THE FIRST MOVE

Cambridge University Press

When negotiation fails, mediation avails other moves for an amicable resolution. Whether you are a current or future mediator or a party to a conflict, this is your essential companion to the theory, concepts, and best practices of mediation. In a world ridden by social divisions, responsible resolution of conflicts

is more timely than ever. What happens when parties are unable to negotiate an agreement together? The next move is to invite a third party to reset the negotiations, facilitate the exchanges, rebuild a working relationship and empower the parties to explore the past, surface their present needs, invent, evaluate and choose the best solutions for the future. Mediation: Negotiation by Other Moves brings decades of critical analysis and experience that the authors tested worldwide in international organizations, governments, NGOs, universities and corporations. You will understand mediation better, and its significance in your personal and professional life. You will be able to develop a flexible mindset and a broad outlook to achieve sustainable outcomes. This book will cover: Models and principles from various domains of mediation: family, business & labor, public affairs, international relations A mediation framework to prepare for mediation and to run its process smoothly A step-by-step approach to a mediation session, from the opening until a possible settlement, via the various phases of problem solving Mediation traps and how to avoid them—for mediators and parties alike Ethics of mediation and questions of responsibility Mediation: Negotiation by Other Moves is essential reading for anyone who wishes to develop a pragmatic approach to mediation.

This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the period of the French Revolution, to various exile communities

during the 19th century, and on to the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the commercial and creative industries.

17 November 1979 You were reading a somewhat retro loveletter, the last in history. But you have not yet received it. Yes, its lack or excess of address prepares it to fall into all hands: a post card, an open letter in which the secret appears, but indecipherably. What does a post card want to say to you? On what conditions is it possible? Its destination traverses you, you no longer know who you are. At the very instant when from its address it interpellates, you, uniquely you, instead of reaching you it divides you or sets you aside, occasionally overlooks you. And you love and you do not love, it makes of you what you wish, it takes you, it leaves you, it gives you. On the other side of the card, look, a proposition is made to you, S and p, Socrates and Plato. For once the former seems to write, and with his other hand he is even scratching. But what is Plato doing with his

outstretched finger in his back? While you occupy yourself with turning it around in every direction, it is the picture that turns you around like a letter, in advance it deciphers you, it preoccupies space, it procures your words and gestures, all the bodies that you believe you invent in order to determine its outline. You find yourself, you, yourself, on its path. The thick support of the card, a book heavy and light, is also the specter of this scene, the analysis between Socrates and Plato, on the program of several others. Like the soothsayer, a "fortune-telling book" watches over and speculates on that-which-must-happen, on what it indeed might mean to happen, to arrive, to have to happen or arrive, to let or to make happen or arrive, to destine, to address, to send, to legate, to inherit, etc., if it all still signifies, between here and there, the near and the far, da und fort, the one or the other. You situate the subject of the book: between the posts and the analytic movement, the pleasure principle and the history of telecommunications, the post card and the purloined letter, in a word the transference from Socrates to Freud, and beyond. This satire of epistolary literature had to be farci, stuffed with addresses, postal codes, crypted missives, anonymous letters, all of it confided to so many modes, genres, and tones. In it I also abuse dates, signatures, titles or references, language itself. J. D. "With The Post Card, as with Glas, Derrida appears more as writer than as philosopher. Or we could say that here, in what is in part a mock epistolary novel (the long section is called "Envois," roughly, "dispatches"), he stages his writing more overtly than in the scholarly works. . . . The Post Card also contains a series of self-reflective essays, largely focused on Freud, in which Derrida is beautifully lucid and direct."—Alexander Gelley, *Library Journal*

This book is addressed to people with research interests in the nature of mathematical thinking at any level, to people with an interest in "higher-order thinking skills" in any domain, and to all mathematics teachers. The focal point of the book is a framework for the analysis of complex problem-solving behavior. That framework is presented in Part One, which consists of Chapters 1 through 5. It describes four qualitatively different aspects of complex intellectual activity: cognitive resources, the body of facts and procedures at one's disposal; heuristics, "rules of thumb" for making progress in difficult situations; control, having to do with the efficiency with which individuals utilize the knowledge at their disposal; and belief systems, one's perspectives regarding the nature of a discipline and how one goes about working in it. Part Two of the book, consisting of Chapters 6 through 10, presents a series of empirical studies that flesh out the analytical framework. These studies document the ways that competent problem solvers make the most of the knowledge at their disposal. They include observations of students, indicating some typical roadblocks to success. Data taken from students before and after a series of intensive problem-solving courses document the kinds of learning that can result from carefully designed instruction. Finally, observations made in typical high school classrooms serve to indicate some of the sources of students' (often counterproductive) mathematical behavior.

Statehood in the early 21st century remains as much a central

problem as it was in 1979 when the first edition of *The Creation of States in International Law* was published. As Rhodesia, Namibia, the South African Homelands and Taiwan then were subjects of acute concern, today governments, international organizations, and other institutions are seized of such matters as the membership of Cyprus in the European Union, application of the Geneva Conventions to Afghanistan, a final settlement for Kosovo, and, still, relations between China and Taiwan. All of these, and many other disputed situations, are inseparable from the nature of statehood and its application in practice. The remarkable increase in the number of States in the 20th century did not abate in the twenty five years following publication of James Crawford's landmark study, which was awarded the American Society of International Law Prize for Creative Scholarship in 1981. The independence of many small territories comprising the 'residue' of the European colonial empires alone accounts for a major increase in States since 1979; while the disintegration of Yugoslavia and the USSR in the early 1990s further augmented the ranks. With these developments, the practice of States and international organizations has developed by substantial measure in respect of self-determination, secession, succession, recognition, de-colonization, and several other fields. Addressing such questions as the unification of Germany, the status of Israel and Palestine, and the continuing pressure from non-State groups to attain statehood, even, in cases like Chechnya or Tibet, against the presumptive rights of existing States, James Crawford discusses the relation between statehood and recognition; the criteria for statehood, especially in view of evolving standards of democracy and human rights; and the application of such criteria in international organizations and between states. Also discussed are the mechanisms by which states have been created, including devolution and secession, international disposition by major powers or international organizations and the institutions established for Mandated, Trust, and Non-Self-Governing Territories. Combining a general argument as to the normative significance of statehood with analysis of numerous specific cases, this fully revised and expanded second edition gives a comprehensive account of the developments which have led to the birth of so many new states.

"Cultural agency" refers to a range of creative activities that contribute to society, including pedagogy, research, activism, and the arts. Focusing on the connections between creativity and social change in the Americas, this collection encourages scholars to become cultural agents by reflecting on exemplary cases and thereby making them available as inspirations for more constructive theory and more innovative practice. Creativity supports democracy because artistic, administrative, and interpretive experiments need margins of freedom that defy monolithic or authoritarian regimes. The ingenious ways in which people pry open dead-ends of even apparently intractable structures suggest that cultural studies as we know it has too often gotten stuck in critique. Intellectual responsibility can get beyond denunciation by acknowledging and nurturing the resourcefulness of common and uncommon agents. Based in North and South America, scholars from fields including anthropology, performance studies, history, literature, and communications studies explore specific variations of cultural agency across Latin America. Contributors reflect, for example,

on the paradoxical programming and reception of a state-controlled Cuban radio station that connects listeners at home and abroad; on the intricacies of indigenous protests in Brazil; and the formulation of cultural policies in cosmopolitan Mexico City. One contributor notes that trauma theory targets individual victims when it should address collective memory as it is worked through in performance and ritual; another examines how Mapuche leaders in Argentina perceived the pitfalls of ethnic essentialism and developed new ways to intervene in local government. Whether suggesting modes of cultural agency, tracking exemplary instances of it, or cautioning against potential missteps, the essays in this book encourage attentiveness to, and the multiplication of, the many extraordinary instantiations of cultural resourcefulness and creativity throughout Latin America and beyond.
