AN INSTANT NEW YORK TIMES BESTSELLER The “lively” (The New Yorker), “convincing” (Forbes), and “riveting pick-me-up we all need right now” (People) that proves humanity thrives in a crisis and that our innate kindness and cooperation have been the greatest factors in our long-term success as a species. If there is one belief that has united the left and the right, psychologists and philosophers, ancient thinkers and modern ones, it is the tacit assumption that humans are bad. It's a notion that drives newspaper headlines and guides the laws that shape our lives. From Machiavelli to Hobbes, Freud to Pinker, the roots of this belief have sunk deep into Western thought. Human beings, we're taught, are by nature selfish and governed primarily by self-interest. But what if it isn't true? International bestseller Rutger Bregman provides new perspective on the past 200,000 years of human history, setting out to prove that we are hardwired for kindness, geared toward cooperation rather than competition, and more inclined to trust rather than distrust one another. In fact this instinct has a firm evolutionary basis going back to the beginning of Homo sapiens. From the real-life Lord of the Flies to the solidarity in the aftermath of the Blitz, the hidden flaws in the Stanford prison experiment to the true story of twin brothers on opposite sides who helped Mandela end apartheid, Bregman shows us that believing in human generosity and collaboration isn't merely optimistic—it's realistic. Moreover, it has huge implications for how society functions. When we think the worst of people, it brings out the worst in our politics and economics. But if we believe in the reality of humanity's kindness and altruism, it will form the foundation for achieving true change in society, a case that Bregman makes convincingly with his signature wit, refreshing frankness, and memorable storytelling. THE HEART GOES LAST

Brookings Inst Press

This work examines the relationship between the rapid technological and economic growth characteristic of high technology districts and their distinct labor market institutions - short job tenures, rapid turnover, flat firm hierarchies, weak internal labor markets, high use of temporary labor, unusual uses of independent contracting, little unionization, unusual employee organization (e.g., chat groups, and ethnic organization), unequal income, minimal employment discrimination litigation, flexible compensation (especially stock options), and heavy use of immigrants on short-term visas. The author suggests that while these distinctive labor market institutions are somewhat unorthodox and may present legal problems, they play essential roles in high growth.

Prisoner of Tehran Beard Books

The Inspiration for the New Podcast Featuring Jason Rezaian. “544 Days” is a Spotify original podcast, produced by Gimlet, Crooked Media and A24. The dramatic memoir of the journalist who was held hostage in a high-security prison in Tehran for eighteen months and whose release—which almost didn't happen—became a part of the Iran nuclear deal In July 2014, Washington Post Tehran bureau chief Jason Rezaian was arrested by Iranian police, accused of spying for America. The charges were absurd. Rezaian's reporting was a mix of human interest stories and political analysis. He had even served as a guide for Anthony Bourdain's Parts Unknown. Initially, Rezaian thought the whole thing was a terrible misunderstanding, but soon realized that it was much more dire as it became an eighteen-month prison stint with impossibly high diplomatic stakes. While in prison, Rezaian had tireless advocates working on his behalf. His brother lobbied political heavyweights including John Kerry and Barack Obama and started a social media campaign—#FreeJason—while Jason's wife navigated the red tape of the Iranian security apparatus, all while the courts used Rezaian as a bargaining chip in negotiations for the Iran nuclear deal. In *Prisoner*, Rezaian writes of his exhausting interrogations and farcical trial. He also reflects on his idyllic childhood in Northern California and his bond with his Iranian father, a rug merchant; how his teacher Christopher Hitchens inspired him to pursue journalism; and his life-changing decision to move to Tehran, where his career took off and he met his wife. Written with wit, humor, and grace, *Prisoner* brings to life a fascinating, maddening culture in all its complexity. “An important story. Harrowing, and suspenseful, yes—but it's also a deep dive into a complex and egregiously misunderstood country with two very different faces. There is no better time to know

more about Iran—and Jason Rezaian has seen both of those faces.” — Anthony Bourdain “Jason paid a deep price in defense of journalism and his story proves that not everyone who defends freedom carries a gun, some carry a pen.” —John F. Kerry, 68th Secretary of State

The New York Times bestselling author of *Never Less Than a Lady* “will draw the readers into a world of espionage and danger” (Fresh Fiction). Mary Jo Putney’s riveting *Lost Lords* series unleashes a high stakes royal plot—which may prove easier for Damian Mackenzie to handle than his own unruly desire . . . He’s a bastard and a gambler and society’s favorite reprobate. How can she not fall in love? But Damian Mackenzie has secrets that leave no room in his life for courting high-born young ladies—especially not the sister of one of his oldest friends. Yet when Kiri’s quick thinking reveals a deadly threat to England’s crown, Damian learns that she is nowhere near as prim and respectable as he first assumed—and the lady is far more alluring than any man can resist . . . Baker Somerset was a Scotland Yard Detective sent to Ottawa to help solve a brutal kidnapping case. After the suspect put four bullets in her, she decided to stay in Ottawa and open her own detective agency. One morning, the body of a British diplomat is found at her office door. Hunting his killer, she learns the murder is tied to the kidnapping that brought her to Canada, and in the process, she unearths bribery, fraud, and illegal activity in the military arms and equipment industry. With billions of dollars at stake, the perpetrators play rough; willing to kill anyone who stands in their way. As the risks to her life and career multiply and bodies begin to pile up, Somerset enlists her friends: Duchess “Keys” Brown, a vivacious Jamaican computer guru; Joe Manning, a martial arts expert; and Charles Stroud, her old Scotland Yard partner. They sift through a maze of conflicting evidence, numerous dead ends, and frightening danger to bring those responsible to justice. *ONE BAD DAY AFTER ANOTHER* is a book for crime and mystery enthusiasts. Infusing the fast pace and high stakes of modern thrillers and hard-boiled detectives’ “take no prisoners” attitude into the traditional mystery genre, Folsom delivers a nail-biting story.

Being Bad will change the way you think about the social and academic worlds of Black boys. In a poignant and harrowing journey from systems of education to systems of criminal justice, the author follows her brother, Chris, who has been designated a “bad kid” by his school, a “person of interest” by the police, and a “gangster” by society. Readers first meet Chris in a Chicago jail, where he is being held in connection with a string of street robberies. We then learn about Chris through insiders’ accounts that stretch across time to reveal key events preceding this tragic moment. Together, these stories explore such timely issues as the under-education of Black males, the place and importance of scapegoats in our culture, the on-the-ground reality of zero tolerance, the role of mainstream media in constructing Black masculinity, and the critical relationships between schools and prisons. No other book combines rigorous research, personal narrative, and compelling storytelling to examine the educational

experiences of young Black males. Book Features: The natural history of an African American teenager navigating a labyrinth of social worlds. A detailed, concrete example of the school-to-prison pipeline phenomenon. Rare insight of an African American family making sense of, and healing from, school wounds. Suggested resources of reliable places where educators can learn and do more. “Other books have focused on the school-to-prison pipeline or the educational experiences of young African American males, but I know of none that bring the combination of rigorous research, up-close personal vantage point, and skilled storytelling provided by Laura in *Being Bad*.” —Gregory Michie, Chicago public school teacher, author of *Holler If You Hear Me*, senior research associate at the Center for Policy Studies and Social Justice, Concordia University Chicago “Refusing to separate the threads that bind the oppressive fabric of contemporary urban life, Laura has crafted a story that is at once astutely critical, funny, engaging, tearful, dialogue-filled, profoundly theoretical, despairing, and filled with hope. *Being Bad* is a challenge and a gift to students, families, policymakers, soon-to-be teachers, social workers, and ethnographers.” —Michelle Fine, distinguished professor, Graduate Center, CUNY “Perhaps more than any other study on this topic, this book brings to life the complicated, fleshed, lived experience of those most directly and collaterally impacted by the politics of schooling and its relationship to our growing prison nation.” —Garrett Albert Duncan, associate professor of Education and African & African-American Studies, Washington University in St. Louis

Based on unprecedented access he received to the highly secretive "Googleplex," acclaimed New York Times columnist Randall Stross takes readers deep inside Google, the most important, most innovative, and most ambitious company of the Internet Age. His revelations demystify the strategy behind the company's recent flurry of bold moves, all driven by the pursuit of a business plan unlike any other: to become the indispensable gatekeeper of all the world's information, the one-stop destination for all our information needs. Will Google succeed? And what are the implications of a single company commanding so much information and knowing so much about us? As ambitious as Google's goal is, with 68 percent of all Web searches (and growing), profits that are the envy of the business world, and a surplus of talent, the company is, Stross shows, well along the way to fulfilling its ambition, becoming as dominant a force on the Web as Microsoft became on the PC. Google isn't just a superior search service anymore. In recent years it has launched a dizzying array of new services and advanced into whole new businesses, from the introductions of its controversial Book Search and the irresistible Google Earth, to bidding for a slice of the wireless-phone spectrum and nonchalantly purchasing

YouTube for \$1.65 billion. Google has also taken direct aim at Microsoft's core business, offering free e-mail and software from word processing to spreadsheets and calendars, pushing a transformative -- and highly disruptive -- concept known as "cloud computing." According to this plan, users will increasingly store all of their data on Google's massive servers -- a network of a million computers that amounts to the world's largest supercomputer, with unlimited capacity to house all the information Google seeks. The more offerings Google adds, and the more ubiquitous a presence it becomes, the more dependent its users become on its services and the more information they contribute to its uniquely comprehensive collection of data. Will Google stay true to its famous "Don't Be Evil" mantra, using its power in its customers' best interests? Stross's access to those who have spearheaded so many of Google's new initiatives, his penetrating research into the company's strategy, and his gift for lively storytelling produce an entertaining, deeply informed, and provocative examination of the company's audacious vision for the future and the consequences not only for the business world, but for our culture at large.

Disposable Youth W. W. Norton & Company

Seven years after the financial crisis of 2008, financiers remain villains in the public mind. Most Americans believe that their irresponsible actions and complex financial products wrecked the economy and destroyed people's savings, and that bankers never adequately paid for their crimes. But as Economist journalist Andrew Palmer argues in *Smart Money*, this much maligned

industry is not only capable of doing great good for society, but offers the most powerful means we have for solving some of our most intractable social problems. From Babylon to the present, the history of finance has always been one of powerful innovation. Now a new generation of financial entrepreneurs is working to revive this tradition of useful innovation, and Palmer shows why we need their ideas today more than ever. Traveling to the centers of finance across the world, Palmer introduces us to peer-to-peer lenders who are financing entrepreneurs the big banks won't bet on, creating opportunities where none existed. He explores the world of social-impact bonds, which fund programs for the impoverished and homeless, simultaneously easing the burden on national governments and producing better results. And he explores the idea of human-capital contracts, whereby investors fund the educations of cash-strapped young people in return for a percentage of their future earnings. In this far-ranging tour of the extraordinarily creative financial ideas of today and of the future, *Smart Money* offers an inspiring look at the new era of financial innovation that promises to benefit us all.
