in Java - Princeton UniversityISBN 0 521
82060 X Modern Compiler Implementation
in Java (hardback) This textbook describes
all phases of a compiler: lexical analysis,
parsing, abstract syntax, semantic actions,
intermediate representations, instruction
selection via tree matching, dataflow
analysis, graphcoloring register allocation,
and runtime systems.Modern Compiler
Implementation in Java. Second
EditionModern Compiler Implementation in
Java. It includes thorough coverage of
current techniques in code generation and
register allocation, and the compilation of

functional and object-oriented languages.
The most accepted and successful
techniques are described and illustrated
with actual JavaTM (R) classes.Modern
