Study guide Management

Robbins Management: The Essentials covers the concepts essential to management in the 21st century in a fresh, lively format that's perfectly suited to a typical university semester. The second edition features new and in-depth coverage of sustainability, ethics and corporate social responsibility and new case studies from local and international businesses.

FOUNDATIONS OF MANAGEMENT 3e has been written to address the needs of introductory management subjects that require an accessible and concise introduction. This streamlined text of 15 chapters covers the principal concepts of management to provide students with a solid foundation for understanding key issues. Management is a dynamic discipline and a textbook in this area must constantly undergo significant changes to prepare students to manage modern, ever-changing organisations within our transforming world. This new third edition builds on the success of its previous editions by exploring the new challenges that face managers today. New topics and features have been added to better reflect the field of management and to capture the excitement

of this dynamic discipline. The text highlights six integrative topics throughout. These topics are managing for sustainability, globalisation, innovation, customer service, diversity and ethics. In particular, we believe the inclusion of managing for sustainability is an important recognition of the challenge that must be met by today's managers and organisations as they start to tackle the issue of global warming. This best-selling text is not a book that just describes management theories. In addition it includes many practical examples and cases, which illustrate the theories in action. As it successfully integrates the various functions of management, the book establishes a dialogue with managers from a variety of fields. This third edition continues to make management concepts meaningful and to excite readers about the possibilities of careers in management.

"This course and this book are about management and managers. Managers are one thing that all organizations--no matter the size, kind, or location--need. And there's no doubt that the world managers face has changed, is changing, and will continue to change. The dynamic nature of today's organizations means both rewards and challenges for the individuals who will be managing those organizations. Management is a dynamic subject, and a textbook on it should reflect those changes to help prepare you to manage under the current conditions. We've written this 14th edition of Management to provide you with the best possible understanding of what it means to be a manager confronting change and to best prepare you for that reality. But not every student aspires to a career in management. And even if you do, you may be five or ten years away from reaching a managerial position. So you might rightly feel that taking a course in management now may be getting ahead of the game. We hear you. In response to these concerns, we've added new material to this book that is important and relevant to everyone working in an organization--manager and non-manager alike. Our "Workplace Confidential" pages identify, analyze, and offer suggestions for dealing with the major challenges that surveys indicate frustrate employees the most. You should find these pages valuable for helping you survive and thrive in your workplace. Surprisingly, this topic has rarely been addressed in business programs. Inclusion in an introductory management course appeared to us to be a logical place to introduce these challenges and to provide guidance in handling them"--
