NURSING DELEGATION AND MANAGEMENT OF PATIENT CARE - E-BOOK

Nursesbooks.org

Rev. ed. of: Leadership and management in nursing / Anita W. Finkelman. c2006.

F.A. Davis

This highly anticipated, fully revised second edition revisits and augments the award-winning *Creating & Sustaining Civility in Nursing Education*. In this comprehensive new edition, author Cynthia Clark explores the problem of incivility within nursing academe and provides practical solutions that range from ready-to-use teaching tools to principles for broad-based institutional change. She further explores the costs and consequences of incivility, its link to stress, ways to identify the problem, and how to craft a vision for change - including bridging the gap between nursing education and practice. Rather than dwell on the negative, this book focuses on solutions, including role-modeling and mentoring, stress management, and positive learning environments. Nurse educators at all levels will appreciate the variety of evidence-based strategies that faculty - and students - can implement to promote and maintain civility and respect in the education setting, including online learning.

COMPLICATIONS AFTER JOINT REPLACEMENT SURGERY

Lippincott Williams & Wilkins

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
