Drawing on international research and professional practice, this book provides a rich, detailed, and accessible guide to Communities of Practice (CoP) theory, with information on how the theory is constructed, the research that it rests on, and the ways that it has been used in thinking about learning and teaching in the further and adult education sectors. Exploring Communities of Practice in Further and Adult Education introduces CoP theory and the theory of learning that goes with it. It provides empirical examples of CoP research from a range of settings, including further and adult education, to illustrate how CoPs form and work within educational settings, including thinking about assessment and evaluation. It also explores how different CoPs work together and can learn from each other. With these key elements described, this book demonstrates how CoPs

can be used in further and adult education settings to help understand more about how students and staff learn. With engaging material including examples from research, prompts for professional learning, and case studies, this comprehensive and accessible title will appeal to student teachers and beginning teachers as well as more experienced teachers in the sector looking to refresh their practice.

GUIDANCE NOTE 3: INSPECTION & TESTING

SAGE

`This is the first really thought-provoking book that I have read on management development. It is a book primarily addressed to students, but in this field, we are all students. It merits a wide readership both among practising managers as well as among those responsible for developing them' - Max Boisot, ESADE
`Mabey and Finch-Lees inject a breath of fresh air into the management development field by expanding upon its heretofore functionalist base. They offer an informative critique of mainstream views, featuring alternative discourses to examine such hard questions as why management development hasn't quite delivered on management's considerable investment in it. As a veritable tour de force in its absorbing integration and review of a large tract of literature, the book informs both management scholars and practitioners what might be expected from management development's intended but also unanticipated outcomes' - Joe Raelin, Northeastern University
`In a well-written, accessible and yet sophisticated text, Mabey and Finch-Lees show themselves to be as familiar with the latest in management development practice as they are with the sometimes arcane theoretical literature that surrounds it. Its great strength is to recognize the plurality of discourses - some overlapping and complementary, others distinct and oppositional - about the subject. This book can be recommended as a unique resource for students and scholars of management development' - Chris Grey, University of Warwick
This book represents a significant step forward in the theory of management and leadership development. It offers an international perspective in this era of globalisation and a new and questioning perspective on the common belief that leadership is something completely different to, and more important than, management. This book will be of great help to the serious theorist and researcher of management and leadership development. It is an invaluable point of reference for a broad range of theory and research in this area, which it summarises with admirable brevity and clarity' - John G Burgoyne, Lancaster University
Management School and Henley Management College
Management development is a potent and

high-profile human resource activity, involving some of the organizations' key players and attracting huge hopes and investments from governments, organizations and individuals alike. Yet at several levels, the high expectations often remain unfulfilled. So why is this a subject and activity that continues to command such intense interest from scholars and practitioners alike? Chris Mabey and Tim Finch-Lees provide a fresh analysis of the concept and practice of management and leadership development (MLD). Grounded in research, the authors set out the current state of management and leadership development practices, before introducing readers to competing theories of MLD and offering them a more critical perspective. Throughout the book, ideas are illustrated by international case studies and vignettes that evoke the perceptions and interests of the whole range of stakeholders in the management development process. Management Development has been written for upper level undergraduate and masters level students pursuing courses in HRM, HRD, Leadership Development, Organizational Behaviour, Management, Organization Change, Personnel Management, and training and development modules.
