The Western Humanities Open Court

Time magazine called Mortimer J. Adler a "philosopher for everyman." In this guide to considering the big questions, Adler addresses the topics all men and women ponder in the course of life, such as "What is love?", "How do we decide the right thing to do?", and, "What does it mean to be good?" Drawing on his extensive knowledge of Western literature, history, and philosophy, the author considers what is meant by democracy, law, emotion, language, truth, and other abstract concepts in light of more than two millennia of Western civilization and discourse. Adler's essays offer a remarkable and contemplative distillation of the Great Ideas of Western Thought.

Riches for the Poor McGraw-Hill Education

A reflection on the diverse ways Western humanity has attempted to escape its frightening history This book reflects on Western humanity's efforts to escape from history and its terrors—from the existential condition and natural disasters to the endless succession of wars and other man-made catastrophes. Drawing on historical episodes ranging from antiquity to the recent past, and combining them with literary examples and personal

reflections, Teofilo Ruiz explores the embrace of religious experiences, the pursuit of worldly success and pleasures, and the quest for beauty and knowledge as three primary responses to the individual and collective nightmares of history. The result is a profound meditation on how men and women in Western society sought (and still seek) to make meaning of the world and its disturbing history. In chapters that range widely across Western history and culture, *The Terror of History* takes up religion, the material world, and the world of art and knowledge. "Religion and the World to Come" examines orthodox and heterodox forms of spirituality, apocalyptic movements, mysticism, supernatural beliefs, and many forms of esotericism, including magic, alchemy, astrology, and witchcraft. "The World of Matter and the Senses" considers material riches, festivals and carnivals, sports, sex, and utopian communities. Finally, "The Lure of Beauty and Knowledge" looks at cultural productions of all sorts, from art to scholarship. Combining astonishing historical breadth with a personal and accessible narrative style, *The Terror of History* is a moving testimony to the incredibly diverse ways humans have sought to cope with their frightening history.

Culture and Values Prentice Hall

This volume identifies, discusses and addresses the wide array of ethical issues that have emerged for engineers due to the rise of a global economy. To date, there has been no systematic treatment of the particular challenges globalization poses for engineering ethics standards and education. This volume concentrates on precisely this challenge. Scholars and practitioners from diverse national and professional backgrounds discuss the ethical issues emerging from the inherent symbiotic relationship between the engineering profession and globalization. Through their discussions a deeper and more complete understanding of the precise ways in which globalization impacts the formulation and justification of ethical standards in engineering as well as the curriculum and pedagogy of engineering ethics education emerges. The world today is witnessing an unprecedented demand for engineers and other science and technology professionals with advanced degrees due

to both the off-shoring of western jobs and the rapid development of non-Western countries. The current flow of technology and professionals is from the West to the rest of the world.

Professional practices followed by Western (or Western-trained) engineers are often based on presuppositions which can be in fundamental disagreement with the viewpoints of non-Westerners. A successful engineering solution cannot be simply technically sound, but also must account for cultural, social and religious constraints. For these reasons, existing Western standards cannot simply be exported to other countries. Divided into two parts, Part I of the volume provides an overview of particular dimensions of globalization and the criteria that an adequate engineering ethics framework must satisfy in a globalized world. Part II of the volume considers pedagogical challenges and aims in engineering ethics education that is global in character.
