This book is the first of
four edited volumes
designed to
reconceptualize
teaching and learning
in higher education
through a critical lens,
with this inaugural
publication focusing on
the fundamentals
behind the experience.
Chapter authors

explore recent
research on the
cognitive science
behind teaching and

Human Kinetics

This book, the

seventeenth

instalment in the 24-

volume series

Globalisation,

Comparative Education

and Policy Research,

explores the

interrelationship

between ideology, the state and human rights education reforms, setting it in a global context. The book examines major human rights education reforms and policy issues in a global culture. It focuses on the ambivalent and problematic relationship between the state, globalisation and human rights education discourses. Using a number of diverse paradigms, ranging from critical theory to historical-comparative research, the authors examine the reasons for, and the outcomes of human rights education reforms and policy. The authors discuss discourses surrounding the major dimensions affecting the human rights education, namely

national identity, democracy, and ideology. These dimensions are among the most critical and significant dimensions defining and contextualising the processes surrounding the nation-building, identity politics and human rights education globally. With this as its focus, the chapters represent hand-picked scholarly research on major discourses in the field of human rights education reforms. The book draws upon recent studies in the areas of globalisation, equality, and the role of the state in human rights education reforms. Furthermore, the perception of globalisation as dynamic and multi-faceted processes clearly necessitates a

multiple-perspective approach in the study of human rights education. This book provides that perspective commendably. It also critiques current human rights education practices and policy reforms. It illustrates the way shifts in the relationship between the state and human rights education policy. In the book, the authors, who come from diverse backgrounds and regions, attempt insightfully to provide a worldview of current developments in research concerning human rights education, and citizenship education globally. The book contributes, in a very scholarly way, to a more holistic

understanding of the nexus between nation-state, human rights education both locally and globally.

As the paradigm of education in academia continues to shift towards more diversity and inclusion, educators need to consider incorporating a “both-and” mindset when designing relevant education models in adult education. In order to attain a cross-sector collaboration among diverse stakeholders, innovative education practice settings with instructional strategies that meet the learning needs of every student need to be evaluated and implemented. Competency-Based

and Social-Situational Approaches for Facilitating Learning in Higher Education is a critical research resource that discusses project-based and social-situational instructional practices within community engagement as a method for educating adults. The approaches to designing and implementing learning activities show how to optimize community and business knowledge assets to collaboratively design and implement curricula in order to work toward social justice and community development. Divided into three sections, this publication provides extensive coverage on the design and delivery of academic programs, instructional approaches, and more,

making it an ideal resource for professionals, adult education practitioners, faculty, administrators, community activists, researchers, and academicians.

This book explores the current landscape of Initial Teacher Education (ITE) in primary schools in South Africa.

Considering recent policy directives and initiatives, it highlights the dilemmas of ITE for the primary school and gives a thorough account of innovations and initiatives to improve ITE. The book presents what works best for quality preparation of teachers in the Global South,

where many children rely on their teachers and school life to break the cycle of poverty. Chapters draw on evidence from workplace learning, pre-service study, and primary school teacher education policy to highlight examples of promising change in teacher education in South Africa, addressing the clichés of "theory versus practice" head-on. This book successfully brings out the challenging aspects of teacher education for childhood learning which has otherwise been regarded as the softer option for a career in education. This book will be of great interest for academics, researchers, and post-graduate students in the fields of teacher

education, African education, educational policy, international education, and comparative education.

ORGANIZATION AND ADMINISTRATION OF PHYSICAL EDUCATION

Jones & Bartlett
Publishers

If you want to know how to be the best, you learn from the best.

Two SHAPE America Physical Education Administrators of the Year share what it

takes to be an outstanding administrator in

Organization and Administration of

Physical Education: Theory and Practice.

Jayne Greenberg and Judy LoBianco, veteran leaders in the field with decades of successful administration experience, head a

sterling list of contributors who have taught at the elementary, middle school, high school, and college levels in urban, suburban, and rural settings.

Together, these contributors expound on the roles and responsibilities of physical education administrators through both theoretical and practical lenses. The result is a book that will be highly useful to undergraduate students looking to enter the field, as well as a resource for administrators in physical education leadership positions who are looking to acquire new skills and innovative ideas in each of the five areas of responsibility covered in the book. Part I covers

leadership, organization, and planning. It explores leadership and management styles and presents practical theories of motivation, development, and planning. It also looks at how to plan for the essential components of an effective, quality physical education program. In part II, readers examine various curriculum and instruction models and navigate through curriculum theory and mapping. This section also offers guidance on planning events, including special programs and fundraising projects, and how to build a team and secure community connections for those special events. Part III helps administrators plan and design new

school sites or renovate existing ones, and it presents contemporary concepts in universal design and sustainable environmental design. It also offers ideas on how to incorporate technology to meet the needs of 21st-century learners, including the use of social media and robotics in delivering instruction and communication. Part IV explores written, verbal, and electronic communication issues, as well as legal and human resource issues. Administrators learn how to lobby and advocate for physical education, how the legal system affects schools, and how to examine personnel issues, bullying, and harassment. Part V explains the fiscal responsibilities

inherent in administrative positions, including budgeting, bidding, and purchasing. It also shows how administrators can secure funding independent of district or local funding, offering many examples of grants and fundraising opportunities with sample grant applications. Throughout the text, special features—Advice From the Field and Leadership in Action—share tips, nuggets of wisdom, and examples of administrators excelling in their various responsibilities. The book also comes with many practical examples of forms that are useful in carrying out responsibilities,

and each chapter offers objectives, a list of key concepts, and review questions to facilitate the learning. In addition, the text comes with a web resource of supportive materials and documents. Organization and Administration of Physical Education: Theory and Practice, published with SHAPE America, offers the solid foundational theory that administrators need and shows how to put that theory into daily practice.

PARENTS HANDBOOK
SEXUALITY EDUCATION
is, basically,
CHARACTER

EDUCATION, which in turn is founded on human dignity and encompasses formation in moral standards and human conduct; hence, covering the key elements of “life and love, and everything in between”. This book is intended for parents, the primary educators of children, and the most effective source of appreciation and understanding of love and sexuality, shaping minds and hearts to make good and responsible day-to-day decisions on key aspects of life. This is the third of an 11-volume series, the first dealing with the basics and nuances of sexuality education; the second addressed to teachers in the classroom; and the next eight intended as

textbook series for Grades 5 to 12 (ages 11 to 18) of the K to 12 program. The book series in SEXUALITY EDUCATION is probably a most potent tool to help young people and their parents and other educators, regardless of creed, culture, and social status, to appreciate love, life, and everything in between. It is a book of and about love, in the setting of the home that nourishes future homes.

 The International Handbook of Science Education is a two volume edition pertaining to the most significant issues in science education. It is a follow-up to the first Handbook, published in 1998, which is seen as the most authoritative resource ever produced in science education. The chapters in this edition are reviews of research in science education and retain the strong international flavor of the project. It covers the diverse theories and methods that have

been a foundation for science education and continue to characterize this field. Each section contains a lead chapter that provides an overview and synthesis of the field and related chapters that provide a narrower focus on research and current thinking on the key issues in that field. Leading researchers from around the world have participated as authors and consultants to produce a resource that is comprehensive, detailed and up to date. The chapters provide the most recent and advanced thinking in science education making the Handbook again the most authoritative resource in science education.

The fifth edition of this critically acclaimed approach to curriculum planning continues to receive accolades for its balanced presentation, pertinent case studies, and advice from practicing educators. It skillfully interweaves the themes of multicultural education, constructivism, and education reform. The author documents the latest trends, such as e-learning, blended learning and flipped learning, the controversial Common Core State Standards, and the impact of technology in our schools, including the BYOD (bring your own device) movement, digital citizenship, and technological literacy. This well-researched text spotlights ways to

involve parents, students, and teachers in the curriculum-planning process and engages the reader in critical thinking and analysis about curriculum planning and education reform. Elementary Physical Education Springer Science & Business Media
