Chateaubriand's 2-volume
Travels in America and
Italy is an important
literary travel narrative
written by a leading
(some would say

founding) figure of French
Romanticism.
Chateaubriand traveled to
America in 1791 to
escape the volatile
atmosphere of
Revolutionary France.
While some doubt has
been raised as to whether
he actually traveled to all
the areas he claimed,
(discrepancies in his
descriptions of flora and
fauna, lead scholars to
believe that

Chateaubriand did not
travel to the Mississippi
River, Florida, Alabama, or
to Louisiana, as implied
by his writing)
Chateaubriand's lush
descriptions of nature,
particularly that of the
sparsely populated
landscape of the
American South, place
this work at the forefront
of the French Romantic
tradition, strongly
impacting leading writers

and thinkers of the time. Moral and intellectual concerns are explored throughout the work, for example in the Preface that contains his theories of geographical science and the history of travel. The work is also known for its exploration of the customs, manners, and languages of the Native American tribes Chateaubriand encountered. vol. 2 of 2
