Working on the Dark
Side of the Moon

National Academies
Press

Bamford, bestselling author of *The Puzzle Palace*, has written another fascinating, unrestricted, and controversial look into the secretive, powerful, and massive National Security Agency. A major work of history and investigative journalism, *Body of Secrets* is a riveting analysis of this powerful agency's history and its future.

BODY OF SECRETS

Simon and Schuster
The former Director of National Intelligence speaks out in this New York Times bestseller. When he stepped down in January 2017 as the fourth United States Director of National

Intelligence, James Clapper had been President Obama's senior intelligence advisor for six and a half years, longer than his three predecessors combined. He led the US Intelligence Community through a period that included the raid on Osama bin Laden, the Benghazi attack, the leaks of Edward Snowden, and Russia's influence operation on the 2016 U.S. election. In *Facts and Fears*, Clapper traces his career through the growing threat of cyberattacks, his relationships with Presidents and Congress, and the truth about Russia's role in the presidential election. He describes, in the wake of Snowden and WikiLeaks, his efforts to make intelligence

more transparent and to push back against the suspicion that Americans' private lives are subject to surveillance. Finally, it was living through Russian interference in the 2016 presidential election and seeing how the foundations of American democracy were--and continue to be--undermined by a foreign power that led him to break with his instincts grown through more than five decades in the intelligence profession, to share his inside experience. Clapper considers such controversial questions as, is intelligence ethical? Is it moral to intercept communications or to photograph closed societies from orbit? What are the limits of what we should be

allowed to do? What protections should we give to the private citizens of the world, not to mention our fellow Americans? Is there a time that intelligence officers can lose credibility as unbiased reporters of hard truths by asserting themselves into policy decisions? Facts and Fears offers a privileged look inside the United States intelligence community and addresses with the frankness and professionalism for which James Clapper is known some of the most difficult challenges in our nation's history. *The Warmth of Other Suns* Walden Pond Press
Follows four young dreamers and outcasts through time and space, from 1453

Constantinople to the future, as they discover resourcefulness and hope amidst peril.

The Cricket in Your Car
Bantam

The NSA is the largest, most secretive and most powerful intelligence agency in the world. With a staff of 38,000 people, it dwarfs the CIA in budget, manpower and influence. Recent headlines have linked it to economic espionage throughout Europe and to the ongoing hunt for the terrorist leader Osama bin Laden. James Bamford first penetrated the wall of silence surrounding the NSA in 1982, with the much-talked-about US bestseller *THE PUZZLE PALACE*. In *BODY OF SECRETS* he offers shocking new details

about the inner workings of the agency, gathered through unique access to thousands of internal documents and interviews with current and former officials. Unveiling extremely sensitive information for the first time, Bamford exposes the role the NSA played in numerous Soviet bloc Cold War conflicts and discusses its undercover involvement in the Vietnam War. His investigation into the NSA's technological advances during the last 15 years brings to light a network of global surveillance ranging from on-line listening posts to sophisticated intelligence-gathering satellites. In a hard-hitting conclusion, he warns the NSA is a

double-edged sword: while its worldwide eavesdropping activities offer the potential for tracking down terrorists and uncovering nuclear weapons deals, it also has the capacity to listen in on global personal communications.

A Glorious Accident
Anchor

A blend of Jared Diamond's *Guns, Germs, and Steel* and Simon Winchester's *Pacific*, a thrilling intellectual detective story that looks deep into the past to uncover who first settled the islands of the remote Pacific, where they came from, how they got there, and how we know. For more than a millennium, Polynesians have occupied the remotest

islands in the Pacific Ocean, a vast triangle stretching from Hawaii to New Zealand to Easter Island. Until the arrival of European explorers they were the only people to have ever lived there. Both the most closely related and the most widely dispersed people in the world before the era of mass migration, Polynesians can trace their roots to a group of epic voyagers who ventured out into the unknown in one of the greatest adventures in human history. How did the earliest Polynesians find and colonize these far-flung islands? How did a people without writing or metal tools conquer the largest ocean in the world? This conundrum, which came to be known as the Problem of

Polynesian Origins, emerged in the eighteenth century as one of the great geographical mysteries of mankind. For Christina Thompson, this mystery is personal: her Maori husband and their sons descend directly from these ancient navigators. In *Sea People*, Thompson explores the fascinating story of these ancestors, as well as those of the many sailors, linguists, archaeologists, folklorists, biologists, and geographers who have puzzled over this history for three hundred years. A masterful mix of history, geography, anthropology, and the science of navigation, *Sea People* combines the thrill of exploration with the drama of

discovery in a vivid tour of one of the most captivating regions in the world. *Sea People* includes an 8-page photo insert, illustrations throughout, and 2 endpaper maps.

The Heart of War

Berkley

LONGLISTED for the NATIONAL BOOK AWARD A “blistering yet tender” (Publishers Weekly) memoir that chronicles one chef’s journey from foraging on her family’s Midwestern farm to running her own Michelin-starred restaurant and finding her place in the world. Iliana Regan grew up the youngest of four headstrong girls on a small farm in Indiana. While gathering raspberries as a toddler, Regan learned to only pick the ripe

fruit. In the nearby fields, the orange flutes of chanterelle mushrooms beckoned her while they eluded others. Regan's profound connection with food and the earth began in childhood, but connecting with people was more difficult. She grew up gay in an intolerant community, was an alcoholic before she turned twenty, and struggled to find her voice as a woman working in an industry dominated by men. But food helped her navigate the world around her—learning to cook in her childhood home, getting her first restaurant job at age fifteen, teaching herself cutting-edge cuisine while hosting an underground supper club, and working her way from front-of-

house staff to running her own kitchen. Regan's culinary talent is based on instinct, memory, and an almost otherworldly connection to ingredients, and her writing comes from the same place. Raw, filled with startling imagery and told with uncommon emotional power, *Burn the Place* takes us from Regan's childhood farmhouse kitchen to the country's most elite restaurants in a galvanizing tale that is entirely original, and unforgettable. *The GCHQ Puzzle Book* Random House
A Pretext for War reveals the systematic weaknesses behind the failure to detect or prevent the 9/11 attacks, and details the Bush administration's subsequent misuse of

intelligence to sell preemptive war to the American people. Filled with unprecedented revelations, from the sites of “undisclosed locations” to the actual sources of America’s Middle East policy, *A Pretext for War* is essential reading for anyone concerned about the security of the United States.

Acclaimed author James Bamford—whose classic book *The Puzzle Palace* first revealed the existence of the National Security Agency—draws on his unparalleled access to top intelligence sources to produce a devastating expose of the intelligence community and the Bush administration.

Body of Secrets

ibooks

Presents a history of the agency, from its

inception in 1945, to its role in the Cold War, to its controversial advisory position at the time of the Bush administration's search for weapons of mass destruction in Iraq, shortly before the invasion of 2003.

Code Warriors Scribner

Today?s National Security Agency is the largest, most costly, and most

technologically advanced spy organization the world has ever known. It is also the most intrusive, secretly filtering millions of phone calls and e-mails an hour in the United States and around the world. Half a million people live on its watch list, and the number grows by the thousands every month. Has America become a surveillance state? In *The Shadow*

Factory, James Bamford, the foremost expert on the National Security Agency, charts its transformation since 9/11, as the legendary code breakers turned their ears away from outside enemies, such as the Soviet Union, and inward to enemies whose communications increasingly crisscross America. Fast-paced and riveting, *The Shadow Factory* is about a world unseen by Americans without the highest security clearances. But it is a world in which even their most intimate whispers may no longer be private.

Facts and Fears

HarperCollins
Writing for Harper's and the New Yorker over the last decade, David Samuels has penned a disillusioned

love song to the often amusing and sometimes fatal American habit of self-delusion, reporting from a landscape peopled by salesmen, dreamers, radical environmentalists, suburban hip-hop stars, demolition experts, aging baseball legends, billionaire crackpots, and dog track bettors whose heartbreaking failures and occasional successes are illuminated by flashes of anger and humor. Including profiles of Pacific Northwest radicals and Nevada nuclear test site workers alongside coverage of Pentagon press conferences and the Super Bowl in Detroit, *Only Love Can Break Your Heart* proves Samuels to be a wonderful inheritor of

the great journalistic tradition established by Gay Talese, Tom Wolfe, and Joan Didion in the 1960s. This first collection of his painstakingly reported and wildly inventive writing reveals the full spectrum of his talents, as well as an unusual sensitivity to both the tragic and comic dissonances bubbling up from the gap between the American promise of endless nirvana and the lives of ordinary citizens who struggle to live out their dreams.

The Puzzle Palace

Post Hill Press
A Pretext for War reveals the systematic weaknesses behind the failure to detect or prevent the 9/11 attacks, and details the Bush administration's subsequent misuse of intelligence to sell

preemptive war to the American people. Filled with unprecedented revelations, from the sites of "undisclosed locations" to the actual sources of America's Middle East policy, A Pretext for War is essential reading for anyone concerned about the security of the United States. Acclaimed author James Bamford-whose classic book The Puzzle Palace first revealed the existence of the National Security Agency-draws on his unparalleled access to top intelligence sources to produce a devastating expose of the intelligence community and the Bush administration. The Puzzle Palace Anchor Before the Internet became widely known as a global tool for

terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The

hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

Cloud Cuckoo Land (Large Print Edition)
Penguin
The National Security Agency is the world's most powerful, most far-reaching espionage. Now with a new afterword describing the security

lapses that preceded the attacks of September 11, 2001, *Body of Secrets* takes us to the inner sanctum of America's spy world. In the follow-up to his bestselling *Puzzle Palace*, James Bamford reveals the NSA's hidden role in the most volatile world events of the past, and its desperate scramble to meet the frightening challenges of today and tomorrow. Here is a scrupulously documented account—much of which is based on unprecedented access to previously undisclosed documents—of the agency's tireless hunt for intelligence on enemies and allies alike. *Body of secrets* is a riveting analysis of this most clandestine

of agencies, a major work of history and investigative journalism. A New York Times Notable Book

THE PUZZLE PALACE

Crown
James Bamford, the bestselling author of *The Puzzle Palace* and *Body of Secrets*, unveils a hidden cabal of foreign powers that have spied against America to reveal the incredible spygames, secrets, and cyberweapons they've hatched, unlocked, and stolen--and how U.S. intelligence has utterly failed to stop them. *SPYFAIL* is about the highly dangerous and growing capability of foreign countries to conduct large-scale espionage within the United States and how the FBI and other agencies have failed to

prevent it. These covert operations involve a variety of foreign countries—North Korea, Russia, Israel, China, and others—and include cyberattacks, espionage, psychological warfare, the infiltration of presidential campaigns, the smuggling of nuclear weapons components, and other incredibly nefarious actions. With his trademark deep investigative style, James Bamford digs as deep as one can go into these clandestine invasions and attacks, uncovering who's involved, how these spygames were carried out, and why none of this was stopped. Full of revelations, SPYFAIL includes access to previously secret and withheld documents,

such as never-before-seen parts of the Mueller Report, and interviews with confidential sources. Throughout this stunning, eye-opening account, SPYFAIL demonstrates again and again how large a role politics, special interests, and corruption play in allowing these shocking foreign intrusions to continue—leaving America and its secrets vulnerable and undefended.

A comprehensive two-volume overview and analysis of all facets of espionage in the American historical experience, focusing on key individuals and

technologies. In two volumes, *Spies, Wiretaps, and Secret Operation: An Encyclopedia of American Espionage* ranges across history to provide a comprehensive, thoroughly up-to-date introduction to spying in the United States—why it is done, who does it (both for and against the United States), how it is done, and what its ultimate impact has been. The encyclopedia includes hundreds of entries in chronologically organized sections that cover espionage by and within the United States from colonial times to the 21st century. Entries cover key individuals, technologies, and events in the history of American espionage. Volume two offers

overviews of important agencies in the American intelligence community and intelligence organizations in other nations (both allies and adversaries), plus details of spy trade techniques, and a concluding section on the portrayal of espionage in literature and film. The result is a cornerstone resource that moves beyond the Cold War-centric focus of other works on the subject to offer an authoritative contemporary look at American espionage efforts past and present.

Spyfail Twelve
A "survival guide" for the new Dept. of Defense insider and for the curious civilian. Examines the realities and myths associated with the Pentagon (for

example, the author points out that not everyone in Pentagon is so busy that there is no time to plan), truisms, difficult bosses, and rivalry and competition. Paper edition (unseen) \$15.95. Annotation copyrighted by Book News, Inc., Portland, OR
A Pretext for War
Doubleday
James Bamford has been the preeminent expert on the National Security Agency since his reporting revealed the agency's existence in the 1980s. Now Bamford describes the transformation of the NSA since 9/11, as the agency increasingly turns its high-tech ears on the American public. The Shadow Factory reconstructs how the NSA missed a chance to thwart the

9/11 hijackers and details how this mistake has led to a heightening of domestic surveillance. In disturbing detail, Bamford describes exactly how every American's data is being mined and what is being done with it. Any reader who thinks America's liberties are being protected by Congress will be shocked and appalled at what is revealed here.

THE WORLD BOOK ENCYCLOPEDIA

Bloomsbury Publishing
USA

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health

status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape

lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.
