states: Comparison of
Physical and Chemical
Properties: Electrolysis of
water: Evidence of a
chemical change: Pure
substances: Types of
Mixtures: Chapter
1 Chapter 1: Matter and
Change. A distinction in

chemistry is made between pure substances (like elements and compounds such as water and carbon dioxide) and mixtures. Mixtures are combinations of matter that are not chemically combined, and can therefore be separated by a variety of methods (chromatography, filtration, distillation, and evaporation). Chapter 1: Matter and Change - Chemistry: Mr Richards Chapter 1 worksheet classification of matter and chemical and physical properties Type
