SIMONE REILLY

A Manual for Midwives Marshall Cavendish
International Asia Pte Ltd

This book presents up-to-date information on a total of 75 native and non-native medicinal plants growing in Singapore. Comprehensive and useful information from the published literature — including plant descriptions and origins, traditional medicinal uses, phytoconstituents, pharmacological activities, adverse

reactions, toxicities, and reported drug-herb interactions — is presented in an easy-to-read manner for easy and quick reference. There is no minimum level of knowledge required to read this book, and botanical and medical glossaries are also provided for readers' convenience. The book will be of great practical benefit to a wide-ranging audience. Educators and students in complementary medicine and health, pharmacognosy, medicinal chemistry, natural products, pharmacology, toxicology, pharmacovigilance, medicine, pharmacy, nursing, botany, biology, chemistry and

life sciences will find the information useful. The book will also appeal to clinicians, pharmacists, nurses and researchers, as it contains a comprehensive reference list at the end for further reading.

The History of Anaesthesia Cambridge
University Press

Wherever you study or practise obstetrics and gynaecology, a sound knowledge of the clinical aspects will underpin your understanding of the specialty and maximise your ability to make a difference to the care of women and babies. A perfect companion to Kumar and Clark's

Clinical Medicine, this new edition continues to provide an excellent grounding and framework for handling clinical problems in obstetrics and gynaecology. Highly illustrated with clear, full-colour line drawings and colour photos. Summary boxes and tables throughout. Key-points boxes at the end of each chapter. The latest information for statistics and genetics. Forward-looking approach to obstetrics and gynaecology. History and ethics boxes throughout. Organized into three sections: Fundamentals, Gynaecology, and Pregnancy and the puerperium. New section on sexual and reproductive health. New chapter on surgery to aligned with the RCOG undergrad curriculum. Anaesthesia chapter totally reworked. Increased coverage of ectopic pregnancy and miscarriage. Fully revised and updated throughout.

Home-based Maternal Records Springer Science & Business Media

An Overview of TCI and TIVA was written by two pioneers in the field of targeted drug delivery in anesthesia. Despite its small size, this book is a rich source of information on the structure, function, and

clinical applications of target-controlled infusion (TCI) systems. [...] The text has the appearance of class notes rather than a formal manual; however, this feature enhances the tutorial dynamics of the book and should attract individuals involved in learning such as anesthesia residents and specialists flirting with total intravenous anesthesia (TIVA).¹ - David O. Warner, editor of *Anesthesiology*.

AUTHORS: Anthony Absolom is Professor of Anaesthesia at the University of Groningen. Michel Struys is Professor on Anaesthesia at Ghent University and the Universal Medical Center Groningen and Director at the British Journal of Anaesthesia. 27 b/w images

Guidelines for Perinatal Care Elsevier Health Sciences

This publication presents a detailed review and assessment of the governance, infrastructure, and financing aspects of hospital care in Pakistan's Khyber Pakhtunkhwa Province. Fast demographic growth, poor access to and utilization of health services, an underfunded public health system, and fragmented reform initiatives are among the key challenges in the province. The Government of Khyber

Pakhtunkhwa commissioned the Asian Development Bank to conduct the review to aid the creation of a comprehensive strategy to guide investments and projects in the health sector.

SARAWAK HANDBOOK OF MEDICAL EMERGENCIES

Routledge

Islamic counselling is a form of counselling which incorporates spirituality into the therapeutic process. Until now there has been little material available on the subject with no one agreed definition of Islamic counselling and what it involves. There has also been a rapidly growing population of Muslims in Western societies with a corresponding rise in need of psychological and counselling services. *Islamic Counselling: An Introduction to theory and practice* presents a basic understanding of Islamic counselling for counsellors and Islamic counsellors, and provides an understanding of counselling approaches congruent with Islamic beliefs and practices from a faith-based perspective. The book is designed as an introduction for counsellors, its goal is to inform the reader about how the diverse

roles of the Islamic counsellor fit together in a comprehensive way and to provide the guidelines that can be potentially integrated into a theoretical framework for use. The book is divided into two parts. Section one: Context and Background, and Section two: Assessment, Models and Intervention Strategies. Islamic Counselling encompasses both current theory, research and an awareness of the practice implications in delivering appropriate and effective counselling interventions with Muslim clients. It will be essential reading for both professionals and students alike.

Learning from Malaysia and Sri Lanka Manual Of Obstetrics (2Nd Edition)

The Health Systems in Transition (HiT) profiles are country-based reports that provide a detailed description of a health system and of reform and policy initiatives in progress or under development in a specific country. Each profile is produced by country experts in collaboration with an international editor. In order to facilitate comparisons between countries, the profiles are based on a common template used by the Asia Pacific and European Observatories on Health Systems and

Policies. The template provides detailed guidelines and specific questions, definitions and examples needed to compile a profile.

Health Systems in Transition World Bank Publications

Medical Eligibility Criteria for Contraceptive Use reviews the medical eligibility criteria for use of contraception, offering guidance on the safety and use of different methods for women and men with specific characteristics or known medical conditions. The recommendations are based on systematic reviews of available clinical and epidemiological research. It is a companion guideline to Selected Practice Recommendations for Contraceptive Use. Together, these documents are intended to be used by policy-makers, program managers, and the scientific community to support national programs in the preparation of service delivery guidelines. The fourth edition of this useful resource supersedes previous editions, and has been fully updated and expanded. It includes over 86 new recommendations and 165 updates to recommendations in the previous edition. Guidance for populations with special

needs is now provided, and a new annex details evidence on drug interactions from concomitant use of antiretroviral therapies and hormonal contraceptives. To assist users familiar with the third edition, new and updated recommendations are highlighted. Everyone involved in providing family planning services and contraception should have the fourth edition of Medical Eligibility Criteria for Contraceptive Use at hand.

THE MALTREATED CHILD

Parthenon Publishing Group
Drug Safety in Developing Countries: Achievements and Challenges provides comprehensive information on drug safety issues in developing countries. Drug safety practice in developing countries varies substantially from country to country. This can lead to a rise in adverse reactions and a lack of reporting can exasperate the situation and lead to negative medical outcomes. This book documents the history and development of drug safety systems, pharmacovigilance centers and activities in developing countries, describing their current situation and achievements of drug safety practice.

Further, using extensive case studies, the book addresses the challenges of drug safety in developing countries. Provides a single resource for educators, professionals, researchers, policymakers, organizations and other readers with comprehensive information and a guide on drug safety related issues Describes current achievements of drug safety practice in developing countries Addresses the challenges of drug safety in developing countries Provides recommendations, including practical ways to implement strategies and overcome challenges surrounding drug safety

MEDICAL DISORDERS IN PREGNANCY

Academic Press

This book offers a comprehensive and clinically practical approach to ethics in the everyday practice of obstetrics and gynecology. The topics the authors address include: contraception, abortion, selective termination of multifetal pregnancies, gynecologic cancer, in vitro fertilization, surrogacy, prenatal diagnosis, fetal therapy, cephalocentesis, prematurity, HIV infection, and court

ordered cesarean delivery. The issues involved in making decisions in many of these areas are a source of conflict, and lead to crisis between the physician and patient. One of the book's strengths is its emphasis on prevention and, if prevention fails, management, of the conflicts and crises which arise in these areas of medicine. The authors develop their preventative and management strategies on the basis of a framework for bioethics in the clinical setting. This framework is rigorously established and defended. The authors argue that four virtues -- self effacement, self sacrifice, compassion, and integrity -- generate the physician's obligation to protect and promote the patient's interest. They then identify the three types of patient's interests -- social role interests, subjective interests, and deliberative interests -- and they reinterpret the ethical principles of beneficence and respect for autonomy in terms of these. The concept of the fetus as patient, the physician's obligation to third parties, and the moral standing of fathers and family members are also addressed. The implications of their argument sets the stage for the discussions of prevention

and management in the remaining sections of the book. Ethics in Obstetrics and Gynecology is a unique addition to the literature in both biomedical ethics and obstetrics and gynecology. It demonstrates that ethics should be regarded as an essential part of obstetrics and gynecology, and that clinical practice is incomplete without it.

Obstetrics & Gynecology BoD – Books on Demand

This work is a guidebook for clinicians who are involved in treating depressive patients and also serves the research scientists who are working on the psychopharmacological mechanisms of antidepressant actions and psychopathological mechanisms underlying mood disorders. Mood disorders such as major depressive disorder (MDD), bipolar disorder (BPD) and seasonal affective disorder (SAD) are the most disabling disorders that are among the most expensive of all medical illnesses. The pathophysiology of mood disorders is very complex and involves many mechanisms like circadian rhythm disruption, sleep abnormalities, melatonin rhythm abnormalities and alterations in

melatonin receptor mechanisms, abnormalities in monoaminergic neurotransmitter mechanisms, glutamatergic release mechanisms, hippocampal neurogenesis, and abnormal immune and cytokine release mechanisms. Many antidepressants that are in clinical use today including the recently introduced novel agents like agomelatine or other antidepressants cause clinical remission by resynchronizing disrupted circadian rhythms and melatonin receptor functions, enhancing monoaminergic neurotransmission, promoting hippocampal neurogenesis, and regulating immune mechanisms. This book explains various etiological factors that are involved in the pathogenesis of mood disorders and the mechanisms of therapeutic actions of antidepressants including the recently introduced agomelatine and other antidepressants that exhibit rapid onset of action with greater efficacy and fewer side effects. .

Manual Of Obstetrics (2Nd Edition)
World Health Organization
This study provides the most comprehensive and detailed analysis

available on factors behind the decline in maternal mortality in Malaysia and Sri Lanka in the past 50 to 60 years and the magnitude of health system expenditures on maternal health. The main findings are that a modest investment in maternal health services, combined with other poverty reduction measures leads to a fairly rapid decline in the maternal mortality ratio (MMR), defined as the number of maternal deaths per 100,000 live births. The strategies of Malaysia and Sri Lanka changed over time, from an initial emphasis on expanding the provision of services, especially in underserved areas, to increasing utilization and, finally, to emphasizing the improvement of quality. Removing financial barriers to maternal care for clients was an important step in both countries. Professional midwives constitute the backbone of maternal care in Malaysia and Sri Lanka. The MMR reduction in developing countries is feasible with modest public expenditures when appropriate policies are adopted, focused wisely, and adapted incrementally in response to environmental conditions and systems capacity. An Introduction to theory and practice Hodder Wayland
Pelvic Floor Re-education encompasses a variety of techniques for increasing the strength of, and control over, the pelvic floor muscles. These techniques are now emerging as an effective and viable alternative to surgery in the treatment of urinary incontinence and related conditions. This volume presents a reasoned, scientific approach to the use of pelvic floor re-education. Starting with the latest theories on anatomy, pathophysiology and possible causes of pelvic floor damage, the text then describes the importance of pelvic floor evaluation in determining the type of treatment required. A number of re-education techniques are assessed including isolated muscle exercise, vaginal cones, biofeedback control and electrical stimulation. Recent research work is also

reviewed which allows the reader to evaluate the different modalities advocated in the management of pelvic floor dysfunction.

Guidelines for the NHS Cervical Screening Programme McGraw Hill Professional Labour Ward Manual, Second Edition provides guidelines for the application of obstetric knowledge to the labor ward environment. The practice of obstetrics is still an art and as such encompasses alternative approaches to achieve the same welcome end, the safety and wellbeing of both mother and child throughout labor and after delivery. The steps suggested for patient management and presentation concentrate on safety and simplicity. Throughout this book, it is stressed that the laboring woman and the fetus are the most important persons in the labor ward. This book clearly documents the emphasis on the atmosphere of ready redress by litigation; approach to women with individual needs; special care in the sensitive issue of induction; fetal monitoring; fluid replacement together with a clear protocol for management of fetal and maternal mishaps; and problems and hazards of

women in the labor ward of hepatitis B or human immunodeficiency virus (AIDS) infection. This edition provides a clear concise guidance for all those involved in child birth.

Soft Computing in Data Science Springer

This book constitutes the refereed proceedings of the 5th International Conference on Soft Computing in Data Science, SCDS 2019, held in Iizuka, Japan, in August 2019. The 30 revised full papers presented were carefully reviewed and selected from 75 submissions. The papers are organized in topical sections on information and customer analytics; visual data science; machine and deep learning; big data analytics; computational and artificial intelligence; social network and media analytics.

Annals of the Academy of Medicine, Singapore Oxford University Press, USA Protecting the reproductive potential of young patients undergoing cancer therapy is increasingly important. With modern treatment protocols, 80% of patients can be expected to survive. It has been estimated that up to one in 250 young adults will be a survivor of childhood

cancer in the future; infertility, however, may be a consequence. As a wide range of fertility preservation methods are increasingly offered by clinicians, this systematic and comprehensive textbook dealing with the cryobiology, technology and clinical approach to this therapy will be essential reading to infertility specialists, embryologists, oncologists, cryobiologists, ObGyns, andrologists, and urologists with an interest in fertility preservation. Fertility Cryopreservation reviews all the techniques of this increasingly important field within reproductive medicine. It covers the basic principles of pertinent cryobiology, and contains major sections on the different therapies available, written by international specialists combining experience from both academic centers and commercial industries.

Proceedings of IAC in Vienna 2018 CRC Press

This book collects the contributions of a number of clinical psychiatrists all over the world, interested in developing basic research about anxiety and in applying it in clinical contexts. It is divided into four sections, covering general issues about

anxiety (ethological and developmental ones), basic research issues on specific aspects of anxiety (bioanatomical ones, correlation with personality structure and so on), and new clinical and therapeutical proposals and hypothesis. Each author summarized the clinical importance of his work, underlining the clinical pitfalls of this publication.

Ethics in Obstetrics and Gynecology John Wiley & Sons

This report presents the yearly assessment of global progress towards the

Millennium Development Goals (MDGs), determining the areas where progress has been made, and those that are lagging behind. The report is based on a master set of data compiled by the Inter-Agency and Expert group on MDG indicators led by the Statistics Division of the Department of Economic and Social Affairs.
