MOTO GP - A PHOTOGRAPHIC CELEBRATION

White Lion Publishing

'Moto GP is about the individual's story, the battles between the individuals, the different personalities, the different men that are striving for one goal, to win the world championship'. Freddie Spencer, three-time world champion Since its earliest beginnings on public road courses to today's purpose-built championship courses, Moto GP has always been about one thing: pushing man and machine to new heights of performance. Telling the story of how leading manufacturers such as Yamaha, Honda and Suzuki, have strived to build the perfect machine, and detailing the incredible rivalries of such sporting legends as Kenny Roberts and Barry Sheene, Freddie Spencer and Eddie Lawson, Valentino Rossi and Jorge Lorenzo - to name just a few - Phil Wain uncovers the stories behind historic races, the innovations that made the best bikes on the grid and describes the infamous moments in which riders were made champions. Moto GP is a photographic celebration of the heroes, bikes and circuits that have defined the adrenaline-soaked world of motorbike racing.

Yamaha introduced the YZF-R1 in 1988. The launch model was available in white, red or blue. In Europe the blue proved to be the most popular and was in very short supply. In 2000, Yamaha introduced a series of improvements, but in 2001 it was beaten in performance numbers by the Suzuki GSX-R. One major change for the '02-'03 period was a new fuel injection system, which worked like a carburetor slide and the engine was developed to rev higher, faster and for longer. In '04, with the competition advancing, Yamaha took to major developments including style updates and performance upgrades. In 2006, the 50th anniversary of Yamaha racing in the US, Yamaha released a Limited Edition yellow/white/black bike in original Yamaha racing colors. They also made a Special edition model featuring black paint, front and rear custom Ohlins suspension units developed by the people who work on the YZR-M1 MotoGP bike. Only 500 units were made for the United States.

MOTOCOURSE 2020-2021 celebrates its 45th year of publication - and despite the World pandemic

throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-barred assessment of all the aspects of a compelling season's action. MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinanini, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas, Ai Ogura and John McPhee hotly disputed the Moto3 title. In World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alvaro Bautista, Chaz Davies and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'.

Heterodox economics can provide a more complete and robust explanation of economic realities than orthodox (or mainstream) economics. Contemporary Issues in Heterodox Economics: Implications for Theory and Policy Action argues that this greater explanatory power gives heterodox economics the ability to illuminate appropriate policy for the major crises of our time, as well as proffer the basis for a more rounded, pluralist approach to economic theory. The chapters in this wide-ranging volume address some of the key issues facing the global economy, including the growing disparity of income/wealth between persons and economic areas, environmental degradation, issues associated with employment, and the regularity of economic/financial crises.

The authors examine potential policy responses such as modern monetary theory, models of public ownership, and the need to move beyond standard concepts of growth. They also explore the deficiencies of orthodox economics, and contend that a more pluralist approach to economics is required in the public sphere, in academia, and in the classroom in order to help face the challenges of the twenty-first century. This book is invaluable reading for students and scholars across the social sciences who are interested in alternatives to mainstream economic thinking.

CLASSIC MOTORCYCLE RESTORATION AND MAINTENANCE

Haynes Manuals N. America, Incorporated

Triumph Bonneville: 60 Years is a celebration one of motorcycling's most iconic and beloved bikes. First manufactured in Great Britain in 1959, Triumph's legendary model resonates deeply with motorcycle enthusiasts worldwide who love its style, sound, performance, and undeniable coolness. It's no surprise that Triumph was Steve McQueen's favorite ride. The Bonneville's story is one of successes and challenges as Triumph grew steadily in the post-World War II decades to become America's most successful "import" motorcycle marque. Triumph won every championship worth winning, owned the world speed record for fifteen years, and wooed Hollywood's hottest stars. Bonneville was Triumph's halo machine, one of the highest performance motorcycles of the 1960s. However, as competing marques eventually eclipsed the Bonneville in the 1970s, Triumph management struggled, leading first to bankruptcy and then to the demise of the company in 1983. Triumph was resurrected by British industrialist John Bloor in the late 1990s to become a twenty-first century global success story, which includes a revived and thoroughly retro-contemporary Bonneville range.
