Basics of English Grammar UTB GmbH

This reference handbook surveys research on the central issue associated with the teaching of unprepared writers. Though basic writing has only been recognized as a distinct area of teaching and research since 1975, the existing bibliographic texts already seem limited due to their age or lack of annotation. This volume provides current and extensive bibliographic essays and will help to define this new field of study for teachers and researchers. Following an introduction that summarizes the origins and significant texts in basic writing, the book is divided into three sections, Social Science Perspectives, Linguistic Perspectives, and Pedagogical Perspectives. The first section, which contains three essays, views the field through the lens of social, psychological,

and political issues. The second section, also containing three essays, examines contributions made from studies of grammar, dialects, and second-language acquisition. The third section, in its four essays, focuses on the design, development, administration, and evaluation of basic writing courses, the use of computers in basic writing classrooms, the role of the writing lab, and the preparation of basic writing teachers. An appendix that reviews current textbooks for basic writing courses is also included, as well as an index. This book will be a valuable resource for teachers of basic writing, in education courses and workshops that train teachers and tutors, and in fields such as linguistics, technical writing, and Teaching English as a Second Language. It will also be an important addition to public and university libraries and many education programs.

An Introduction to the Discipline(s)
Springer

Futures for English Studies brings together chapters by leading writers across the curriculum area of English to investigate how the component parts of English (literature, language, and creative writing) are located institutionally in higher education and to explore the interdisciplinary prospects of a subject which spans the humanities and social sciences. Through explorations of changing foci in a variety of contexts, the book examines the value and purpose of teaching and researching English language, literature and creative writing in the twenty-first century, both within Anglophone countries and the wider world. The contributors, all practicing educators and researchers in the field, bring a wide range of perspectives to the theme of the development of the discipline, and illustrate that the strengths of English Studies as an academic subject lie not only in its traditional breadth and depth, but also in a readiness to adapt, experiment, and engage with other subjects.
