The standard incandescent light bulb, which still works mainly as Thomas Edison invented it, converts more than 90% of the consumed electricity into heat. Given the availability of newer lighting technologies that convert a greater percentage of electricity into useful light, there is potential to decrease the amount of energy used for lighting in both commercial and residential applications. Although technologies such as compact fluorescent lamps (CFLs) have emerged in the past few decades

and will help achieve the goal of increased energy efficiency, solid-state lighting (SSL) stands to play a large role in dramatically decreasing U.S. energy consumption for lighting. Since the publication of the 2013 National Research Council report Assessment of Advanced Solid-State Lighting, the penetration of SSL has increased dramatically, with a resulting savings in energy and costs that were foreshadowed by that study. What was not anticipated then is the dramatic dislocation and restructuring of the SSL marketplace, as cost reductions for light-emitting diode (LED) components reduced profitability for LED manufacturers. At the same time, there has been the emergence of new applications for SSL, which have the potential to create new markets and commercial opportunities for the SSL industry. Assessment of Solid-State Lighting, Phase Two discusses these aspects of change—highlighting the progress of commercialization and acceptance of SSL and reviewing the technical advances and challenges in achieving higher efficacy for LEDs and organic light-emitting diodes. This report will also discuss the recent trends in SSL manufacturing and opportunities for new applications and describe the role played by the Department of Energy (DOE) Lighting Program in the

development of SSL.

The reconstruction of ancient Mesopotamian medical, ritual and omen compendia and their complex history is still characterised by many difficulties, debates and gaps due to fragmentary or unpublished evidence. This book offers the first complete edition of the Assur Medical Catalogue, an 8th or 7th century BCE list of therapeutic texts, which forms a core witness for the serialisation of medical compendia in the 1st millennium BCE. The volume presents detailed analyses of this and several other related catalogues of omen series and rituals, constituting the corpora of divination and healing disciplines. The contributions discuss links between catalogues and textual sources, providing new insights into the development of compendia between serialization, standardization and diversity of local traditions. Though its a novel corpus-based approach, this volume revolutionizes the current understanding of Mesopotamian medical texts and the healing disciplines of "conjurer" and "physician". The research presented here allows one to identify core text corpora for these disciplines, as well as areas of exchange and borrowings between them.

It is a pleasure to present the proceedings of the 11th International Symposium on Automotive Lighting, which took place in Darmstadt on September 28-30, 2015. This conference is the document of a series of successful conferences since the first PAL-coference in 1995 and shows the latest innovative potentials of the automotive industry in the application of lighting technologies.

Plant Factory Basics, Applications, and Advances takes the reader from an overview of the need for and potential of plant factories with artificial lighting (PFALs) in enhancing food production and security to the latest advances and benefits of this agriculture environment. Edited by leading experts Toyoki Kozai, Genhua Niu, and Joseph Masabni, this book aims to provide a platform of PFAL technology and science, including ideas on its extensive business and social applications towards the next-generation PFALs. The book is presented in four parts: Introduction, Basics, Applications, and Advanced Research. Part 1 covers why PFALs are necessary for urban areas, how they can contribute to the United Nations' Sustainable Development Goals, and a definition of PFAL in relation to the term "indoor vertical farm." Part 2 presents SI units and radiometric, photometric, and photonometric

quantities, types, components, and performance of LED luminaires, hydroponics and aquaponics, and plant responses to the growing environment in PFALs. Part 3 describes the indexes and definition of various productivity aspects of PFAL, provides comparisons of the productivity of the past and the present operation of any given PFALs, and compares PFALs with one another from the productivity standpoint by applying the common indexes. Part 4 describes the advances in lighting and their effects on plant growth, breeding of indoor and outdoor crops, production of fruiting vegetables and head vegetables, and concluding with a focus on a human-centered perspective of urban agriculture. Providing real-world insights and experience, *Plant Factory Basics, Applications, and Advances* is the ideal resource for those seeking to take the next step in understanding and applying PFAL concepts. Provides the most in-depth assessment of PFAL available Compares PFAL to "indoor vertical farming and provides important insights into selecting optimal choice Presents insights to inspire design and management of the next generation of PFALs

Can China's economy overcome its excessive dependence on exports? The Chinese government and international observers argue that this is needed if growth is to be sustained in the future. But substantial growth of domestic consumption can only be achieved if China also steps beyond its reliance on cheap migrant labour. Florian Butollo approaches this issue by means of a thorough empirical investigation of the recent transformation of industries in the Pearl River Delta, China's largest industrial hub. He uncovers that industrial upgrading rarely supports improvements in the basic employment pattern in enterprises in the garment and LED lighting industry. This failure of "social upgrading" threatens to undermine the project of a rebalancing of the Chinese economy. The book shows that the implementation of collective labour rights remains an important precondition for the future of the Chinese growth model.

A comprehensive introduction to the theory and practice of lighting design *Designing With Light: The Art, Science, and Practice of Architectural Lighting Design* is a comprehensive introduction to the intelligent use of lighting to define and enhance a space. The book explores all aspects of the process, including aesthetics, technology, and practicalities, in a clear, concise manner designed to provide the reader with a full working knowledge of lighting design. Color illustrations throughout demonstrate the real-world effects of the concepts presented, and the companion website offers video animations and exercises to better illuminate the art and science of lighting. The book addresses the considerations that should be a part of any designer's process, and provides thorough guidance on meeting the various demands with smarter design. Lighting is an essential element of interior design, and despite its ubiquity, is difficult to truly master. A designer with a fundamental and conceptual understanding of light is empowered to create simple, typical spaces, or work intelligently with lighting consultants on more complex projects. *Designing With Light* contains special

discussions on color, light, and health, as well as the latest information on energy efficient lighting, control systems, and other technologies. Topics include: Physics, psychology, and perception of light Current and future lighting technology Communication, documentation, and the design process Sustainability, daylighting, and energy efficiency The book also contains an entire chapter on building and energy codes, as well as practical guidance on photometrics and calculations. Lighting can make or break an otherwise well-designed space, so designers need the background to be able to think intelligently about illumination factors during all stages of the process. With comprehensive coverage and thorough explanation, *Designing With Light* is a complete resource for students and professionals alike.

"Stage technicians or 'techies' don't read books, they seek information on the basis of the need to know." This is a practical guide to stage lighting covering equipment, lighting a performance space, special effects and lighting design. It can be read cover-to-cover, but also used as reference manual which provides easy access to the content through the use of tabulated sections and keywords. The information in each chapter is presented at three levels: - A quick start - basic information providing enough to get started - More info - more detailed knowledge - Extras! - extended technical information and data The three strands run visually throughout the guide enabling students to mix and match their own personal level of study or to fast track through to the information they need on stage. This handy, accessible guide is packed with illustrations, pictures,

diagrams, plans and technical data. In addition a DVD is included using unique video clips to illustrate the text, show the practical use of equipment, and examples of different lighting techniques and effects. The differentiated format makes it equally suitable as a quick start for school students or at an extended level for aspiring theatre technicians, teachers, amateur dramatic enthusiasts or anyone needing a quick on-the-job reference.

[11th International Symposium on Automotive Lighting - ISAL 2015 - Proceedings of the Conference](#) Springer Nature

Low-tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices. Sometimes, past technologies can be copied without any changes. More often, interesting possibilities arise when older technology is combined with new knowledge and new materials, or when past concepts and traditional knowledge are applied to modern technology. Inspiration is also to be found in the so-called "developing" world, where resource constraints often lead to inventive, low-tech solutions.
