Perkahwinan merupakan asas kepada pembentukan dan
penguatan keluarga. Ia menentukan pembentukan keluarga
dan penghasilan juri keturunan yang sah selain memastikan
agar kehidupan manusia tidak pupus di muka bumi. Namun
demikian, tidak semestinya setiap individu yang moncapai tahap
usia berkahwin melangkah ke gerbang perkahwinan tepat pada
waktunya. Terdapat, juga yang mempunyai keinginan untuk
berkahwin lewat dan memilih untuk berbuat demikian. Dalam

konteks wanita masa kini, tidak dapat dinafikan bahawa terdapat
pelbagai faktor yang menyumbang kepada tingkah laku kahwin
lewat. Pemodenan dan urbanisasi yang memangkin
pembangunan negara, kemajuan yang dikecapi oleh golongan
wanita dalam aspek Pendidikan dan kerjaya, serta perubahan
sosial masa kini amat mempengaruhi fenomena kahwin lewat. Di
sini timbul persoalan; adakah tingkah laku berkahwin lewat
tersebut berpunca dari niat tidak mahu berkahwin awal pada usia
perkahwinan atau wujudkah pelbagai kekangan yang
menghambat, mereka daripada berkahwin? Buku ini meneroka
cabaran yang dihadapi golongan ini, mendalami yang mendorong
mereka ke cara hidup yang dipilih, serta menyelami usaha yang
dapat dilakukan untuk mengelakkan hal kahwin lewat.

“Over a decade after its publication, one book on dating has
people firmly in its grip.” —The New York Times We already rely
on science to tell us what to eat, when to exercise, and how long

to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways:

- Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back
- Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness.
- Secure people feel comfortable with intimacy and are usually warm and loving.

Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.

Scholarship establishes a new field of study in the organizational sciences. Just as positive psychology focuses on exploring optimal individual psychological states rather than pathological ones, Positive Organizational Scholarship focuses attention on optimal organizational states --- the dynamics in organizations that lead to the development of human strength, foster resiliency in employees, make healing, restoration, and reconciliation possible, and cultivate extraordinary individual and organizational performance. While the concept of positive organizational

scholarship encompasses the examination of typical and even dysfunctional patterns of behavior, it emphasizes positive deviance from expected patterns. Positive Organizational Scholarship examines the enablers, motivations, and effects associated with remarkably positive phenomena --- how they are facilitated, why they work, how they can be identified, and how researchers and managers can capitalize on them. The contributors do not adopt one particular theory or framework but draw from the full spectrum of organizational theories to understand, explain, and predict the occurrence, causes, and consequences of positivity. Positive Organizational Scholarship rigorously seeks to understand what represents the best of the human condition based on scholarly research and theory. This book invites organizational scholars to build upon and extend the positive organizational phenomena being examined. It provides the definitional, theoretical, and empirical foundations for what will become a cumulative body of enduring work.

Aligning Life and Work in Business ICRMH 2019 Proceedings of the 1st International Conference on Religion and Mental Health, ICRMH 2019, 18 - 19 September 2019, Jakarta, Indonesia

The Sandvik, Diener, and Seidlitz (1993) paper is another that has received widespread attention because it documented the fact that self-report well-being scales correlate with a number of other methods of measuring the same concepts, such as with reports by knowledgeable "informants" (family and friends), experience sampling measurement, and the memory for good versus bad life events. A single factor was found to underlie measures using different methods, and a number of different well-being self-report measures were found to correlate with the non-self-report measures. Thus, although the self-report measures of well-being are imperfect, and can be influenced by response artifacts, they have substantial validity as shown by their correlations with measurements based on alternative methods. Whereas the Pavot and Diener article reviewed the Satisfaction with Life Scale, the

Lucas, Diener, and Larsen (2003) paper reviews various approaches to assessing positive emotions. As we wrote in the chapter in this volume in which we present new measures, we do not consider any of the existing measures of positive affect to be entirely acceptable for measuring subjective well-being in the affect area, and that is why we have created and validated a new measure.

Buku ini membahas tentang fenomena sosial yang terjadi dalam masyarakat, utamanya pada perempuan dan anak yang selama ini selalu dilekatkan dengan kelompok yang rentan akan kekerasan dalam berbagai aspek. Seiring modernisasi yang terjadi, apa yang dilakukan dan dialami oleh perempuan dan anak dalam masyarakat masa kini tidak selalu tersudutkan sebagaimana konstruksi sosial yang ada dalam masyarakat. Menariknya, partisipasi perempuan dan anak dalam masyarakat

akan meneguhkan identitas diri mereka untuk keluar dari stigma yang selama ini melekat dengan kelemahan dan ketidakberdayaan. Begitupun dengan keluarga yang menjadi satuan terkecil di dalam masyarakat, transformasi sosial yang terjadi di dalam keluarga disebabkan oleh peran, fungsi dan berbagai kondisi sosial yang melingkupi sebuah keluarga. Dinamika tersebut juga diulas dengan lengkap di dalam buku ini. Sebagai locus dalam kajian ini, kumpulan hasil penelitian yang terangkum dalam buku ini dilakukan tidak hanya di sebuah kota saja, namun juga dilakukan secara internasional dengan melakukan kajian di beberapa negara yaitu Indonesia, Malaysia dan Hong Kong. Sehingga, persoalan mengenai perempuan, anak dan keluarga dapat dibahas secara komprehensif dan merupakan representatif dari masyarakat Indonesia di tengah arus perubahan secara global. Melalui tiga sub tema besar yang terdapat dalam buku ini, para pembaca dapat menemukan beberapa informasi yang sangat relevan dan menarik mengenai: 1) Transformasi sosial yang terjadi secara mendasar kepada perempuan, anak dan keluarga adalah hal yang tidak mungkin dinafikan lagi. Sebagai makhluk sosial maka perubahan pasti akan dirasakan oleh semua individu tanpa terkecuali, 2) Berbagai permasalahan pokok yang selama ini belum banyak diulas atau ditemukan terkait dengan perempuan, anak dan keluarga, 3) Implementasi dari sudut pandang ilmu sosial yang berharga untuk terus memperkuat inklusi sosial dalam masyarakat kontemporer. Kami berharap semoga kumpulan tulisan yang berfokus pada kajian perempuan, anak dan keluarga dalam masyarakat kontemporer ini dapat memperkaya khazanah keilmuan sosiologi di Indonesia, utamanya pada kajian sosiologi

gender dan sosiologi keluarga. Semoga buku ini bermanfaat bagi para akademisi, peneliti, pemerhati dan peminat kajian perempuan, anak dan keluarga di Indonesia. Terlepas dari semua hal, kami menyadari dalam penyusunan buku ini masih jauh dari kesempurnaan tulisan, namun kami telah mengusahakan yang terbaik bagi para pembaca. Akhir kata, semoga buku ini dapat memberikan manfaat maupun inspirasi pada para pembaca untuk mengembangkan kajian ini dengan lebih baik lagi.

In the modern world we are surrounded by technology. Gadgets such as cell phones, portable computers, and electronic diaries accompany us throughout the day. But is this a good thing? Are we being served by these technological wonders, or have we become enslaved by them? Does constant availability via technology make us more efficient or more stressed? Is our ability to connect with others all over the world, day or night, making us more sociable or turning us into recluses in a virtual world? This book considers the impact of technology on the different spheres of our life - work, home, family and leisure - and assesses ways in which to build better communication between

technology developers and society to ensure that technology enhances our lives and psychological well-being, rather than damaging them.

Sejatinya, sebagai orang yang punya kebiasaan berpikir dari arah kebalikan, saya tak begitu antusias saban kali dikirim publikasi keluaran lembaga pelat merah. Tapi buku ini berbeda! Ditulis oleh para pemikir sekaligus praktisi, artikel demi artikel dalam buku ini jelas-jelas merupakan undangan intelektual bagi para pecandu isu kejahatan, perlindungan anak, dan pemenjaraan. Terus terang, baru dua bacaan tentang penghukuman di Indonesia yang memikat hati saya. Pertama, otobiografi Bung Karno karya Cindy Adams. Sekian banyak chapter-nya

melukiskan rubuh tegaknya si Penyambung Lidah Rakyat dari satu lokasi hukuman ke lokasi hukuman berikutnya. Bagaimana lika-liku historis itu dikemas ke dalam kajian teoretis, silakan kunyah buku ini. Jangan kaget jika setelah membaca buku paten kedua ini, tiba-tiba terbersit "keinginan" untuk mencicipi rasa bermukim dua-tiga malam di penjara.

The Collected Works of Ed Diener Springer Science & Business Media

This book offers a clear process for managers, professionals, and future leaders to help discover their personal meaning in life and apply it to their work. The author uses research outcomes and theories to refute the contemporary philosophy that stresses following an individual's passion alone when choosing a particular job or career. Instead, she recommends employing a personal meaning-oriented approach to life and work, and then becoming passionate about one's work organically. The book also highlights the positive outcomes to organizations and societies when individuals engage with finding meaning in work, focusing on physical and emotional health and satisfaction. The author provides numerous examples of leaders who have aligned their personal meaning and organizational mission, also known as

“meaning-mission fit,” and the relationship of this alignment to their emotional well-being. Together, the research, theory, and evidence in this book equip leaders and managers with an inspiring model to find their own meaning-mission fit, as well as create opportunities for the employees to do the same.

Although the changes offer a wealth of new opportunities, they also act as potential sources of tension and apprehension. The book discusses the state-of-the-art topics, on critical issues, in various sub-fields of psychology and the behavioral sciences, such as Clinical Psychology, Child & Developmental Psychology, Industrial & Organizational Psychology, Experimental Psychology, Social Psychology, and Educational Psychology. In this volume, the authors explain the reasons why subjective

indicators of well-being are needed. They describe how these indicators can offer useful input and provide examples of policy uses of well-being measures. They describe the validity of the subjective well-being measures as well as potential problems. The authors then delve into objections to the use of subjective well-being indicators for policy purposes and discuss why these objections are not warranted. Finally, they describe the measures that are currently in use and the types of measures that are most likely to be valuable in the policy domain. The volume will be of interest to researchers in psychology and economics.
