Fokus buku ini adalah sejarah psikologi modern, yakni periode yang bermula pada abad kesembilan belas ketika psikologi mulai menjadi sebuah disiplin yang terpisah dan berdiri sendiri. Meskipun kami tidak mengabaikan adanya pemikiran-pemikiran fi losofi s tahap awal, kami berkonsentrasi pada isu-isu yang

berhubungan langsung dengan berdirinya psikologi sebagai sebuah bidang studi yang baru dan berbeda. Tujuan kami adalah untuk mempre sentasikan sebuah sejarah psikologi modern, bukan karya fi losofi s yang mendahuluinya selama berabad-abad. *The Psychology of Religion, Fourth Edition* Ideas Publishing

POWER, INTIMACY, AND THE LIFE STORY

European Alliance for Innovation
Fifteen original essays open up a novel area of inquiry: the distinctively ethical dimensions of women's experiences of and in aging. Contributors distinguished in the fields

of feminist ethics and the ethics of aging explore assumptions, experiences, practices, and public policies that affect women's well-being and dignity in later life. The book brings to the study of women's aging a reflective dimension missing from the empirical work that has predominated to date. Ethical studies of aging have so far failed to emphasize gender. And feminist ethics has neglected older women, even when emphasizing other dimensions of

'difference.' Finally work on aging in all fields has focused on the elderly, while this volume sees aging as an extended process of negotiating personal and social change.

Keseimbangan dalam hidup manusia - itulah kira-kira dalam satu kalimat ringkas yang disampaikan Indri Makki dalam buku ini. Dengan latar belakang psikologi,

secara sistematis Indri menguraikan keseimbangan kehidupan ini dengan sejumlah kasus nyata yang relevan dan terperinci. Bagi saya yang sangat menarik adalah dasar pikirannya "memperindah keindahan dunia", yang menunjukkan sifat optimisme terhadap kehidupan kita. Sikap optimistik ini penting bagi kita di Indonesia pada awal abad XXI ini, ketika negara dan bangsa kita sedang dilanda musibah berat di hampir seluruh bidang kehidupan: niat

baik, kejujuran, gotong-royong, kedermawanan, keikhlasan, kesopanan, maafan, dan akhlak mulia. Buku Harmonis Seumur Hidup ini disusun oleh psikolog Indri Makki, rekan sekantor saya di Unilever (1977-1990), merupakan kontribusi penting bagi pembaca yang merindukan keseimbangan dalam menjalani kehidupan, baik secara pribadi maupun keluarga. Selamat Indri, untuk buku anda yang relevan ini. Taufiq Ismail Penyair dan Sastrawan

yang berasal dari kegiatan penelitian dan pengabdian. Beragam tema tersaji di buku ini mulai dari pendidikan, ekonomi, dakwah, politik, gender hingga tafsir. Keberagaman tema dapat dibaca sebagai kekuatan buku ini. beberapa esai juga mengangkat tema-tema aktual, seperti tentang efek pandemi, fenomena komunitas hijrah dan moderasi beragama di perguruan tinggi.

Sport - Sportpsychologie,
Note: 2,5, , Sprache:
Deutsch, Abstract: Diese
Arbeit beschäftigt sich mit
dem Bereich
Sportpsychologie und
insbesondere mit dem
Thema Fit werden. Doch
nicht mit Sportgeräten in
Fitnessstudios oder
Zuhause, sondern in
Träumen. Klingt am
Anfang unverständlich
und unglaubwürdig. Das
Thema der
Traumforschung ist
allgemein bekannt und
auch beliebt -
insbesondere der Bereich
"Luzide Träume". Hier ist

besonders interessant, dass es sehr viele verschiedene Varianten von Träumen gibt, zweitens jeder Traum eine Bedeutung hat und zuletzt ist es ein Bereich, welcher noch lange nicht zu Ende erforscht ist. Der Anstoß für diese Arbeit kam von dem Artikel "Training im Schlaf ist so effektiv wie richtiges Training". Hier stellten sich die Fragen: "Wie soll das funktionieren?", "Kann man nur durch Schlaf seine Muskeln aufbauen?", "Ist es dann noch notwendig, im Wachzustand Sport zu

treiben?". Aus diesen Fragen entsprang die Leitfrage für diese Arbeit: "Kann man durch luzide Träume fit werden?" *The Wounded Storyteller* PT Rekacipta Proxy Media This volume provides a comprehensive and contemporary depiction of the swift evolution of learning technologies and the innovations that derive from their deployment in school education. It comprises cases studies, research focused on emergent technologies and experiments with existing

tools in a wide range of scenarios. The studies included in this volume explore the conceptual and practical aspects of technologies that are used to support learning, with a multidisciplinary approach that encompasses all levels of education. The three sections of this volume emphasise the use of digital technologies from the viewpoint of different fields of expertise, explore multiple educational settings where technology was implemented to support the various

stages of the learning process, and underline strategies, tools and technologies that play a crucial role in the professional development of teachers.

Spektrum Gesundheit - Fit in den Sommer Gramedia Pustaka Utama

Updated second edition: "A bold and imaginative book which moves our thinking about narratives of illness in new directions." —Sociology of Health and Illness Since it was first published in 1995, *The Wounded Storyteller* has occupied a

unique place in the body of work on illness. A collective portrait of a so-called "remission society" of those who suffer from illness or disability, as well as a cogent analysis of their stories within a larger framework of narrative theory, Arthur W. Frank's book has reached a large and diverse readership including the ill, medical professionals, and scholars of literary theory. Drawing on the work of such authors as Oliver Sacks, Anatole Broyard, Norman Cousins, and

Audre Lorde, as well as from people he met during the years he spent among different illness groups, Frank recounts a stirring collection of illness stories, ranging from the well-known—Gilda Radner's battle with ovarian cancer—to the private testimonials of people with cancer, chronic fatigue syndrome, and disabilities. Their stories are more than accounts of personal suffering: They abound with moral choices and point to a social ethic. In this new

edition Frank adds a preface describing the personal and cultural times when the first edition was written. His new afterword extends the book's argument significantly, discussing storytelling and experience, other modes of illness narration, and a version of hope that is

both realistic and aspirational. Reflecting on his own life during the creation of the first edition and the conclusions of the book itself, he reminds us of the power of storytelling as way to understand our own suffering. "Arthur W. Frank's second edition of *The Wounded Storyteller* provides instructions for

use of this now-classic text in the study of illness narratives." —Rita Charon, author of *Narrative Medicine* "Frank sees the value of illness narratives not so much in solving clinical conundrums as in addressing the question of how to live a good life." —Christianity Today
