Built on a foundation of nearly 1,200 references, *Leadership and Management in Police Organizations* is a highly readable text that shows how organizational theory and behavior can be applied to improve the operations, leadership, and management of law enforcement. Author Matthew J. Giblin emphasizes leadership and management as separate skills in successful police supervisors and executives, illustrating to students how the two skills combine to improve individual and organizational efficacy in policing. Readers will come away with a stronger understanding of why organizational decisions matter and the impact research can have on police departments.

The Seventh Edition of *Canadian Organizational Behaviour* is truly a "new and improved" McShane: new trim size, fresh new design, new co-author, reorganized table of contents, improved examples, and even enhanced readability. The McShane brand is known for its cutting edge research and scholarship, recognized for its "for Canadians, by Canadians" approach to content, and respected for its firm anchoring of Canadian material within a global context. No other OB book offers the kind of comprehensive coverage in such an accessible, readable format. *Canadian Organizational Behaviour* continues to lead the way as the most innovative OB text on the market. McShane was the first OB textbook to include topics such as workplace emotions, appreciative inquiry, social identity theory, future search events, virtual teams, workaholism, and emotional intelligence. The innovation continues in the seventh edition with new and expanded coverage of topics such as employee engagement, resilience, four-drive theory, blogs and wikis, psychological harassment, learning orientation, Schwartz's values model, and separating socioemotional from constructive conflict. The pedagogical features have been completely overhauled to speak to new and emerging topics in OB worldwide, including the opening vignettes, the photo essays in each chapter, and many of the end-of-chapter exercises and end-of-part cases.

Organisational Behavior by Fred Luthans was one of the first mainstream organisational behavior texts on the market and continues the tradition of being the most current and up-to-date researched text today. Well-known author Fred Luthans is the 5th most prolific Publisher in Academy of Management Journals and a senior research scientist with the Gallup Organization, who continues to do research in the organisational behavior area. The Twelfth Edition of *Organisational Behavior* is ideal for instructors who take a research-based and conceptual approach to their OB course.

Robbins: *Leading the way in OB* Written as an alternative to Robbins' larger *Organisational Behaviour* text, *OB: The Essentials* is an applied and focused text that will help your students to quickly grasp the essential elements of OB. In an engaging 13 chapter format, this book retains the fluid writing style, academic rigour and extensive use of examples that are trademark features of the Robbins texts. While there are less chapters, the book continues to provide cutting-edge content that is often missing in other OB books - this is not merely a subset of material from Robbins' *Organisational Behaviour* text; it was written from the ground up to present all the essential content in a shorter format. This new text will have broad appeal; particularly to visual learners who will appreciate the lively design and extensive use of examples and photographs to aid comprehension and retention of concepts. New co-author Dr Michael Jones of the University of Wollongong brings his avid enthusiasm for student education as well as a solid research background in motivation, commitment and business operations to the new text. Reviewers and users of the Robbins texts regularly report that they are 'conversational', 'interesting', 'student-friendly' and 'very clear and understandable'. Packed full of pedagogical features that will engage and stimulate your students, *OB: The Essentials* will ensure that they are getting a sound understanding of OB. Features such as the 'Applying Knowledge' and 'Student Challenge' boxes prompt students to apply and think strategically about what they have just learnt.

In this book, this author utilizes various concepts, theories, analytical methods, techniques, and practical knowledge and expertise propounded or espoused by scholars and experts with differing worldviews that tend to facilitate the understanding of diversity and diversity management in the 'global village.' Some of the perspectives are based on philosophical, ideological, and cultural orientations of scholars, statesmen, and experts from the various geopolitical regions of the world. Some of the discussion may evoke some controversial thought processes that are considered necessary for healthy debate on the issues of diversity and diversity management from interdisciplinary, multidisciplinary, and trans-disciplinary perspectives. However, there is more emphasis on global and interdisciplinary perspectives in the discussion of diversity and diversity management in this book. The purpose of this book is to refocus attention on the issues of diversity and diversity management but from global and interdisciplinary perspectives. The book contributes to the continuing discourse on diversity and diversity management by presenting some conventional and less controversial theories and models, as well as some traditionally controversial ones for managing diversity in the workplace in particular, and in society in general. Whereas much has been written in the past about the debate over which strategies are best for managing diversity, new study dimensions in the era of globalization of business, economic, political, and socio-cultural relations now require the revisiting of the issues of diversity and diversity management from global and interdisciplinary perspectives. Existing published research on diversity management does not focus on both the global and interdisciplinary perspectives.

This book is an extension of the authors one topic of PhD research i.e. motivation theories and its application to the teaching profession. It can give readers dual benefit of theoretical knowledge of motivation and existing theories of motivation in detail. This is an attempt to put all the theories in one book. Plus an analysis of these theories has also been made relating to its application to the teaching profession in colleges in India. The comments are given based on the study of elaborate literature review of various articles and books written by eminent educationists on the state of college education. At the end of book the author has suggested her own theory in order to motivate teachers.

Markets for capital, products, and managerial talent are expanding rapidly across national borders, yet domestic laws and practices have never had greater impact on corporate structures and cross-border deals. Investors pursuing high returns and diversification, entrepreneurs seeking capital, and managers endeavoring to restructure troubled enterprises now routinely face transaction counter-parties who operate within different legal and political systems, and who rank social priorities quite differently. This dynamic tension between global markets and domestic institutions fuels the debate on corporate governance reform now raging in virtually every region of the world. It also frames the intellectual agenda of the distinguished contributors to this volume, who examine such issues as the possible convergence of corporate governance practices around the world, national variations in the quality of corporate law, and the fiduciary responsibilities corporate managers around the world owe to their shareholders. Among the book's many insights is the contention that "globalization" and "global markets" are misleading terms, because they mask the local quality of much of the activity occurring within those rubrics. Case studies focus on France, Germany, Italy, Japan, Korea, Taiwan, and the transition economies of Eastern Europe.

Simulations are widely used in the military for training personnel, analyzing proposed equipment, and rehearsing missions, and these simulations need realistic models of human behavior. This book draws together a wide variety of theoretical and applied research in human behavior modeling that can be considered for use in those simulations. It covers behavior at the individual, unit, and command level. At the individual soldier level, the topics covered include attention, learning, memory, decisionmaking, perception, situation awareness, and planning. At the unit level, the focus is on command and control. The book provides short-, medium-, and long-term goals for research and development of more realistic models of human behavior.
