This review of investment
policy in Tanzania
evaluates the current
policy situation and
makes recommendations
for enabling Tanzania to
attract higher investment
to exploit its full potential
and become a regional
trade and investment
hub.

*Success Stories from a
Dynamic Continent*
Africa's Progress in
Regional and Global
Economic Integration -
Towards Transformative
Regional Integration
The Agricultural Sector
Review aims to provide an
up-to-date picture of the
current socio-economic
situation of the
agricultural sector in
Lebanon and to identify
key challenges and
evidence-based strategies
for policy-making. The

first part provides a
detailed overview of
Lebanon's agricultural and
food systems, including a
section focused on the
governance the overall
policy framework and the
specific policies currently
governing the sector. The
second part of this study
consists of an
identification of the
challenges and issues that
are currently affecting
and constraining the
development of the
Lebanese agricultural
sector to its full potential.
Once identified these
challenges, the study
proposes several potential
strategies and
recommendations that
could be applied at the
policy-making level to
drive the improvement of
the sector. Finally, we
provide a discussion
towards a renewed
national agricultural
strategy; in which we
reviewed some lessons
learned from previous
success stories in the
agricultural sector in
Lebanon and compile the
strengths, weaknesses,
opportunities and threats
of the agricultural sector.

Food, fuel and fields Univ
of California Press

In recognition of the well-
understood challenges
with promoting rural and
agricultural finance, the
need for a more systemic
approach to promoting
financial inclusion is
gaining traction in the
thinking and
programming approaches
of the community of
practice. Within this
system-level view, the
concept of de-risking the
overall operating
environment of
agricultural value chains
is recognized as a
critically important factor.
Accordingly, numerous
project-based and stand-
alone "de-risking"
arrangements have
recently been launched or
are at various stages of
design throughout sub-
Saharan Africa. The
generation of evidence of
performance, impact and
cost effectiveness is
critical to validating the
relevance of these types
of schemes, as well as to
informing design
improvement and
implementation, for the
sake of scalability and

replicability. This study takes stock of these experiences in an effort to contribute to building up the evidence base to help inform the future strategy and design of similar programmatic interventions.

TECHNICAL EFFICIENCY OF SESAME PRODUCTION

Springer Nature
When It Rains, It Pours is the third publication from Proximity Designs, a Yangon-based social business and one of Myanmar's largest providers of agricultural products and services. The book provides a panoramic view of the sesame ecosystem in Myanmar, with a deep dive from the perspective of small farmers, and offers tangible opportunities to address the challenges they face. Known as the forgotten crop for its tendency to be overshadowed by the more established paddy, sesame is grown in Myanmar's Central Dry Zone by an estimated 500,000 farmers. Myanmar is also one of the top exporters of sesame in the world, with even greater export potential, but many factors threaten the

livelihood of sesame farmers, such as climate change, labor shortages and pests and diseases. The publication is the output of eight weeks of intensive research conducted in Myanmar's main sesame growing areas by a team of ten design researchers, seven from Proximity's own team and three from world-renowned design firm Studio D Radiodurans. Using a design research approach, the team sought to deliver a deep, human understanding of the problems sesame farmers face and opportunities to overcome them.

ANNUAL REPORT

Routledge
Very often, efforts to improve value chains miss out half of the population -- the female half. It is men who sell the products and who keep the money from those sales. The women, who do much of the work but are not recognised for it, often have to work even harder to meet ever-increasing quality requirements. But they see few of the benefits. How to change this? This book explains how development organisations and private entrepreneurs have found ways to improve the

position of women in value chains especially small-scale women farmers and primary processors. It outlines five broad strategies for doing this: (1) working with women on typical "women's products" such as shea, poultry and dairy, (2) opening up opportunities for women to work on what are traditionally "mens commodities" or in mens domains, (3) supporting women and men in organising for change by building capacity, organisation, sensitisation and access to finance, (4) using standards and certification to promote gender equity, and (5) promoting gender-responsible business. The book draws on dozens of cases from all over the world, covering a wide range of crops and livestock products. These include traditional subsistence products (such as rice), small-scale cash items (honey, vegetables) as well as export commodities (artichokes, coffee) and biofuels (jatropha). The book includes a range of tools and methodologies for analysing and developing value chains with gender in mind. By bringing together the two fields of gender and value

chains, this book offers a set of compelling arguments for addressing gender in value chain development. It proposes an analytical framework that builds on both fields. It outlines five strategies for development organisations and enterprises to ensure that women can participate in value chains as full partners and decision-makers. The overall result is to improve value chain performance, with both women and men able to enjoy the benefits.

This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific

mechanization measures to allow crops to be established with minimum soil disturbance, to allow the soil to be protected under organic cover for as long as possible, and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.

Field Institute

Academic Paper from the year 2019 in the subject Agrarian Studies, grade: Good, Bahir Dar University (College of Agriculture and Environmental Science), course: Agricultural economics, language: English, abstract: This study was aimed at analyzing value chain of Groundnut in Pawi Woreda, Metekel Zone, Beni-shangul Gumuz Region with specific objectives of identifying groundnut value chain and examining the performance of actors in the chain; analyzing the determinants of groundnut supply to the market in the study area; and identifying and map marketing channels. The

data were collected from both primary and secondary sources. The primary data for this study were collected from 155 farmers, 30 traders and 25 consumers through using questionnaires.

Descriptive statistics and Econometrics models were used to analyze the collected data. Results show that the main groundnut value chain actors in the study area groundnut producers/farmer, input suppliers, local assembler, wholesalers, retailers, Processers and consumers. It is also found out that groundnut passes through several intermediaries with little value being added before reaching the end users. The chain is governed by wholesalers and Processers who have capital advantage over the other chain actors. Therefore, farmers are forced to capture a lower share of profit margin. The result of OLS regression model indicated that marketable supply is significantly affected by sex of household head, age of household head, agricultural extension service, owner ship of transport facility, distance of the nearest market and

quantity of groundnut produced. Therefore, policy aiming at increasing farmers' access to modern inputs, developing and improving infrastructure, gender consideration, and improving extension system are recommended to accelerate the chain's development.

MECHANIZATION FOR RURAL DEVELOPMENT

OECD Publishing Master's Thesis from the year 2016 in the subject Business economics - Supply, Production, Logistics, , course: Agricultural Economics, language: English, abstract: This study aimed to analyze the technical efficiency of sesame production in Humera area and to identify major factors that cause efficiency differentials of smallholder farmers. The objective of the study is to measure the technical efficiency of small holder farmers in sesame production. The study was conducted using a cross sectional data collected in 2015/2016-production year from a total sample of 110 households. Cobb-Douglas function was employed to estimate technical efficiency of smallholder farmers in sesame production. The

finding of the study indicated that there is inefficiency in the production of sesame in the study area. The estimation of the frontier model with inefficiency variables shows that the mean technical efficiency of farmers is 0.69 (69%). This implies that production of sesame can be increased by 31 percent given the existing technological level. This indicates that the farmers did not using production inputs efficiently in such a way that they give their maximum potential. The estimated stochastic production frontier model together with the inefficiency parameters suggests that any attempt to strengthen technical efficiency of smallholder farmers in the study area must give due attention to the improvement of the principal causes for efficiency differentials such as education, age, extension contact, credit availability, off farm activities and proximity, which were found to be significant determinants of efficiency level. The negative coefficient of educational status, age, credit availability, extension contact and off farm activities means these factors are important in determining

the existing efficiency of farmers positively and significantly. While the positive coefficients of proximity indicate that the increments in these factors increase inefficiency. Given the limited resources in the study area will enable the concerned parties engaged in efforts for improvement of the product and productivity of this part of the community to bring about the desired changes in a cost effective way than trying to inject an investment on the production of sesame. *An Analysis of the Myanmar Edible Oil Crops Sub-sector* United Nations When It Rains, It Pours is the third publication from Proximity Designs, a Yangon-based social business and one of Myanmar's largest providers of agricultural products and services. The book provides a panoramic view of the sesame ecosystem in Myanmar, with a deep dive from the perspective of small farmers, and offers tangible opportunities to address the challenges they face. Known as the forgotten crop for its tendency to be overshadowed by the more established paddy, sesame is grown in

Myanmar's Central Dry Zone by an estimated 500,000 farmers. Myanmar is also one of the top exporters of sesame in the world, with even greater export potential, but many factors threaten the livelihood of sesame farmers, such as climate change, labor shortages and pests and diseases. OECD Development Pathways Multi-dimensional Review of Myanmar Volume 2. In-depth Analysis and Recommendations CTA

Gain a clear understanding of the fundamental concepts and applications behind today's operations and supply chain management with the reader-friendly approach in Collier/Evans'

popular OPERATIONS AND SUPPLY CHAIN MANAGEMENT, 2E. The authors present detailed, solved problems throughout this edition to illustrate key formulas and computations as you learn to complete both manual and digital calculations using Excel spreadsheet templates and other Excel models for optimization and simulation. New content examines process analysis and resource utilization, analytics in OM, capacity measurement, applications of linear optimization and other critical operations management (OM) and supply chain management (SCM) topics. In addition, new and proven review questions, experiential activities, problems and exercises as well as feature boxes teach you how to work with the latest OM and SCM concepts and tools.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Volume 2. In-depth Analysis and Recommendations Food and Agriculture Organization

* Provides a broad

overview of modeling approaches and solution methodologies for addressing inventory problems, particularly the management of high cost, low demand rate service parts found in multi-echelon settings * The text may be used in a variety of courses for first-year graduate students or senior undergraduates, or as a reference for researchers and practitioners * A background in stochastic processes and optimization is assumed

2019 Annual trends and outlook report: Gender equality in rural Africa: From commitments to outcomes John Wiley & Sons

This book is the first comprehensive compilation of deliberations on whole genome sequencing of sesame including genome assembly, annotation, structure and synteny analysis, and sequencing of its chloroplast genome and also its wild species. It presents narratives on classical genetics and breeding, tissue culture and genetic transformation, molecular mapping and breeding. Other chapters describe the beneficial components in sesame protein and oil, botanical depictions and

cytological features. Prospects of designed breeding in the post-genomics era including gene discovery have also been enumerated. Altogether, the book contains 19 chapters authored by globally reputed experts on the relevant field in this crop. This book is useful to the students, teachers, and scientists in the academia and relevant private companies interested in classical and molecular genetics, biotechnology, breeding, biochemistry, traditional and molecular breeding, and structural and evolutionary genomics. The work is also useful to seed and oil industries.

A GUIDE FOR PIANOLA PLAYERS

Intl Food Policy Res Inst
Written by award-winning chef Greg Malouf and his writing partner, this richly illustrated book offers a comprehensive collection of 170 recipes, organized alphabetically according to ingredients widely used in Middle Eastern cooking. *Analysis and Algorithms for Service Parts Supply Chains* World Bank Publications
Based on Africa's deep routed structural problems, the key aspect of a transformative

regional integration is how to promote structural transformation by adapted strategies and policies for the African regional economic communities, for the Continental Free Trade Area, and for the Tripartite Free Trade Area. Regional integration in Africa is based on a conventional (linear) model, starting with trade preference zones and moving to free trade areas, customs unions, and monetary and economic zones, with the ultimate goal to reach political unity. Specific problems of a more transformative regional integration agenda are discussed, such as: food security and agriculture; industry development, enterprise growth and competition; and economic partnership agreements with extra-regional partners. In the final section, the impact of three global value chains of importance for Africa (diamonds, shea butter, and sesame) are considered on regions, on sub-regions, and on regional integration. (Series: African Development Perspectives Yearbook, Vol. 18) [Subject: African Studies, Economics] *Accelerating Agricultural*

Transformation World Bank Publications
Survey and study background In an effort to gain some answers on the 1ST capital investment (project selection) decision criteria used in practice, a survey was undertaken in 1990 of 80 American, British, Australian and New Zealand companies. A one-page survey form was used that provided 15 possible 1ST investment criteria, a means of indicating whether they are used or not, the percentage of projects to which each criterion is applied, and an overall ranking in terms of total project value for each criterion. The criteria are shown in Table 2.1. The criteria are categorized into financial, management, and development criteria. They were developed, first, through interviews with some 20 chief information officers (CIOs) in Britain and the United States. These CIOs were questioned on what criteria their organizations use in selecting 1ST investment projects, with the aim of developing a full list of the criteria used in practice. Secondly, the criteria and the form were tested and refined in a pilot study with some 12

companies. The criteria used in the survey and listed in Table 2.1 are primary level criteria.

A Handbook for Firms Building Sustainable Supply Chains Food & Agriculture Org. Value-Chain of Biofuels: Fundamentals, Technology, and Standardization presents the fundamental aspects of biofuel production, from biomass conversion technologies and biofuels' end products to related policy regulation and standardization. Sections explore the current biofuels industry, addressing pretreatment, feedstocks, and conversion processes, review different pathways to produce biofuels, including bioethanol, biochar, biogas/bio-hydrogen, bio-oil, biodiesel, and many others, and finally, present policy regulation and standardization on biofuel production, with a focus on applications. Case studies are provided alongside reviews from academic and industry perspectives, discussing economics and lifecycle assessments (LCA) of biofuel production, as well as analyses of supply chains. Offering a comprehensive and timely overview, this book

provides an ideal reference for researchers and practitioners working in bioenergy and renewable energy, but it will also be of interest to chemists, bioengineers, chemical engineers, and the agricultural and petrochemical industries. Helps readers gain academic and industry perspectives on biofuel production with the inclusion of lab-based experimentation and informative case studies. Contains an exhaustive analysis of biomass conversion technologies for biofuels and biochemicals. Provides a clear and concise text that avoids the overuse of jargon and technical language.

Sustainable Agriculture Reviews GRIN Verlag Paraguay has achieved strong and resilient growth and made progress across a range of development outcomes since it emerged from a prolonged period of economic and political instability in the early 2000s. In 2014, the country adopted its first National Development Plan, setting course towards ...

The Pianolist GRIN Verlag While many food science programs offer courses in the microbiology and

processing of fermented foods, no recently published texts exist that fully address the subject. Food fermentation professionals and researchers also have lacked a single book that covers the latest advances in biotechnology, bioprocessing, and microbial genetics, physiology, and taxonomy. In *Microbiology and Technology of Fermented Foods*, Robert Hutkins has written the first text on food fermentation microbiology in a generation. This authoritative volume also serves as a comprehensive and contemporary reference book. A brief history and evolution of microbiology and fermented foods, an overview of microorganisms involved in food fermentations, and their physiological and metabolic properties provide a foundation for the reader. How microorganisms are used to produce fermented foods and the development of a modern starter culture industry are also described. Successive chapters are devoted to the major fermented foods produced around the world with coverage including

microbiological and technological features for manufacture of these foods: Cultured Dairy Products Cheese Meat Fermentation Fermented Vegetables Bread Fermentation Beer Fermentation Wine Fermentation Vinegar Fermentation Fermentation of Foods in the Orient Examples of industrial processes, key historical events, new discoveries in microbiology, anecdotal materials, case studies, and other key information are highlighted throughout the book. Comprehensively written in a style that encourages critical thinking, *Microbiology and Technology of Fermented Foods* will appeal to anyone dealing in food fermentation – students, professors, researchers, and industry professionals. *A Review of Patterns and Progress from Around the World* Cengage Learning This book challenges the common European notions about African migration to Europe and

offers a holistic understanding of the current situation in Africa. It advocates a need to rethink Africa-Europe relations and view migration and borders as a resource rather than sources of a crisis. Migrant movement from Africa is often misunderstood and misrepresented as invasion caused by displacement due to poverty, violent conflict and environmental stress. To control this movement and preserve national identities, the EU and its various member states resort to closing borders as a way of reinforcing their migration policies. This book aims to dismantle this stereotypical view of migration from Africa by sharing cutting-edge research from the leading scholars in Africa and Europe. It refutes the flawed narratives that position Africa as a threat to the European societies, their economies and security, and encourages a nuanced understanding of the root causes as well as the socioeconomic

factors that guide the migrants' decision-making. With chapters written in a concise style, this book brings together the migration and border studies in an innovative way to delve into the broader societal impacts of both. It also serves to de-silence the African voices in order to offer fresh insights on African migration – a discourse dominated hitherto by the European perspective. This book constitutes a valuable resource for research scholars and students of Border Studies, Migration Studies, Conflict and Security Studies, and Development Studies seeking specialisation in these areas. Written in an accessible style, it will also appeal to a more general public interested in gaining a fuller perspective on the African reality.

Yes, Africa Can Elsevier This handbook addresses the challenges that agribusiness companies face when working with smallholder suppliers in their value chain.
