While Western observers should be prepared to see Russia's armed forces become more capable over the next decade, they should avoid exaggerating the threat posed by these developments. By 2027, the Russian armed forces are likely to be considerably better equipped than they are today. Nevertheless, one should not overstate the pace of probable modernization. While some progress may be made in the development of new-generation equipment, the armed forces will probably still

rely on a mix of legacy hardware and modernized Soviet systems alongside new designs. Providing Russia with 21st-century military capabilities and adapting its armed forces to today's challenges will require sustained investment in modernization efforts and military R&D.

World War in Syria answers questions that will have continued relevance beyond the country's borders for years to come. "Impressive in its scholarship, pondered in its judgements, above all searing in its dissection of Western powers' war on Syria waged over many decades, the book is a must-have on the bookshelves of any serious fair-minded student of Syria." --Peter Ford, British Ambassador to Syria from 2003 to 2006 "The most detailed history of the war in Syria so far, providing a richness of highly interesting details, as well as a critical analysis of its complex international and domestic dimensions, rarely encountered in other Western publications." -- Nikolaos van Dam, former Special Envoy for Syria, 2015-16. Ambassador of the Netherlands to Iraq, Egypt, Turkey, Germany and Indonesia, Author of *Destroying a Nation. The civil war in Syria*. "A. B. Abrams explores the widening scope of the Syrian conflict in his important book. Solving Syria's civil war will require a regional approach engaging stakeholders whose interests are fundamentally opposed." --David L. Phillips, Director, Program on Peace-building and Rights, Columbia University Institute for the Study of Human Rights. "Abrams is a meticulous guide to the labyrinth of Syria's modern political history." --Richard W. Murphy. U.S. Ambassador to Syria, 1974 to 1978. Consul in Aleppo, Syria, 1960 to 1963 "A. B. Abrams has written an extremely informative and illuminating account on the international dimension of the origins, outbreak and evolution of the Syrian conflict. His empirically rich analysis in this nuanced and comprehensive study make it one of the best books, if not the best book, written about the Syrian crisis. This book is a MUST read for anyone who wants to understand the Syrian conflict, the Middle East, and the role of the great powers in the region." -- Jubin Goodarzi, Professor and Deputy Head of International Relations, Webster University, Geneva. Former consultant and political adviser on Middle Eastern affairs for the UNHCR. "An insightful and dispassionate record of the Syrian Maelstrom and the West's role as the Sorcerer's Apprentice." -- John Holmes, Major General and Director Special Forces (ret.), British Army.

The Canadian Annual Review of Politics and Public Affairs is an acclaimed series that offers informed commentary on important national events and considers their significance in local and international contexts. The 2009 instalment of the series covers the continuation of 2008's economic and political crises from the end of Parliament's first prorogation at the beginning of the year to the start of its unprecedented second prorogation at the end, including the federal Economic Action Plan and bailouts for the automotive and banking sectors. Other topics include the investigation of the abuse of detainees in Afghanistan and reactions across Canada to the threat of H1N1 swine flu. The volume also contains full coverage of federal, provincial, First Nations, and municipal affairs, including British Columbia's general election.

This book offers a historical analysis of the geopolitical and geoeconomic competition between the USA and Russia, which has recently heated up again due to the eastward expansion of NATO. The analysis departs from an exploration of the USA's foreign policy and geopolitical ambitions by illustrating the influence of Wall Street and the military-industrial complex on the country's political decision-making. The historical review covers a wide timespan, from the Second World War and the birth of NATO, to the wars against Iraq and Afghanistan, to the rebellions that erupted in Eurasia, Northern Africa and the Middle East in the 2010's, as well as the wars in the Ukraine and in Syria. By doing so, it reveals the influence of US neocons, the US intelligence services and the military complex on the Arab Spring, the Color Revolutions and the armed conflicts in Ukraine and Syria. Ultimately, the book depicts a new era of worldwide instability and disorder, dominated by violence and arbitrariness.

This book presents several essays analyzing Russia's extensive nuclear agenda and the issues connected with it. It deals with strategy, doctrine, European, Eurasian, and East Asian security agendas, as well as the central U.S.-Russia nuclear and arms control equations. This work brings together American, European, and Russian analysts to discuss Russia's defense and conventional forces reforms and their impact on nuclear forces, doctrine, strategy, and the critical issues of Russian security policies toward the United States, Europe, and China. It also deals directly with the present and future roles of nuclear weapons in Russian defense policy and strategy.

This book examines the impact of the Cold War in a global context and focuses on city-scale reactions to the atomic warfare. It explores urbanism as a weapon to combat the dangers of the communist intrusion into the American territories and promote living standards for the urban poor in the US cities. The Cold War saw the birth of 'atomic urbanisation', central to which were planning, politics and cultural practices of the newly emerged cities. This book examines cities in the Arctic, Europe, Asia and Australasia in detail to reveal how military, political, resistance and cultural practices impacted on the spaces of everyday life. It probes questions of city planning and development, such as: How did the threat of nuclear war affect planning at a range of geographic scales? What were the patterns of the built environment, architectural forms and material aesthetics of atomic urbanism in difference places? And, how did the 'Bomb' manifest itself in civic governance, popular media, arts and academia? Understanding the age of atomic urbanism can help meet the contemporary challenges that cities are facing. The book delivers a new dimension to the existing debates of the ideologically opposed superpowers and their allies, their hemispherical geopolitical struggles, and helps to understand decades of growth post-Second World War by foregrounding the Cold War.

The Arctic has returned with a vengeance as an area of international contention. Beginning in 2007, Russia has continued to make aggressive moves and claims regarding territory in the Arctic Ocean. These moves undoubtedly have been prompted by global climate change and the importance of energy, with which Russia believes the Arctic is lavishly supplied. These moves apparently were intended to compel other Arctic states, like Norway, to come to terms with Russia. Nonetheless, the tendency to invoke military and security issues and instruments in this region of the world continues apace. These essays, taken from SSI's 2010 conference on Russia, fully explore the Russian and international competition for influence and rights over the exploration and commercial exploitation of the Arctic.

What happens to legacies that do not find any continuation? In Estonia, a new generation that does not remember the socialist era and is open to global influences has grown up. As a result, the impact of the Soviet memory in people's conventional values is losing its effective power, opening new opportunities for repair and revaluation of the past. Francisco Martinez brings together a number of sites of interest to explore the vanquishing of the Soviet legacy in Estonia: the railway bazaar in Tallinn where concepts such as 'market' and 'employment' take on distinctly different meanings from their Western use; Linnahall, a grandiose venue, whose Soviet heritage now poses difficult questions of how to present the building's history; Tallinn's cityscape, where the social, spatial and temporal co-evolution of the city can be viewed and debated; Narva, a city that marks the border between the Russian Federation, NATO and the European Union, and represents a place of continual negotiation of belonging; and the new Estonian National Museum in Raadi, an area on the outskirts of Tartu, that has been turned into a memory field. The anthropological study of all these places shows that national identity and historical representations can be constructed in relation to waste and disrepair too, also demonstrating how we can understand generational change in a material sense. Praise for Remains of the Soviet Past in Estonia 'By adopting the tropes of 'repair' and 'waste', this book innovatively manages to link various material registers from architecture, intergenerational relations, affect and museums with ways of making the past present. Through a rigorous yet transdisciplinary method, Martínez brings together different scales and contexts that would often be segregated out. In this respect, the ethnography unfolds a deep and nuanced analysis, providing a useful comparative and insightful account of the processes of repair and waste making in all their material, social and ontological dimensions.' Victor Buchli, Professor of Material Culture at UCL 'This book comprises an endearingly transdisciplinary ethnography of postsocialist material culture and social change in Estonia. Martínez creatively draws on a number of critical and cultural theorists, together with additional research on memory and political studies scholarship and the classics of anthropology. Grappling concurrently with time and space, the book offers a delightfully thick description of the material effects generated by the accelerated post-Soviet

transformation in Estonia, inquiring into the generational specificities in experiencing and relating to the postsocialist condition through the conceptual anchors of wasted legacies and repair. This book defies disciplinary boundaries and shows how an attention to material relations and affective infrastructures might reinvigorate political theory.' Maria Mälksoo, Senior Lecturer, Brussels School of International Studies at the University of Kent

This collection examines the extent to which nuclear weapons modernization has become a significant point of concern and consideration in international security. Recent statements and substantial investments by nuclear weapon possessor states in the upkeep and modernization of their nuclear postures - particularly the United States, Russia and China - illustrate a return of primacy and the salience of nuclear forces in international politics. The upgrading of systems, the introduction of new capabilities, the intermingling of new technologies, and the advancement of new strategic models, are all indicative of their elevation in importance and reliance. With contributions from leading thinkers in the nuclear weapons domain, this book elucidates the global strategic and policy implications such modernization efforts by the above-mentioned states will have on international security. In unpacking and conceptualizing this developing source of potential (in)security and tension, the collection not only provides a technical context, but also frames the likely effects modernization could have on the relations between these nuclear weapon powers and the larger impact upon efforts to curb nuclear weapons - both in terms of horizontal and vertical proliferation. The chapters have been arranged so as to inform a variety of stakeholders, from academics to policy-makers, by connecting analytical and normative insights, and thereby, advancing debates pertaining to where nuclear modernization sits as a point of global security consternation in the 21st century.
