Stem-cell research. Cloning. Genetic engineering. Today, discoveries in biotechnology are occurring so rapidly that we can barely begin to address one ethical debate before another looms overhead. This brave new world we've entered is a daunting one as well, with disturbing implications for the sanctity of life and for human nature itself. How should we respond as Christians? Drawing on an abundance of cutting-edge information and life experience, Joni Eareckson Tada and Nigel M. de S. Cameron help you think through issues no Christian can afford to ignore. As a quadriplegic who has spent three decades advocating for the disability community out of a wheelchair, Joni offers the insights of a woman intimately acquainted with suffering and struggle. Dr. Cameron shares from his vast knowledge as one of today's foremost bioethicists. Together, they offer deeply informed perspectives on such pressing issues as: Human cloning Designer babies Redefining human nature Human harvesting Here is thoughtful, passionate, and gripping reading about the world that is coming--that, indeed, is already here--and how to live out your faith with conviction in its midst.

A wild ride from one of the twentieth century's most brilliant—and neglected—science fiction and horror writers, whom Stephen King called “the best writer of science fiction that England has ever produced.” What if the defeated Nazis had a plan to clone their master race and cause nuclear war? Johnny Farthing is your average photojournalist until his fiancée goes missing and women who look suspiciously, uncannily similar to her start turning up dead. As Johnny descends a rabbit hole of doppelgängers, mysterious American senators, and eerie

bureaucracies, it becomes clear that these peculiar similarities are part of far bigger and deadlier plans—and that the fate of the world just might be at stake.

Aldous Huxley's 1932 book *Brave New World* foresees a world in which technological advances have obliterated morality and freedom. John Feinberg and Paul Feinberg, in the first edition of *Ethics for a Brave New World*, noted how Huxley landed frighteningly close to the truth. Their book responded to ethical crises such as abortion, euthanasia, capital punishment, and genetic engineering by looking to Scripture for principles to guide us through the moral quagmires of our time. Now dramatically updated and expanded, this edition of *Ethics for a Brave New World* seeks to maintain the relevance, rigorous scholarship, and biblical faithfulness of the first edition. While many of the topics covered in the book remain the same, John Feinberg has revised each chapter to keep it current with contemporary trends and to respond to the most recent scholarship. There is a new chapter on stem cell research and greatly expanded material on issues such as homosexuality and genetic engineering. This important resource will be a valuable guide for students and those seeking answers to ethical dilemmas.

Part of the premise of the online discussion transcribed in this book is how Gerry Anderson's television series 'Space: 1999' can be understood in relation to Stanley Kubrick's '2001: A Space Odyssey' by looking at both narratives through the perspective of systems theory. As a result of doing so, an engaged debate

concerned with the political and philosophical subtext of both stories developed. This book gives a full account of the debate with summaries of ideas and insights. The book has been developed on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com.

Aldous Huxley's prophetic novel of ideas warned of a terrible future then 600 years away. Though *Brave New World* was published less than a century ago in 1932, many elements of the novel's dystopic future now seem an eerily familiar part of life in the 21st century. These essays analyze the influence of *Brave New World* as a literary and philosophical document and describe how Huxley forecast the problems of late capitalism. Topics include the anti-utopian ideals represented by the rigid caste system depicted, the novel's influence on the philosophy of "culture industry" philosophers Max Horkheimer and Theodor Adorno, the Nietzschean birth of tragedy in the novel's penultimate scene, and the relationship of the novel to other dystopian works.

Aldous Huxley's dystopian classic about a perfectly engineered society, and his book of essays reflecting on it almost three decades later, in one volume. This book includes: *Brave New World*: Half a millennium from now, no matter what class of human you are bred to be—from the intellectual Alphas to the Epsilons who provide manual labor—you are a part of the efficient, well-oiled whole, nourished, secure, and blissfully serene thanks to the freely distributed drug soma. But when a man and woman journey beyond the confines of their ordered life to where the “savages” reside, and bring back two outsiders, the cracks begin to show...Named as one of the 100 best English-language novels of the twentieth century by the Modern Library, *Brave New World* is one of the first truly dystopian novels, a remarkable depiction of the conflict between progress and the human spirit as relevant, if not more so, today than when it was written. *Brave New World Revisited*: Nearly thirty years after the publication of his groundbreaking novel, Huxley composed this collection of essays comparing the “future” of 1958 with his vision of it from the early 1930s. Touching on subjects as diverse as world population, drugs, subliminal suggestion, and totalitarianism, it provides a fascinating look at ideas of early science fiction in the context of the real world. “Aldous Huxley is the greatest twentieth-century writer in English.” —Chicago

Tribune “A genius. . . . a writer who spent his life decrying the onward march of the Machine.” —The New Yorker

Wandering into Brave New World explores the historical contexts and contemporary sources of Aldous Huxley's 1932 novel which, seventy years after its initial publication remains the best known and most discussed dystopian work of the twentieth century. This new study addresses a number of questions which still remain open. Did his round-the-world trip in 1925-1926 provide material for the novel? Did India's caste system contribute to the novel's human levels? Is there an overarching pattern to the names of the novel/s characters? Has the role of Hollywood in the novel been underestimated? Is Lenina Crown a representative 1920s "flapper"? Did Huxley have knowledge of and sources for his Indian reservation characters and scenes quite independent of and more accurate than those of D. H. Lawrence's writings? Did Huxley's visit to Borneo contribute anything to the novel? New research allows substantive answers and even explains why Huxley linked such figures as Henry Ford and Sigmund Freud. It also shows how the novel overcomes its intense grounding in 1920s political turmoil to escape into the timelessness of dystopian fiction.

Brave New World by Aldous Huxley (Book Analysis) Harper Collins Essay from the year 2000 in the subject English Language and Literature Studies - Literature, grade: A, University of Kent, course: Truth in Fiction, language: English, abstract: Of all questions that Aldous Huxley's 'Brave New World' (BNW) raises, I have chosen to analyse the role of memories and past within the

society described. This will lead to the questions of what the qualities of adulthood really are, and why the character of Bernard Marx doesn't feel like an adult. These themes are most present in chapter 6, but to present the whole topic, I will also quote from other chapters. First of all, I will need to quickly introduce to you the perception of character and individuality in BNW. One quote summarises it all: "Characters remain constant throughout a whole lifetime", (p.80, ll. 1,2). But how is this character achieved in the first place, if there's no development? – Only through conditioning! The character is made! It's artificial, yet we cannot deny that it's there. Therefore the question should rather be: Can a character that doesn't evolve be real? Aren't development or simply change it's most important aspects? We would immediately know, what to answer, but to the inhabitants of Brave New World, even the question must seem ridiculous, because they do not celebrate individuality. Even the Alphas only have a limited amount of free will and they do not differ much from each other, neither in appearance, nor in personality. This is because their aims are all alike. As the examples of Bernard and Helmholtz show (who are both considered exceptional individuals), individuality is a mere nuisance to those living in

BNW. This may be due to the fact that character has no influence on life whatsoever career and social activities are imposed on them and there is no room for choice according to one's likings. Also, to others, character doesn't matter, only the ability to consume happiness is of importance. The individualist part of the human nature is completely denied as the following quote shows: "[...] for doing things in private. Which meant, in practice, not doing things at all.", (p.116, ll.5f).
