The modern world is built on commodities - from the oil that fuels our cars to the metals that power our smartphones. We rarely stop to consider

where they have come from. But we should. In *The World for Sale*, two leading journalists lift the lid on one of the least scrutinised corners of the world economy: the workings of the billionaire commodity traders who buy, hoard and sell the earth's resources. It is the story of how a handful of swashbuckling businessmen became indispensable cogs in global markets: enabling an enormous expansion in international trade, and connecting resource-rich countries - no matter how corrupt or war-torn - with the world's financial centres. And it is the story of how some traders acquired untold political power, right under the noses of western regulators and politicians - helping Saddam Hussein to sell his oil, fuelling the Libyan rebel army during the Arab Spring, and funnelling

cash to Vladimir Putin's Kremlin in spite of western sanctions. The result is an eye-opening tour through the wildest frontiers of the global economy, as well as a revelatory guide to how capitalism really works.

Cartech Incorporated  
Britain's most successful motorcycle road racer, 'Rebel Read', was never far from controversy. He frankly describes his life in the grand prix circus: the glamour, the danger, the money, the politics and the sex.

THE STORY: There's a new tenant at Armadillo Acres--and she's wreaking

havoc all over Florida's most exclusive trailer park. When Pippi, the stripper on the run, comes between the Dr. Phil-loving, agoraphobic Jeannie and her tollbooth collector husband

### **THE KING'S CUSTOMS ...**

This is the official publication for

members and member firms of the Incorporated Society of Valuers and Auctioneers (ISVA). The Directory contains the names and addresses of every member, and a complete list of practising firms and commercial concerns with member partners. Each firm entry lists the partners, telecommunications information, their specialisations and a general description of work carried out and history of the firm. There are 3500 firms listed worldwide.

*Sustainable Surface Water Management: a handbook for SUDS* addresses issues as diverse as flooding, water quality, amenity and biodiversity but also mitigation of, and adaptation to, global climate change, human health benefits

and reduction in energy use. Chapters are included to cover issues from around the world, but they also address particular designs associated with the implementation of SUDS in tropical areas, problems with retrofitting SUDS devices, SUDS modelling, water harvesting in drought-stricken countries using SUDS and the inclusion of SUDS in the climate change strategies of such cities as Tokyo, New York and Strasbourg.
