent feature of their development has been the spectacular imagining of the past as heritage and through regeneration. Yet the ghosts that this conjures up in practice offer us a possible form of political unsettlement and alternative ways of viewing cities that is only just beginning to be explored. Through this important collection by some of the leading analysts of consumption, cities and space *Consuming the Entrepreneurial City* offers a cutting edge analysis of the ways in which cities are developing and the implications this has for their future. It is essential reading for

students of Urban Studies, Geography, Sociology, Cultural Studies, Heritage Studies and Anthropology.

## COMMENTS ON THE SOCIETY OF THE SPECTACLE

*Building the City of Spectacle* Mayor Richard M. Daley and the Remaking of Chicago  
The only monograph available on the subject, this book presents archaeological and literary evidence to provide students with a full and detailed treatment of the little-investigated aspect of Roman urbanism - the phenomenon of suburban development.

*The Electrifying Fall of Rainbow City: Spectacle and Assassination at the 1901 Worlds Fair* Routledge

The second edition of *Sport and Spectacle in the Ancient World* updates Donald G. Kyle's award-winning introduction to this topic, covering the Ancient Near East up to the late Roman Empire. • Challenges traditional scholarship on sport and spectacle in the Ancient World and debunks claims that there were no sports before the ancient Greeks • Explores the cultural exchange of Greek sport and Roman spectacle and how each culture responded to the other's entertainment • Features a new chapter on sport and spectacle during the Late Roman Empire, including Christian opposition to pagan games and the Roman response • Covers topics including violence, professionalism in sport, class, gender and eroticism, and the relationship of spectacle to political structures

"A marvelous recounting of the 1901 World's Fair. Every chapter sparkles.... The Buffalo-Niagara Falls extravaganza comes alive in these pages. Highly recommended!" —Douglas Brinkley, author of *The Wilderness Warrior* The Pan-American Exposition in Buffalo, New York, dazzled with its new rainbow-colored electric lights. It showcased an array of wonders, like daredevils attempting to go over Niagara Falls in a barrel, or the "Animal King" putting the smallest woman in the world and also terrifying animals on display. But the thrill-seeking spectators little suspected that an assassin walked the fairgrounds, waiting for President William McKinley to arrive. In Margaret Creighton's hands, the result is "a persuasive case that the fair was a microcosm of some momentous facets of the United States, good and bad, at the onset of the American Century" (Howard Schneider, *Wall Street Journal*).

In an age of information and new media the relationships between remembering and forgetting have changed. This volume addresses the tension between loud and often spectacular histories and those forgotten pasts we strain to hear. Employing social and cultural analysis, the essays within examine mnemonic technologies both new and old, and cover subjects as diverse as U.S. internment camps for Japanese Americans in WWII, the Canadian Indian Residential School system, Israeli memorial videos, and the desaparecidos in Argentina. Through these cases, the contributors argue for a re-interpretation of Guy Debord's notion of the spectacle as a conceptual apparatus through which to examine the contemporary landscape of social memory, arguing that the concept of spectacle might be developed in an age seen as dissatisfied with the present, nervous about the future, and obsessed with the past. Perhaps now "spectacle" can be thought of not as a tool of distraction employed solely by hegemonic powers, but instead as a device used to answer Walter Benjamin's plea to "explode the continuum of history" and bring our attention to now-time.
