OF HUMAN BONDAGE

DigiCat

This volume offers new insights into food and culture. Food habits, preferences, and taboos are partially regulated by ecological and material factors - in other words, all food systems are structured and given particular functioning mechanisms by specific societies and cultures, either according to totemic, sacrificial, hygienic-rationalist, aesthetic, or other symbolic logics. This provides much "food for thought". The famous expression has never been so appropriate: not only do cultures develop unique practices for the production, treatment and consumption of food, but such practices inevitably end up affecting food-related aspects and spheres that are generally perceived as

objectively and materially defined. This book explores such dynamics drawing on various theoretical approaches and analytical methodologies, thus enhancing the cultural reflection on food and, at the same time, helping us see how the study of food itself can help us understand better what we call "culture". It will be of interest to anthropologists, philosophers, semioticians and historians of food.

The Scent of Your Breath John Wiley & Sons

This book is the first to establish the relevance of same-sex desires, pleasures and anxieties in the cinema of post-war Italy. It explores cinematic representations of homosexuality and their significance in a wider cultural struggle in Italy involving society, cinema, and sexuality between the 1940s and 1970s. Besides tracing the evolution of representations through both art and popular films, this book also analyses connections with consumer culture, film criticism and politics. Giori uncovers how complicated negotiations between challenges to and valorization of dominant forms of knowledge of homosexuality shaped

representations and argues that they were not always the outcome of hatred but also sought to convey unmentionable pleasures and complicities. Through archival research and a survey of more than 600 films, the author enriches our understanding of thirty years of Italian film and cultural history.

STUTTERING AND CLUTTERING

John Wiley & Sons

This collection of essays deals with the interplay of language and social change, asking the question: How can language and society be made gender equal? The contributors examine the critical role of language in the lives of white women and women of color in the United States. Since language pervades many dimensions of women's lives, this study takes a multi-disciplinary approach to the issues considered. The volume is divided into three sections. The first, "Liberating Language," focuses on the active role women had in altering the extent of linguistic sexism in English during the 1970s. A second section, "Identity Creation," deals with the alteration of that portion of language which serves to name women and their experiences. The final section, "Women of Color," offers a rare and timely look at the particular problems confronted by minority women. It argues that women of color have different problems and different links to language than white middle-class women.

Semiconductor Materials and Process Technology Handbook Five Star (ME)

This book is divided into categories, including typographic, icons, and illustrations, and further classified into categories, like Hip-Hop, Neo-Baroque, kanji, kana, psychedelic, 60s to 70s,

corporate, erotic, and other distinct groups, this book features more than 1,000 works, selected from thousands of entries submitted from hundreds of designers worldwide.

MATHEMATICAL ANALYSIS I

CRC Press

Discusses renowned masters including Roberto Rossellini and Federico Fellini, as well as directors lesser known outside Italy like Dino Risi and Ettore Scola. The author examines overlooked Italian genre films such as horror movies, comedies, and Westerns, and he also devotes attention to neglected periods like the Fascist era. He illuminates the epic scope of Italian filmmaking, showing it to be a powerful cultural force in Italy and leaving no doubt about its enduring influence abroad. Encompassing the social, political, and technical aspects of the craft, the author recreates the world of Italian cinema.

Poems of Catullus Routledge

A broad review of semiconductor materials and process technology, with emphasis on very large-scale integration (VLSI) and ultra large scale integration (ULSI). Brings together "snapshots" of the various aspects in different fields within the technology.

Developing and Delivering Practice-Based Evidence

Association for Supervision & Curriculum Development

The book is the final report of the researches, discussions, conversations around and about the Project PRIN Employability & Competences which took place on March 9th--11th, 2017 within an International Conference at the University of Florence. It was the final event of the project PRIN2012LATR9N which aims were:

«to design innovative programs for higher education, to promote personalized and learner-centered teaching and learning, to build on job competencies, to value talents to create new work opportunities, to support young adults during their employment emergency, as a response to socio economic crisis and as a citizenship action». The research activities concerned the main phases of the students' academic life: career guidance upon entry, personalized teaching, career calling, professional vocation, profession building activities such as internships and work related experiences, and lastly job placement.

Women and Language in Transition Routledge

Fundamentals of Machine Component Design presents a thorough introduction to the concepts and methods essential to mechanical engineering design, analysis, and application. In-depth coverage of major topics, including free body diagrams, force flow concepts, failure theories, and fatigue design, are coupled with specific applications to bearings, springs, brakes, clutches, fasteners, and more for a real-world functional body of knowledge. Critical thinking and problem-solving skills are strengthened through a graphical procedural framework, enabling the effective identification of problems and clear presentation of solutions. Solidly focused on practical applications of fundamental theory, this text helps students develop the ability to conceptualize designs, interpret test results, and facilitate improvement. Clear presentation reinforces central ideas with multiple case studies, in-class exercises, homework problems, computer software data sets, and access to supplemental internet resources, while appendices provide extensive reference material on processing methods, joinability,

failure modes, and material properties to aid student comprehension and encourage self-study.

To many, chance and art are antagonistic terms. But a number of 20th century artists have turned this notion on its head by attempting to create artworks based on randomness. Among those, three in particular articulated a well-argued and thorough theory of the radical use of chance in art: André Breton (writer), John Cage (composer) and François Morellet (visual artist). The implications of such a move away from established aesthetics are far-reaching, as much in conceptual as in practical terms, as this book hopes to make clear. Of paramount importance in this coincidentia oppositorum is the suggested possibility of a correlation between the artistic use of chance and a system of thought itself organised around chance. Indeed placing randomness at the centre of one's art may have deeper philosophical consequences than just on the aesthetic level.

Linear Control System Analysis and Design with MATLAB®, Sixth Edition Springer

The purpose of the volume is to provide a support for a first course in Mathematics. The contents are organised to appeal especially to Engineering, Physics and Computer Science students, all areas in which mathematical tools play a crucial role. Basic notions and methods of differential and integral calculus for functions of one real variable are presented in a manner that elicits critical reading and prompts a hands-on approach to concrete applications. The layout has a specifically-designed modular nature, allowing the instructor to make flexible didactical choices when planning an introductory lecture course. The book

may in fact be employed at three levels of depth. At the elementary level the student is supposed to grasp the very essential ideas and familiarise with the corresponding key techniques. Proofs to the main results befit the intermediate level, together with several remarks and complementary notes enhancing the treatise. The last, and farthest-reaching, level requires the additional study of the material contained in the appendices, which enable the strongly motivated reader to explore further into the subject. Definitions and properties are furnished with substantial examples to stimulate the learning process. Over 350 solved exercises complete the text, at least half of which guide the reader to the solution. This new edition features additional material with the aim of matching the widest range of educational choices for a first course of Mathematics.

The Radical Use of Chance in 20th Century Art Springer DigiCat Publishing presents to you this special edition of "Up at the Villa" by W. Somerset Maugham. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

The book is addressed to classroom teachers interested in beginning to use cooperative learning or increasing the quality of their current efforts.

MATERIALS SCIENCE FOR ENGINEERS

Psychology Press

The story of Elena and Lila begins in the 1950s in a poor but vibrant neighbourhood on the outskirts of Naples. Growing up on these tough streets the two girls learn to rely on each other ahead of anyone or anything else, as their friendship, beautifully and meticulously rendered, becomes a not-always-perfect shelter from hardship. A memorable portrait of two women, *My Brilliant Friend* is also the story of a nation. Through the lives of Elena and Lila, Ferrante gives her readers the story of a city and a country undergoing momentous change.

Paolozzi and Wittgenstein Princeton University Press

Debussy and the Theatre means, in effect, 'Debussy and Pellias et Milisande', the opera both established Debussy's mature style and changed the course of operatic history.

RELATIONAL SOCIAL WORK

Cambridge University Press

Developing and Delivering Practice-based Evidence promotes a range of methodological approaches to complement traditional evidence-based practice in the field of psychological therapies. Represents the first UK text to offer a coherent and programmatic approach to expand traditional trials methodology in the field of psychological therapies by utilizing evidence gained by practitioners Includes contributions from UK and US scientist-practitioners who are leaders in their field Features content appropriate for practitioners working alone, in groups, and for psychological therapy services

Aristotle's Poetics is the earliest surviving work of dramatic theory and first extant philosophical treatise to focus on literary theory. In it, Aristotle offers an account of what he calls "poetry".

Food for Thought Springer

Leo is an Italian writer in his thirties. Thomas, his German lover, is dead. On a plane to Munich, Thomas's home town, Leo slips into a reverie of their meeting and life in Paris, nights in Thomas's flat in Montmartre and a desperate, drug-induced flight through the forests of northern France that spells the end for Leo and Thomas' languid, erotic life together. Leo travels to find anonymity. Structured in three musical movements, *Separate Rooms* is a story of ideal love, broken by absence and separation. When Thomas was alive, he and Leo had separate rooms in order

to preserve the urgency of their passion. Now, Leo faces solitude, the impossible striving of memory to recreate life and the hostility of a prejudiced world. *Separate Rooms*, Tondelli's last book, is a powerful novel of the strength of love and the trauma of death.

"Fascinating... Xiaolong writes with both urgency and grace about modern China is another well-crafted mystery" - Booklist Starred Review
Inspector Chen is on the case of a serial murderer when he is called away to report on environmentalists trying to tackle the pollution issues in China. Chief Inspector Chen and Detective Yu Guangming are brought into a serial murder case when the Homicide squad proves incapable of solving it. But before Chen can make a start, he is called away by a high-ranking Party member for a special assignment: to infiltrate a group of environmental activists meeting to discuss the pollution levels in the country and how to prompt the government into action. Chen knows it will be a far from simple task, especially when he discovers the leader of the group is a woman from his past. Meanwhile, Yu is left to investigate a serial murder case on his own. Both Chen and Yu face pressure from those above to resolve the cases in a satisfactory way . . . even if that means innocents face the punishment.
