Challenges liberals and conservatives alike, as Hook pierces to the heart of momentous issues: human rights, racial equality, cultural freedom, and the separation of ethical behavior from religious belief.

Legacy of Islamic Antisemitism Cambridge University Press

The Mormon Culture of Salvation presents a comprehensive study of Mormon cultural and religious life, offering important new theories of Mormonism - one of the fastest growing movements and thought by many to be the next world religion. Bringing social, scientific and theological perspectives to bear on the Church of Jesus Christ of Latter-day Saints, Douglas Davies draws from theology, history of religions, anthropology, sociology and psychology to present a unique example of a truly interdisciplinary analysis in religious studies. Examining the many aspects of Mormon belief, ritual, family life and history, this book presents a new interpretation of the origin of Mormonism, arguing that Mormonism is rooted in the bereavement experience of Joseph Smith, which influenced the development of temple ritual for the dead and the genealogical work of many Mormon families. Davies shows how the Mormon commitment to work for salvation relates to current Mormon belief in conversion, and to traditional Christian ideas of grace. The Mormon Culture of Salvation is an important work for Mormons and non-Mormons alike, offering fresh insights into how Mormons see the world and work for their future glory in heavenly realms. Written by a non-Mormon with over 30 years' research experience into Mormonism, this book is essential reading for those seeking insights into new interdisciplinary forms of analysis in religion, as well as all those studying or interested in Mormonism and world religions. Douglas J. Davies is Professor in the Study of Religion in the Department of Theology, Durham University, UK. He is the author of many books including *Death, Ritual and Belief* (Cassell, 1997), *Mormon Identities in Transition* (Cassell, 1994), *Mormon Spirituality* (1987), and *Meaning and Salvation in Religious Studies* (Brill, 1984).

Nonviolent Alternatives for Social Change is a component of Encyclopedia of Social Sciences and Humanities in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. This volume gives a comprehensive review on Understanding Nonviolence in Theory and Practice; Ethics and Nonviolence; Countering with Nonviolence; Media Myopia and the power of Nonviolent Social Change; Paths to social change: conventional politics, violence and Non violence; Defending and Reclaiming the Commons Through Nonviolent Struggle; Nonviolent Methods and Effects of the World Nuclear Disarmament Movement; Humiliation and Global Terrorism: How to Overcome it Nonviolently. It at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

General Books

This book goes to the very heart of the passionate debate over the true character of Christian faith and practice. The advance of liberation theology in the Latin American church has caused international reverberations within both the religious and political worlds. The Vatican was moved to denounce it as heretical, and the Reagan-Bush administration has deemed it a significant threat to

the stability of the region. Here Batstone evaluates the writings of liberation theologians as they consider the central figure of Christian faith, Jesus of Nazareth, and asks whether a message of liberation for the poor and oppressed actually springs from the life and teachings of Jesus or is merely a religious projection of activists bent on radical social transformation. The judgment given to that issue will weigh heavily in the debate which currently rages in religious communities and seminaries over the political role and responsibility of the church. Batstone's work links these discussions to the concrete lives of the Latin American people and, in that sense, goes beneath the text and examines the subtext of religious reflection. Chapters present events and stories that originate in the daily realities of contemporary Latin America and then consider what connection these experiences have to the story of Jesus of Nazareth.

The Conquest of Suffering Routledge

Pacifism as Pathology has long since emerged as a dissident classic. Originally written during the mid-1980s, the seminal essay "Pacifism as Pathology" was prompted by veteran activist Ward Churchill's frustration with what he diagnosed as a growing—and deliberately self-neutralizing—"hegemony of nonviolence" on the North American left. The essay's publication unleashed a raging debate among activists in both the U.S. and Canada, a significant result of which was Michael Ryan's penning of a follow-up essay reinforcing Churchill's premise that nonviolence, at least as the term is popularly employed by white "progressives," is inherently counterrevolutionary, adding up to little more than a manifestation of its proponents' desire to maintain their relatively high degrees of socioeconomic privilege and thereby serving to stabilize rather than transform the prevailing relations of power. This short book challenges the pacifist movement's heralded victories—Gandhi in India, 1960s antiwar activists, even Martin Luther King Jr.'s civil rights movement—suggesting that their success was in spite of, rather than because of, their nonviolent tactics. Churchill also examines the Jewish Holocaust, pointing out that the overwhelming response of Jews was nonviolent, but that when they did use violence they succeeded in inflicting significant damage to the Nazi war machine and saving countless lives. As relevant today as when they first appeared, Churchill's and Ryan's trailblazing efforts were first published together in book form in 1998. Now, along with the preface to that volume by former participant in armed struggle/political prisoner Ed Mead, postscripts by both Churchill and Ryan, and a powerful new foreword by leading oppositionist intellectual Dylan Rodríguez, these vitally important essays are being released in a fresh edition.

God and Human Suffering John Wiley & Sons

Exceedingly well organized and extensively documented....-CHOICE The publication of the present anthology of primary sources and secondary studies on the theme of Muslim antisemitism is a groundbreaking event of major scholarly, cultural, and political significance. Editor Andrew Bostom has mined the relevant literature to produce the fullest record on this subject in existence. After the publication of his work, all the oft-repeated, but erroneous misunderstandings of a tolerant Islam, and of a medieval Jewish-Muslim "golden age" will need to be permanently retired. Everyone interested in Jewish and Islamic history, as well as current events in the Middle East, should read this book - and soon.-Steven T. Katz, Director, Elie Wiesel Center for Judaic Studies, Boston University, and author of *Post-Holocaust Dialogues* and *The Holocaust in Historical Context* The antisemitism of

the Muslim Middle East that we hear, see, and experience daily - from the racist cartoons to the constant chorus of "pigs and apes" - is often attributed to European origins, as if the radical Muslim world learned this endemic hatred through the tragedy of imperialism and colonialism. In fact, a deep suspicion and frequent loathing of Jews is deeply rooted in the Middle East, antedating European rule and sometimes evidenced in passages in the Koran and early holy Islamic texts.... Andrew Bostom produces a vast literature of Middle Eastern Islamic antisemitism, and critics may be as surprised at his conclusions as they are unable to refute his carefully compiled corpus of evidence.-Victor Davis Hanson, Senior Fellow, The Hoover Institution, Stanford University, author of *Carnage and Culture* and *A War Like No Other*This comprehensive, meticulously documented collection of scholarly articles presents indisputable evidence that a readily discernible, uniquely Islamic antisemitism-a specific Muslim hatred of Jews-has been expressed continuously since the advent of Islam. Debunking the conventional wisdom, which continues to assert that Muslim animosity toward Jews is entirely a 20th-century phenomenon fueled mainly by the protracted Arab-Israeli conflict, leading scholars provide example after example of antisemitic motifs in Muslim documents reaching back to the beginnings of Islam.The contributors show that the Koran itself is a significant source of hostility toward Jews, as well as other foundational Muslim texts including the hadith (the words and deeds of Muhammad as recorded by pious Muslim transmitters) and the sira (the earliest Muslim biographies of Muhammad). Many other examples are adduced in the writings of influential Muslim jurists, theologians, and scholars, from the Middle Ages through the contemporary era.These primary sources, and seminal secondary analyses translated here for the first time into English-such as Hartwig Hirschfeld's mid-1880s essays on Muhammad's subjugation of the Jews of Medina and George Vajda's elegant, comprehensive 1937 study of the hadith-detail the sacralized rationale for Islam's anti-Jewish bigotry. Numerous complementary historical accounts illustrate the resulting plight of Jewish communities in the Muslim world across space and time, culminating in the genocidal threat posed to the Jews of Israel today.Scholars, educators, and interested lay readers will find this collection an invaluable resource for understanding the phenomenon of Muslim antisemitism, past and present.FURTHER PRAISE FOR THE LEGACY OF ISLAMIC ANTISEMITISM:Stimulating and informative: a fascinating and disturbing voyage of historical discovery.... It is magnificent.-Martin Gilbert, official biographer of Winston ChurchillAuthor of *Never Again: A History of the Holocaust*and *The Jews of Arab Lands: Their History in Maps*[Bostom's] eye-opening anthology should become an essential resource.-Ilan Stavans, Lewis-Sebring Professor in Latin American and Latino Culture and Five-College 40th Anniversary Professor, Amherst CollegeDr. Andrew Bostom has written a

Mental Control of the Body or Health Through Self-Conquest Prometheus Books

Excerpt from *Mental Control of the Body or Health Through Self-Conquest* The indulgence of the reader is asked for a brief statement of the facts leading to the writing and publication of this book. Only the necessity of giving proof of my knowledge from experience of the practical value of the method of cure set forth in this book forces me to give this personal testimony. After ten years of invalidism, during which I had the more or less constant attendance of physicians, I found this way to health. Many years before, in desperation from long continued suffering, I had been persuaded to try another form of mind cure, but did not find it suited to my needs, so now felt no desire to seek

help from that quarter. However, I had always believed that there must be some way in which to avail ourselves of God's promises for the body, if we only knew how. THE ANIMALS CAME DANCING

Univ of California Press

"In 1823, Tennessee historian John Haywood encapsulated a foundational sentiment among the white citizenry of Tennessee when he wrote of a 'long continued course of aggression and sufferings' between whites and Native Americans. According to F. Evan Nooe, 'aggression' and 'sufferings' are broad categories that can be used to represent the framework of factors contributing to the coalescence of the white South. Traditionally, the concept of coalescence is an anthropological model used to examine the transformation of Indigenous communities in the eastern woodlands from chieftaincies to Native tribes, confederacies, and nations in response to colonialism. Applying this concept to white Southerners, Nooe argues that through the experiences and selective memory of settlers in the antebellum South, white Southerners incorporated their aggression against and suffering at the hands of the Indigenous peoples of the Southeast in the coalescence of a regional identity built upon the violent dispossession of the Native South.This, in turn, formed the development of Confederate identity and its later iterations in the long nineteenth century. Geographically, 'Aggression and Sufferings' prioritizes events in the frontier territories of Tennessee, Florida, Georgia, South Carolina, and Alabama. Nooe considers how divergent systems of violence and justice between Native Americans and white settlers (such as blood revenge and concepts of honor) functioned in the emergent region and examines the involved societies' conflicting standards on how to equitably resolve interpersonal violence. Nooe then investigates the contemporary and historically interconnected consequences of a series of murders of encroaching white settlers by a faction of the Creek nation known as the 'Red Sticks' in the years preceding the 1813 Creek War. Each episode was connected to immediate grievances by Native Southerners against white colonialism, while white Southerners looked upon the incidents as confirmation of Native savagery. Nooe considers the effort by the burgeoning white population to combat the Red Sticks in the Creek War of 1813-1814 and explains how chroniclers of the white South's past memorialized the 1813 Creek War as a regional conflict. Next, Nooe explores the events between the August 1814 Treaty of Fort Jackson to the September 1823 Treaty of Moultrie Creek to evaluate the implications of persistent low-level white-Native conflict in a period traditionally interpreted as the end to the Creek War. He then examines how the Florida Indians' resistance to their expulsion from the South sparked a unifying call to arms from white communities across the region. Finally, Nooe explores how white Southerners constructed, propagated, and perpetuated harrowing tales of colonizers as innocent

victims in the violent expulsion of the region's Native peoples before concluding with notes on how this emerging sense of regional history and identity (which ignored the interests and agency of enslaved and free Black people in the early nineteenth century South) continued to flower into the Antebellum period, during Western expansion, and well into the twentieth century. Readers interested in Southern, Indigenous, and Early American history will find a thorough, scholarly examination of the tensions and violence between Natives and white settlers and the construction of a regional memory of white victimization by white Southerners during this period. 'Aggression and Sufferings' speaks to scholarship on settler-colonialism, violence, Native dispossession, white identity, historical memory and monuments, and Southern Studies"--

The Conquest of Bacteria, from Salvarsan to Sulphapyridine Fortress Press

We are told that reading enlarges our horizons, that reading literature extends our experience beyond what we have happened upon in our own lives. But the moral and political dangers that attend the association of reading with experience have long been understood. And is that association even valid? What if precisely our most important literary texts are constructed so as to challenge or disrupt it? This book conducts a radical criticism of the concept of reading, especially of the concept of the reader, as these concepts are commonly used in literary criticism. It sketches in broad terms the historical provenance of the reader, in an argument that includes discussions of Dante, Boccaccio, Cervantes, Marlowe, and German idealist philosophy, then suggests that most major European literary works since the eighteenth century are written in direct opposition to the central concepts by which criticism has sought to lay hold of them.

COLLECTIVE BEHAVIOR

Houghton Mifflin

In this thought-provoking book, a diverse range of educators, activists, academics, and community advocates provide theoretical and practical ways of activating our knowledge and understanding of how to build a human rights culture. Addressing approaches and applications to human rights within current socio-cultural, political, socio-legal, environmental, educational, and global contexts, these chapters explore tensions, contradictions, and complexities within human rights education. The book establishes cultural and educational practices as intrinsically linked to human rights consciousness and social justice, showing how signature pedagogies used by human rights practitioners can be intellectual, creative, or a combination of both. Across three sections, the book discusses ways of bringing about holistic, relevant, and compelling approaches for challenging and understanding structures of power, which have become a global system, while also suggesting a move from abstract human rights principles, declarations, and instruments to meaningful changes that do not dehumanise and distance us from intrinsic and extrinsic oppressions, denial of identity and community, and other forms of human rights abuse. Offering new critical cultural studies approaches on how a human rights consciousness arises and is practised, this book will be of great interest to scholars and students of cultural studies, education studies, critical sociology, human rights education, and human rights studies.

PACIFISM AS PATHOLOGY

PM Press

Professor Hall has written a major work on an agonizing subject, at once brilliant, comprehensive, and thought provoking. In contrast to many writers who gloss over one or the other, Dr. Hall is true both to the reality of suffering and to the affirmation that God creates, sustains, and redeems. Creative is his view that certain aspects of what we call suffering -- loneliness, experience of limits, temptation, anxiety -- are necessary parts of God's good creation. These he distinguishes from suffering after the fall, the tragic dimension of life. Unique is his structure: creation-suffering as becoming the fall--suffering as a burden redemption--conquest from within. Professor Hall succeeds in moving the reader beyond the customary way of stating the problem: "How can undeserved suffering coexist with a just and almighty God?" He also evaluates five popular, leading thinkers on suffering: Harold Kushner, C.S. Lewis, Diogenes Allen, George Buttrick, and Leslie Weatherhead.

Conquest by Suffering Scholarly Title

What guidance can Buddhism provide to those involved in armed conflict and to belligerents who must perhaps kill or be killed or defend their families, communities or countries from attack? How, moreover, does Buddhism compare with international humanitarian law (IHL) – otherwise known as the law of armed conflict – which protects non-combatants and restricts the means and methods of warfare to limit the suffering it causes? Despite the prevalence of armed conflict in parts of the Buddhist world, few contemporary studies have addressed these questions. While there is a wealth of material on Buddhist conflict prevention and resolution, remarkably little attention has been paid to what Buddhism says about the actual conduct of war. IHL is also still relatively little known in the Buddhist world and might not therefore influence the behaviour of belligerents who self-identify as Buddhists and are perhaps more likely to be guided by Buddhist principles. This ground-breaking volume is part of an International Committee of the Red Cross project which seeks to fill this gap by exploring correspondences between Buddhist and IHL principles, and by identifying Buddhist resources to improve compliance with IHL and equivalent Buddhist or humanitarian norms. This book will be of much interest to students and researchers of International Law, Buddhism, Ethics as well as War and Conflict studies. The chapters in this book were originally published as a special issue of Contemporary Buddhism.

PEDAGOGY OF THE OPPRESSED

EOLSS Publications

The book very clearly the problem of suffering and prescribes measures for their annihilation. It prescribes ways and means for achieving Egolessness, purification of mind, the cessation of the cycle of rebirth and the total absorption of the personal soul into the supreme transcendental soul.

Man and the Cosmos Motilal Banarsidass

Excerpt from *The Conquest of Fear: A Jewish Science View-Point* The more science searches into the origin of disease, the more it becomes convinced that the root of physical ailments lies in mental disturbance. The body, of itself, possesses, we find, all the elements that make for health and strength, and if these were not interfered with, mans life upon earth would be untainted with pain or

suffering. Interference with the state of the body usually emanates from the mind. The mind is not a mere organ of the body; it is the power-house, the source from which all the organs draw their vitality and their ability to function. The influence of the mind over the body is absolute. Every one is familiar with the fact that bashfulness or embarrassment, purely mental sensations, will cause the blood to rush into the face; while fear, on the other hand, will cause it to recede. Joy expresses itself in bright glances, in a "glow of happiness," worry is readily recognized in the drawn mouth and puckered brow. Anger, sorrow, astonishment, all mental states, in fact, bring forth corresponding physical manifestations. These are but some of the superficial aspects of the control of the mind over the body. Physiologists tell us that joy creates a secretion within the body which stimulates the heart and prompts the individual to greater action, while worry creates a secretion of opposite tendency, which retards the inner processes and impedes the efforts of the individual. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. THE CONQUEST OF FEAR

BEYOND BOOKS HUB

It seems fitting in 1973, when the World Health Organization has announced that worldwide smallpox will be eradicated completely from the world before the year's end, to tell the story of the long struggle against this killer and defacer of man, of the devastating epidemics in early Boston, and the consequent discovery of inoculation. In eighteenth-century history inoculation for smallpox marked a new beginning. Science entered the picture, stimulating keener observation, a sharper respect for objective fact, and never-ending experimentation. It reshaped American culture from a new center, leading life and thought out in new directions. In our own deeply troubled, revolutionary, and almost incredibly hopeful twentieth century, this once familiar but now only dimly remembered story takes on a timeless relevance. - Foreword.

Recognized and appreciated as one of the most original and creative theologians in the Episcopal Church's history, William Porcher DuBose (1836-1918) published seven books of theological importance, including an autobiographical work, and his life is commemorated in a "lesser feast" of the Episcopal Calendar of the Church Year. Despite making significant contributions to Anglicanism, DuBose's works are, according to Robert Boak Slocum, more widely honored than understood or applied to questions facing theologians and lay people today. To fill the gap of knowledge and understanding, Slocum's study of DuBose draws parallels between essential experiences in his life and major themes in his published theology.

THE CONQUEST OF BREAD

University of Arizona Press

New and enlarged edition. Transpersonal Psychology concerns the study of those states and processes in which people experience a deeper sense of who they are, or a greater sense of connectedness with others, with nature, or the spiritual dimension. Pioneered by respected researchers such as Jung, Maslow and Tart, it has nonetheless struggled to find recognition among mainstream scientists. Now that is starting to change. Dr. Michael Daniels teaches the subject as part of a broadly-based psychology curriculum, and this new and enlarged edition of his book brings together the fruits of his studies over recent years. It will be of special value to students, and its accessible style will appeal also to all who are interested in the spiritual dimension of human experience. The book includes a detailed 38-page glossary of terms and detailed indexes.
