This book is jointly compiled by Chinese Academy of Sciences, Cyberspace Administration of China, Ministry of Education of the People's Republic of China, Ministry of Science and Technology of the People's Republic of China, Chinese Academy of Social Sciences, National Natural Science Foundation of China and Chinese Academy of Agricultural Sciences. Over the past several years, Chinese scholars have contributed numerous research works on the development of Chinese scientific information and technology, and

produced a range of outstanding achievements.

Focusing on the main topic of e-Science, this book explores the forefront of science and technology around the globe, the major demands in China and the main fields in China's economic development.

Furthermore, it reviews the major achievements and the typical cases in China's e-Science research. It provides a valuable reference source for future technological innovations and will introduce researchers and students in the area of e-Science to the latest results in China.

More than any other
area of regulation,
antitrust economics
shapes law and policy
in the United States,
the Americas, Europe,
and Asia. In a number
of different areas of
antitrust, advances in
theory and empirical
work have caused a
fundamental
reevaluation and shift
of some of the
assumptions behind
antitrust policy. This
reevaluation has
profound implications
for the future of the
field. The Oxford

Handbook of
International Antitrust
Economics has
collected chapters from
many of the leading
figures in antitrust. In
doing so, this two
volume Handbook
provides an important
reference guide for
scholars, teachers, and
practitioners. However,
it is more than a
merely reference
guide. Rather, it has a
number of different
goals. First, it takes
stock of the current
state of scholarship
across a number of
different antitrust
topics. In doing so, it
relies primarily upon
the economics
scholarship. In some
situations, though,
there is also coverage
of legal scholarship,
case law
developments, and
legal policies. The
second goal of the

Handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years. It has both shaped policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

Focusing on practical, need-to-know information, Community/Public Health Nursing Practice helps you learn how to apply the nursing process at the community and family level. It features an engaging, easy-to-understand writing

style, as well as assessment tools, detailed case studies, and clinical examples that demonstrate how key concepts apply to real-world practice. Additional resources on the companion Evolve website expand and enhance content within the text. Practical features including Case Studies, Ethics in Practice, and The Nursing Process in Practice illustrate real-world applications of key community/public health nursing concepts. A complete unit on the community as client helps you understand how the assessment, diagnosis, planning, intervention, and evaluation steps of the nursing process apply to the community, as opposed to an individual. A chapter

devoted to community assessment provides a complete assessment tool and shows you how the tool applies to two different types of communities. UNIQUE! A chapter on screening and referral promotes population-focused practice, which is the crux of community/public health nursing. A separate unit on the family emphasizes the importance of viewing the family as a singular client. A complete discussion of the Minnesota Wheel helps you better understand this widely-accepted framework for community/public health nursing practice. Helpful sections such as Focus Questions, Chapter Outlines, Key Ideas, and Learning by Experience and

Reflection help you pinpoint essential information. NEW! Healthy People 2020 objectives throughout the text help you identify common health risk factors in populations and families. NEW! Coverage of health care reform, including the Patient Protection and Affordable Care Act of 2010 (PPACA), explores how current health care legislation impacts community/public health nursing. NEW! Discussions of community health "hot button" issues, such as human trafficking, genital circumcision, and bullying, introduce you to today's health care challenges. NEW! Information on weather-related disaster fatalities, bioterrorism, and

national and state planning responses familiarize you with current, relevant issues which affect the health of populations worldwide and shape the role of the community/public health nurse.

The leadership and management of academic health centers present challenges as complex as any in the corporate environment. A consensus is emerging about their integrated mission of education, research and service, and this book, first published in 2005 and

focusing on value-driven management, provides a truly comprehensive review of these issues available. Based on reports produced by the Blue Ridge Academic Health Group, which has developed a framework for meeting the challenges of improving health in the 21st century, it also contains invited commentaries and case studies from leading authorities in and beyond the United States. It identifies the public policies and organizational practices required to maximise the health status of individuals and the population, and highlights innovative practices. It is essential reading for managers and leaders of clinical and basic

science departments in academic health centers, and for all those involved in health systems management studies.

This book provides an in-depth evaluation of the U.S. health care system's development in the twentieth century. It shows how a unique economic design - the insurance company model - came to dominate health care, bringing with it high costs; corporate medicine; and fragmented, poorly distributed care.

 Pay for Performance
 (P4P), the burgeoning
 movement in the
 healthcare industry to
 align financial
 incentives with
 improved results, is
 touted as a means of

improving healthcare quality without increasing costs. Health plans are now devising metrics for tying millions of dollars in physician bonus incentives to healthcare quality outcomes. In this special report, "Pay for Performance: Raising the Bar on Quality, Efficiency and Results," based on two recent audio conferences, a panel of experts shared their experiences: healthcare consultants analyzed the results of national studies on the reach of P4P programs among U.S.-based health plans and sketched out a timeline for future developments, while three organizations described their ongoing efforts to build cohesive P4P

programs. You'll hear from Geoffrey B. Baker, President, Med-Vantage, Inc.; Dr. Nicholas Bonvicino, Senior Medical Director, Clinical Network Management, Horizon-Blue Cross Blue Shield of New Jersey; Paul Keckley, Executive Director, The Center for Evidence-Based Medicine at Vanderbilt University Medical Center; Dr. Milton Schwarz, Regional Medical Director, Aetna US Healthcare; and Mark Xistris, Director of Provider Relations & Health Information, The Alliance on theories, application and results of pay for performance programs. This report is based on the June 10, 2004 audio conference "Pay for Performance: Improving Clinical and

Financial Outcomes" and the September 8, 2004 audio conference "Pay for Performance Measures: Lessons from the Early Adopters" during which Baker, Bonvicino, Keckley, Schwarz and Xistris described the P4P landscape today, the impact of evidence-based medicine on P4P, an employer coalitions experience, how Horizon Blue Cross Blue Shield of New Jersey has revamped their quality improvement program and the fundamentals, metrics and payment details of the Aetna P4P program in California. The definitive guide for anyone dreaming of living in paradise when they retire. Whether motivated by a desire for adventure, or the

need to make the most of a diminished nest egg, more and more Americans are considering an overseas retirement. Drawing on her more than three decades of experience helping people relocate happily and successfully, Kathleen Peddicord shows how living in an unconventional retirement destination can cost less than a traditional home in Florida or Arizona. Peddicord addresses all of the essential issues, including: • Finding a home to own or rent • Researching and understanding your tax

liability • Obtaining health insurance and medical care • Avoiding common mistakes and pitfalls • Opening a bank account Whether readers are interested in relatively unknown havens like Nicaragua, well-traveled areas in Italy, or need some help deciding, *How to Retire Overseas* is the ultimate guide to making retirement dreams come true.
