This book is the unique book with combination of colour atlas of Paediatric surgery and MCQs in Paediatric surgery. In Colour Atlas patient's photos, X-rays, CT scan and MRI can be seen. Among patient's photos there are pre-operative and per-operative photos, as well as photos of complications. My other book "MCQs in Paediatric surgery" also has been merged in this book. This MCQs book is unique in sense, that it provides lot of specific paediatric surgical knowledge directly in MCQs with short and to the point explanations. Atlas gives classical features of disease in images that helps in spot diagnosis of disease. Little explanation about the image is given at side. A Case-Based Collection with MCQs,

Volume 1 Wolters kluwer india Pvt Ltd
This book contains one thousand fixed response questions. It is designed for students of paediatric dentistry who want to prepare for a certifying test or similar examination. Most of those tests use fixed response questions. This book can help students overcome some of the common problems candidates have with MRQ tests. Even as a well-prepared and successful medical student, you likely will not be able to show how good you are in your first, or even second try at a comprehensive fixed response test. There is a good reason for this. Fixed response questions are a blunt instrument. They deny collaboration, reward speed and punish nuance. Unlike what one has become accustomed to in medical school: mentorship, caution against haste, and reward for insight. Without a lot of experience in fixed response tests, you are like a seasoned footballer who is about to be dropped into a rugby scrum. This book will help you get through it. It can be used for quick revision of various topics namely caries epidemiology, prevention and management; pulp therapy; tooth restoration; dental materials; oral medicine; traumatic dental injury; pain and behaviour management; tooth anatomy and physiology; eruption and eruption disorders; and general dentistry for children. There are three basic kinds of fixed-response questions in the book: True/False Questions, Multiple Choice Questions and Multiple Response Questions. The introduction section of the book provides readers with 10 quick guides on how to make yourself familiar with the vast material in the book. At the end of the book are the answers to the questions as well as a blank answer sheet which you could use during your personal studies. The book shall be

revised every three years to ensure it addresses contemporary issues in paediatric dentistry as well as ensure it contains information on current concepts in paediatric dentistry.
