Presidential Campaigning in the Internet Age challenges popular claims about the democratizing effect of Digital Communication Technologies (DCTs).

This book challenges the widely held belief that Hong Kong's political culture is one of indifference. The term "political indifference" is used to suggest the apathy, naivete, passivity, and utilitarianism of Hong Kong's people toward political life. Taking a broad historical look at political participation in the former colony, Wai-man Lam argues that this is not a valid view and demonstrates Hong Kong's significant political activism in thirteen selected case studies covering 1949 through the present. Through in-depth analysis of these cases she provides a new understanding of the nature of Hong Kong politics, which can be described as a combination of political activism and a culture of depoliticization.

Globalised neo-liberalism has produced multiple crises – social, ecological, political. In the past, crises of global order have generated large-scale social transformations, and the current crises likewise hold a transformative promise. Social movements

become a crucial barometer, in signalling both the demise and rise of political formations and programs. Elite strategies, framed as crisis management, create their own disordering side-effects. Experiments in movement strategy gain greater significance, as do contending elite efforts at repressing, managing or displacing the fall-out. In this book we investigate both movements and management in the face of crisis, taking crisis and unanticipated consequences as a normal state-of-play. The book enquires into the winners and losers from crisis, and investigates the movement-management nexus as it unfolds in particular localities as well as in broader contexts. The book deals with some of the most pressing conflicts of our time, and produces a range of theoretical insights: the ubiquity of crisis is seen as not only a hallmark of social life, but a way into a different kind of social analysis. This book was published as a special issue of *Globalizations*.

From their early days in 1965 when the order of the day was to drive the insurgent Viet Cong from the villages around Da Nang to the final, dramatic evacuation of Saigon ten years later, *Semper Fi—Vietnam* relates the whole gutsy, glorious saga of the Marines in Vietnam in stark, riveting detail. Acclimating to their strange new surroundings occupied the Marines' first few weeks in South Vietnam. . . . Throughout the day, peasants dressed in pajama-like clothing and sporting conical hats worked the paddies behind the heaving water buffalo. . . . If daytime scenes appeared bucolic, the arrival of sunset quickly changed that

perception. Gunfire and explosions erupted at dusk. Marines nervously watched bright tracers cut colorful swaths across the night sky. From distant bamboo thickets, mortar shells flew skyward to crash in the paddies. The Marines were learning that the war in South Vietnam was unlike anything for which they'd been trained.

What Americans call the Vietnam War actually began in December 1946 with a struggle between the communists and the French for possession of the country—but Vietnam's strategic position in southeast Asia inevitably led to the involvement of other countries. Written by an officer in the Republic of Vietnam Armed Forces, this poignant memoir seeks to clarify the nuances of South Vietnam's defeat. From the age of 12, Van Nguyen Duong watched as the conflict affected his home, family, village and friends. He discusses not only the day-to-day hardships of wartime but his postwar forced relocation and eventual imprisonment. A special focus is on the anguish caused by the illusive reality of Vietnamese independence. The political forces at work north and south, the hardships suffered by RVNAF soldiers after the 1975 U.S. withdrawal, and the effects of reunification on the Vietnamese people are discussed.

Renaissance, Reform, or Retrogression? University of Texas Press
Predominantly Catholic for centuries, Latin America is still largely Catholic today, but the religious continuity in the region masks great changes that have taken place in the past five decades. In fact, it would be fair to say that Latin American Christianity has been transformed definitively in the years since the Second Vatican Council. Religious change has not been obvious because its transformation has not been the sudden and massive growth of a new religion, as in Africa and Asia. It has been rather a simultaneous revitalization and fragmentation that threatened, awakened, and ultimately brought to a greater maturity a dormant and parochial Christianity. New challenges from modernity, especially in the form of Protestantism and Marxism, ultimately brought forth new life. In *The Rebirth of Latin American Christianity*, Todd Hartch examines the changes that have swept across Latin America in the last fifty years, and situates them in the context of the growth of Christianity in the global South.

This commemoration booklet focuses on naval air power during the final years of the Vietnam War. For much of this period, Navy aircraft sought to hamper the flow of supplies down the Ho Chi Minh Trail in Laos—a huge investment in air power resources that ultimately proved fruitless. After North Vietnam's invasion of the South in 1972, however, Navy tactical aviation, as well as naval gunfire support, proved critical, not only in blunting the offensive but also in persuading North Vietnam to arrive at a peace agreement in Paris in 1973. The Navy's forward presence saved

the day in 1972 and allowed President Nixon to finally achieve "peace with honor."

Guatemala has undergone an unprecedented conversion to Protestantism since the 1970s, so that thirty percent of its people now belong to Protestant churches, more than in any other Latin American nation. To illuminate some of the causes of this phenomenon, Virginia Garrard-Burnett here offers the first history of Protestantism in a Latin American country, focusing specifically on the rise of Protestantism within the ethnic and political history of Guatemala. Garrard-Burnett finds that while Protestant missionaries were early valued for their medical clinics, schools, translation projects, and especially for the counterbalance they provided against Roman Catholicism, Protestantism itself attracted few converts in Guatemala until the 1960s. Since then, however, the militarization of the state, increasing public violence, and the "globalization" of Guatemalan national politics have undermined the traditional ties of kinship, custom, and belief that gave Guatemalans a sense of identity, and many are turning to Protestantism to recreate a sense of order, identity, and belonging.

This study traces the formulation of our involvement in Vietnam and how we attempted to prosecute that conflict. It links South Vietnam's unsuccessful assault into Laos with ill defined policy from our executive branch and flawed strategy by our senior military leaders. The complexity of the twenty-first century threat landscape contrasts markedly with the bilateral nuclear bargaining context envisioned by classical deterrence theory. Nuclear and conventional arsenals continue to develop alongside anti-satellite programs, autonomous robotics or drones, cyber operations, biotechnology, and other innovations barely imagined in the early nuclear age. The concept of cross-domain deterrence (CDD) emerged near the end of the George W. Bush administration as policymakers and commanders confronted emerging threats to

vital military systems in space and cyberspace. The Pentagon now recognizes five operational environments or so-called domains (land, sea, air, space, and cyberspace), and CDD poses serious problems in practice. In *Cross-Domain Deterrence*, Erik Gartzke and Jon R. Lindsay assess the theoretical relevance of CDD for the field of International Relations. As a general concept, CDD posits that how actors choose to deter affects the quality of the deterrence they achieve. Contributors to this volume include senior and junior scholars and national security practitioners. Their chapters probe the analytical utility of CDD by examining how differences across, and combinations of, different military and non-military instruments can affect choices and outcomes in coercive policy in historical and contemporary cases.

Arab Americans are one of the most misunderstood segments of the U.S. population, especially after the events of 9/11. In *Arab America*, Nadine Naber tells the stories of second generation Arab American young adults living in the San Francisco Bay Area, most of whom are political activists engaged in two culturalist movements that draw on the conditions of diaspora, a Muslim global justice and a Leftist Arab movement. Writing from a transnational feminist perspective, Naber reveals the complex and at times contradictory cultural and political processes through which Arabness is forged in the contemporary United States, and explores the apparently intra-communal cultural concepts of religion, family, gender, and sexuality as the battleground on which Arab American young adults and the looming world of America all wrangle. As this struggle continues, these young adults reject Orientalist thought, producing counter-narratives that open up new possibilities for transcending the limitations of Orientalist, imperialist, and conventional nationalist articulations of self, possibilities that ground concepts of religion, family, gender, and sexuality in some of the most urgent issues of our times: immigration politics, racial justice struggles, and U.S. militarism and war.

Renowned for his coverage of China's elite politics and leadership transitions, veteran Sinologist Willy Lam has produced the first book-length study in English of the rise of Xi Jinping--General Secretary of the Chinese Communist Party (CCP) since November 2012. With rare insight, Lam describes Xi's personal history and his fascination with quasi-Maoist values, the factional politics through which he ascended, the configuration of power of the Fifth-Generation leadership, and the country's likely future directions under the charismatic "princeling." Despite an undistinguished career as a provincial administrator, Xi has rapidly amassed more power than his predecessors. He has overawed his rivals and shaken up the party-state hierarchy by launching large-scale anti-corruption and rectification campaigns. With a strong power base in the People's Liberation Army and a vision of China as an "awakening lion," Xi has been flexing China's military muscle in sovereignty rows with countries including Japan, Vietnam, and the Philippines while trying to undermine the influence of the United States in the Asia-Pacific region. While Xi is still fine-tuning his art of governance, his zero tolerance for dissent and his preoccupation with upholding the privileges of the "red aristocracy" and the CCP's status as "perennial ruling party" do not bode well for economic, political, or cultural reforms. Lam takes a close look at Xi's ideological and political profile and considers how his conservative outlook might shape what the new strongman calls "the Great Renaissance of the Chinese race."

THREE DAYS IN VIETNAM WHEN NATURE INTERVENED IN THE WAR

More than one hundred books have been written about T.E. Lawrence which explore the man and his deeds. Just about every aspect and the many incarnations of his life, his campaigns, the geo-politics of the Arab world, and the influence of the West in it, as Lawrence experienced them, have been examined. However, nobody has gone in search of the mind of the man himself of his formation and his deep beliefs. Nobody has asked the question, What, really, is the source of the extraordinary power of this little man? Not only in terms of his incontestable qualities of leadership, but also in regard to the sheer range of his activities and accomplishments. Archaeologist, writer, guerilla warfare theorist and practitioner, diplomat, soldier and airman, Lawrence also possessed an unusual ability to cross boundaries of class, race, culture, and religion. On top of this, he demonstrated the ability to walk away from power and wealth and the accumulation of things to change his name more than once; to begin again at the bottom of the heap in the RAF, and stay there, with only a few friends and books and a motorcycle. Lawrence the Warrior and Scholar is a quest. It examines how a slight Oxford academic combined two of the most challenging paths a man can choose. What drove and motivated this man? How was it that he could apparently out-shoot, out-ride, and out-starve the Bedouin? How is it that the US military, and others, are still studying his famous account of the Arab Revolt and his *Seven Pillars of Wisdom*? Drawing upon what Lawrence and those who knew him wrote, and did, and said, Bruce Leigh delves into Lawrence's personal philosophy and practices, examining and analyzing his library, and his close relationship to the world of classical scholarship and chivalry, emphasizing that Lawrence's views were not abstractions only, but intimately tied to his actions and deeds. Ultimately, the book argues that there is a message in Lawrence's writings and activities -- one that is against the grain of the world of self-definition by consumption. As one of his friends wrote: "The Man was great, the message is greater."

Battle Captain Tattered Flag

This military history chronicles a time during the Vietnam War when fighting stopped and the 101st Airborne helped those in need during a natural disaster. For three days during the Vietnam War, it wasn't rockets or artillery that came through the skies, but a horrific force of nature that suddenly put both sides in awe. When Super Typhoon Joan arrived in October 1970, an unofficial truce began. Air crewmen faced masses of Vietnamese civilians outside their base perimeters for the first time. Could we trust them not to shoot? Could they trust us not to drop them off in a detention camp? Truces never last, but while they do, life changes for everyone involved. The "typhoon truce" stopped the war for three days in northern I Corps--that area bordering the demilitarized zone separating South Vietnam from North. Then, less than a week later, Super Typhoon Kate hit the same area with renewed fury. As the entire countryside was flooded, the people faced war and natural disaster at the same time. No one but the Americans had the resources to help the people who lived in the lowlands, and so they did. The everyday dangers they faced were only magnified by low clouds and poor visibility. But the aircrews of the 101st Airborne went out to help anyway. In this book, we see how, for a brief period during an otherwise vicious war, saving life took precedence over bloody conflict.

Understanding the Political Culture of Hong Kong: The Paradox of Activism and Depoliticization Patrick & Beatrice Haggerty

In this path-breaking book, Tong Lam examines the emergence of the "culture of fact" in modern China, showing how elites and intellectuals sought to transform the dynastic empire into a

nation-state, thereby ensuring its survival. Lam argues that an epistemological break away from traditional modes of understanding the observable world began around the turn of the twentieth century. Tracing the Neo-Confucian school of evidentiary research and the modern departure from it, Lam shows how, through the rise of the social survey, "the fact" became a basic conceptual medium and source of truth. In focusing on China's social survey movement, *A Passion for Facts* analyzes how information generated by a range of research practices—census, sociological investigation, and ethnography—was mobilized by competing political factions to imagine, manage, and remake the nation.
