Inspired by
the author's
own
experience,
this is "a
beautiful love
story, and an
extraordinary
story of loss"
(Colm Tóibín).
In 2005,
celebrated
novelist
Francisco
Goldman

married Aura
Estrada at a
Mexican
hacienda.
More than
twenty years
his junior,
Aura was a
gifted young
writer on the
cusp of her
own brilliant
career, and
the two were
deeply in love.
Then, a month
before their
second
anniversary,
Aura broke
her neck
bodysurfing
while they
were on
vacation.
Goldman was
blamed by

Aura's
family—and
crippled by his
own grief and
self-
recrimination.
In the
aftermath of
the accident,
he wrote *Say
Her Name*,
pouring his
feelings of
love and
unspeakable
loss into a
fictionalized
account of
their brief
time together.
Hungry to
keep Aura
alive in his
memory,
Goldman
collects
everything he

can about his dead wife. From her childhood and university days in Mexico City with her fiercely devoted mother to her studies at Columbia University, through the couple's time in New York City and travels to Mexico and Europe, Goldman seeks her essence and grieves her loss, using the writings she left behind as his prism. Filled with "propulsive drama" (The Boston Globe),

Say Her Name is a tribute to Aura, who she was and who she would've been, that "will transport you into the most primal joy in the human repertoire—the joy of loving" (San Francisco Chronicle). **The Life and Death of Psychoanalysis** SUNY Press We are encouraged from all sides to view our lives as being full of choices. Like the products on a supermarket shelf, our careers, our

relationships, our bodies, our very identities seem to be there for the choosing. But paradoxically this seeming freedom to choose can create extreme anxiety, and feelings of inadequacy and guilt. The Tyranny of Choice explores how late capitalism's shrill exhortations to 'be oneself' can be a tyranny which only leads to ever-greater disquiet and how insistence on choice

being a purely individual matter prevents social change. With wisdom, humour and sensitivity, Renata Salecl examines the complexity of the essential human capacity to choose which has become mired in consumerist ironies.

**ON THE
SOCIAL AND
PSYCHIC
LIVES OF
ASIAN
AMERICANS**

Grove/Atlantic
, Inc.
"Why do
zombies walk

with their arms outstretched? How can newborn babies grip an adult finger tightly enough to dangle unsupported from it? And why is everyone constantly texting, tapping and scrolling? For anyone curious about how human beings work, the answers are hidden in plain sight: in our hands. Rather than seeing the history of civilisation in terms of technological breakthroughs

, it can be seen as a history of how we have kept our hands busy. From early tools to machinery, from fists to knives to guns, from papyrus to QWERTY to a glowingly swipeable screen, the hands have always been kept occupied. But why this incessant activity? Why can't we keep our hands still? And what might this reveal about our innermost selves? Drawing examples from popular

culture, art history, psychoanalysis, modern technology and child development, Hands presents a unique and fascinating odyssey through the history of what human beings do with their hands, and why." *Between Winnicott and Lacan* Oxford University Press, USA "Through a wonderfully chosen series of literary and cultural phenomena, [Cheng] captures both the hidden melancholy of

those who, in order to conform to the American dream, learn to discriminate against themselves, and the even more hidden melancholy of a nation thus deprived of some of the most vital energies of its citizens."-- Barbara Johnson, Harvard University Penguin UK There are many footnotes to Freud, but Freud himself is never a mere footnote.

What makes him so special? Each of Freud's works should make us ask the question, why did he write this? What footnotes do we need to put Freud in perspective, and to revive the neglected problems of psychoanalytic theory? In Freud's Footnotes, Darian Leader brings to life debates in the history and theory of psychoanalysis, opening up new perspectives on areas that are all too

often taken for granted. Leader explores the questions that preoccupied Freud and his followers. He shows how their theories were formed and modified, and situates their contributions in the history of ideas. Contexts and influences, revisions and apparently insignificant details are brought to the foreground in an important study which is characteristically profound, witty and persuasive. On Blackness

and Being
Routledge
In this original and trenchant work, Christina Sharpe interrogates literary, visual, cinematic, and quotidian representations of Black life that comprise what she calls the "orthography of the wake." Activating multiple registers of "wake"—the path behind a ship, keeping watch with the dead, coming to consciousness—Sharpe illustrates how Black lives are

swept up and animated by the afterlives of slavery, and she delineates what survives despite such insistent violence and negation. Initiating and describing a theory and method of reading the metaphors and materiality of "the wake," "the ship," "the hold," and "the weather," Sharpe shows how the sign of the slave ship marks and haunts contemporary Black life in the diaspora and how the

specter of the hold produces conditions of containment, regulation, and punishment, but also something in excess of them. In the weather, Sharpe situates anti-Blackness and white supremacy as the total climate that produces premature Black death as normative. Formulating the wake and "wake work" as sites of artistic production, resistance, consciousness, and

possibility for living in diaspora, In the Wake offers a way forward.

EXPLORING THE MIND- BODY CONNECTION

Hamish Hamilton 'In scary films, people say "I'll be right back," and they're usually wrong. In beds, people say "I'll always love you," or "I'll always be faithful to you", and they're usually wrong too.' A characteristically intriguing and insightful look at love, promises and

fidelity by the author of Why do women write more letters than they post?

Women very rarely make promises at the start of a love affair. In fact it is men who say 'We'll always be friends' or who swear eternal love. Why is this? Starting with the motif of the promise, by way of the Bronteuml;s, Four Weddings and a Funeral, Daphne du Maurier, Nick Leeson and Elizabeth I, psychoanalyst Darian Leader

explores the essential questions: Why do people open their mouths when surprised? Why should men often have a compulsion to count things? Why do so many lovers adopt silly baby talk? And why are self-help manuals always less complicated than video-recorder instructions?	critic David L. Eng and psychotherapist Shinhee Han draw on case histories from the mid-1990s to the present to explore the social and psychic predicaments of Asian American young adults from Generation X to Generation Y. Combining critical race theory with several strands of psychoanalytic thought, they develop the concepts of racial melancholia and racial dissociation to	investigate changing processes of loss associated with immigration, displacement, diaspora, and assimilation. These case studies of first- and second-generation Asian Americans deal with a range of difficulties, from depression, suicide, and the politics of coming out to broader issues of the model minority stereotype, transnational adoption, parachute
--	---	--

children, colorblind discourses in the United States, and the rise of Asia under globalization. Throughout, Eng and Han link psychoanalysis to larger structural and historical phenomena, illuminating how the study of psychic processes of individuals can inform investigations of race, sexuality, and immigration while creating a more sustained conversation about the social lives of

Asian Americans and Asians in the diaspora. *Depression and Melancholia* Routledge
The fall of the Berlin Wall marked the end of the Cold War but also the rise of a melancholic vision of history as a series of losses. For the political left, the cause lost was communism, and this trauma determined how leftists wrote the next chapter in their political struggle and how they have

thought about their past since. Throughout the twentieth century, argues Left-Wing Melancholia, from classical Marxism to psychoanalysis to the advent of critical theory, a culture of defeat and its emotional overlay of melancholy have characterized the leftist understanding of the political in history and in theoretical critique. Drawing on a vast and diverse archive in

theory,
testimony,
and image
and on such
thinkers as
Karl Marx,
Walter
Benjamin,
Theodor W.
Adorno, and
others, the
intellectual
historian Enzo
Traverso
explores the
varying nature
of left
melancholy as
it has
manifested in
a feeling of
guilt for not
sufficiently
challenging
authority, in a
fear of
surrendering
in disarray
and
resignation, in
mourning the
human costs

of the past,
and in a sense
of failure for
not realizing
utopian
aspirations.
Yet hidden
within this
melancholic
tradition are
the resources
for a renewed

Francis
The author
believes the
discovery of
psychoanalysis
cannot be
separated
from Freud's
self-analysis
and the
foundational
act of writing
about his own
dreams. Now
that the hype,
the 100 years
of excitement
and building
up of the
institution of
psychoanalysis

s, is in decline, the time seems ripe for a return to the question of the truth of the discovery of the unconscious. This book seeks to take up this crisis and return psychoanalysis to a discourse relevant to contemporary thought as a more personal story of what it means to become a psychoanalyst. The work is divided into three sections, each organized around a major thinker whose work is

defined by a definitive engagement with psychoanalysis: Adorno, Lacan and Badiou. Each section is marked by a careful reading of these thinkers, attempting to deconstruct their understanding of psychoanalysis, including how this work has shaped the author's identity as a psychoanalyst.

A Graphic Guide Profile Books(GB)
The pantheon of renowned

melancholics—from Shakespeare's Hamlet to Walter Benjamin—includes no women, an absence that in Juliana Schiesari's view points less to a dearth of unhappy women in patriarchal culture than to the lack of significance accorded to women's grief. Through penetrating readings of texts from Aristotle to Kristeva, she illuminates the complex history of the symbolics of

loss in Renaissance literature. The pantheon of renowned melancholics—from Shakespeare's Hamlet to Walter Benjamin—includes no women, an absence that in Juliana Schiesari's view points less to a dearth of unhappy women in patriarchal culture than to the lack of significance accorded to women's grief. Through penetrating readings of texts from Aristotle to Kristeva, she illuminates the complex history of the symbolics of loss in Renaissance literature. Schiesari first considers the development of the concept of melancholia in the writings of Freud and then surveys recent responses by such theorists as Luce Irigaray, Kaja Silverman, and Julia Kristeva. Schiesari provides fresh interpretations of works by Aristotle, Hildegard of Bingen, and Ficino and she considers women's poetry of the Italian Renaissance, key works by Tasso and Shakespeare, and the writings of Walter Benjamin and Jacques Lacan. According to Schiesari, male melancholia was celebrated during the Renaissance as a sign of inspired genius, at the same time as public rituals of mourning led by women were suppressed. The Gendering

of Melancholia will be stimulating reading for scholars and students in the fields of feminist criticism, psychoanalytic and literary theory, and Renaissance studies, and for anyone interested in Western cultural history.

Seeing Ghosts
Faber & Faber
Strictly Bipolar
is Darian Leader's treatise on the psychological disorder of our times. If the post-war period was called the 'Age of

Anxiety' and the 1980s and '90s the 'Antidepressant Era', we now live in Bipolar times. Mood-stabilising medication is routinely prescribed to adults and children alike, with child prescriptions this decade increasing by 400% and overall diagnoses by 4000%. What could explain this explosion of bipolarity? Is it a legitimate diagnosis or the result of Big Pharma marketing? Exploring

these questions, Darian Leader challenges the rise of 'bipolar' as a catch-all solution to complex problems, and argues that we need to rethink the highs and lows of mania and depression. What, he asks, do these experiences have to do with love, guilt and rage? Why the spending sprees and the intense feeling of connection with the world? Why the confidence, the self-

esteem and the sense of a bright future that can so swiftly turn into despair and dejection? Only by looking at these questions in a new way will we be able to understand and help the person caught between feelings that can be so terrifying and so exhilarating, so life-affirming yet also so lethal. Strictly Bipolar is essential reading for anyone interested in contemporary

views of the self, bipolarity and a deeper understanding of manic-depression. Praise for Strictly Bipolar: 'A beautifully thoughtful understanding not just of highs and lows, mania and depression, but of why and how these mechanisms work in our minds and bodies and how the human subject is coerced today to embrace a culture of "bipolarity"'. Susie Orbach 'A timely book.

Darian Leader's thoughts are more fixated strong-arm interesting, more humane and more persuasive than the profit coercion of the madness industry. Instead of the shoddy reasoning that leads to wrong treatment and over-treatment, he offers illumination and insight; his book is a contribution to a debate, but it could also change lives' Hilary Mantel Darian Leader is a psychoanalyst

practising in London and a member of the Centre for Freudian Analysis and Research and of the College of Psychoanalysts - UK. He is the author of *What is Madness?*, *The New Black*, *Why do women write more letters than they post?*, *Promises lovers make when it gets late*, *Freud's Footnotes and Stealing the Mona Lisa*, and co-author, with David Corfield, of *Why Do People Get Ill?*

He is Honorary Visiting Professor in the School of Human and Life Sciences, Roehampton University. Say Her Name Princeton University Press

This book provides a timely exploration and comparison of key concepts in the theories of Melanie Klein and Jacques Lacan, two thinkers and clinicians whose influence over the development of psychoanalysis

s in the wake of Freud has been profound and far-reaching. Whilst the centrality of the unconscious is a strong conviction shared by both Klein and Lacan, there are also many differences between the two schools of thought and the clinical work that is produced in each. The purpose of this collection is to take seriously these similarities and differences. Deeply

relevant to both theoretical reflection and clinical work, the New Klein-Lacan Dialogues should make interesting reading for psychoanalysts, psychotherapists, mental health professionals, scholars and all those who wish to know more about these two leading figures in the field of psychoanalysis. The collection centres around key concepts such as: 'symbolic

function', the 'ego', the 'object', the 'body', 'trauma', 'autism', 'affect' and 'history and archives'.

TRADITION AND THE BLACK ATLANTIC

Hamish Hamilton D.W. Winnicott and Jacques Lacan are arguably two of the most important psychoanalytic theoreticians since Freud, and, somewhat ironically, seemingly two of the most incompatible.

Lewis Kirshner and his colleagues attempt to demonstrate how the intellectual contributions of these two figures - such as Winnicott's self and Lacan's subject - complement productively despite their apparent contrast. Throughout the book, their major concepts are clarified and differentiated, but always with an eye toward points of intersection and a more effective psychoanalytic

c practice.
Furthermore,
these contri.

illness-and
separating
from her
husband-left
her
fundamentally

altered. But it is also one of resilience, as she observes her family persevere even in the face of immeasurable loss. With lyricism and unswerving candor, *The Long Goodbye* conveys the fleeting moments of joy that make up a life, and the way memory can lead us out of the jagged darkness of loss. Effortlessly blending research and reflection, the personal and the universal, it is not only

an exceptional memoir, but a necessary one. *Freud's Footnotes* Icon Books Ltd Have you ever wondered why we get ill? Can our thoughts and feelings worsen or even cause conditions like heart disease, cancer or asthma? And what - if anything - can we do about it? *Why Do People Get Ill?* explores the relationship between what's going on in our heads and what happens in our bodies, combining the

latest research with neglected findings from medical history. With remarkable case studies and startling new insights into why we fall ill, this intriguing book should be read by anyone who cares about their own health and that of other people. *In the Wake* Routledge Depression is an experience known to millions. But arguments rage on aspects of its definition and its impact on

societies present and past: do drugs work, or are they merely placebos? Is the depression we have today merely a construct of the pharmaceutical industry? Is depression under- or over-diagnosed? Should we be paying for expensive 'talking cure' treatments like psychoanalysis or Cognitive Behavioural Therapy? Here, Clark Lawlor argues that understanding the history of

depression is important to understanding its present conflicted status and definition. While it is true that our modern understanding of the word 'depression' was formed in the late nineteenth and early twentieth centuries, the condition was originally known as melancholia, and characterised by core symptoms of chronic causeless sadness and fear. Beginning in

the Classical period, and moving on to the present, Lawlor shows both continuities and discontinuities in the understanding of what we now call depression, and in the way it has been represented in literature and art. Different cultures defined and constructed melancholy and depression in ways sometimes so different as to be almost unrecognisable. Even the present is still

a dynamic history, in the sense that the 'new' form of depression, defined in the 1980s and treated by drugs like Prozac, is under attack by many theories that reject the biomedical model and demand a more humanistic idea of depression - one that perhaps returns us to a form of melancholy. *Stealing the Mona Lisa* Penguin Books With erudition, wit, and grace, Henry

Louis Gates, Jr. elucidates the roots and limitations of cultural studies Debating Relational Psychoanalysis John Wiley & Sons The New Black is Darian Leader's compassionate and illuminating exploration of melancholy What happens when we lose someone we love? A death, a separation or the break-up of a relationship are some of the hardest times we have to live through. We

may fall into a nightmare of depression, lose the will to live and see no hope for the future. What matters at this crucial point is whether or not we are able to mourn. In this important and groundbreaking book, acclaimed psychoanalyst and writer Darian Leader urges us to look beyond the catch-all concept of depression to explore the deeper, unconscious ways in which we respond to the experience of

loss. In so doing, we can loosen the grip it may have upon our lives. 'His orthodox, psychoanalytical approach, produces an unpredictable, occasionally brilliant book. The New Black is a mixture of Freudian text, clinical assessments and Leader's own brand of gentle wisdom' Herald 'Compelling and important . . . an engrossing and wise book' Hanif Kureishi 'There are many self-help books on the market . . . The New Black is a book that might actually help' Independent Darian Leader is a psychoanalyst practising in London and a member of the Centre for Freudian Analysis and Research and of the College of Psychoanalysts - UK. He is the author of The New Black, Strictly Bipolar, Why do women write more letters than they post?, Promises lovers make when it gets late, Freud's Footnotes and Stealing the Mona Lisa, and co-author, with David Corfield, of Why Do People Get Ill? He is Honorary Visiting Professor in the School of Human and Life Sciences, Roehampton University.
