**Supporting Mid-Career Faculty** Springer Publishing Company  
 This book brings together leading practitioners and scholars engaged in professional development programming for and research on mid-career faculty members. The chapters focus on key areas of career development and advancement that can enhance both individual growth and institutional change to better support mid-career faculties. The mid-career stage is the longest segment of the faculty career and it contains the largest cohort of faculty. Also, mid-career faculty are tasked with being the next generation of faculty leaders and mentors on their respective campuses, with little to no supports to do so effectively, at a time when higher education continues to face unprecedented challenges while managing continued goal of diversifying both the student and faculty bodies. The stories, examples, data, and resources shared in this book will provide inspiration--and reality checks--to the administrators, faculty developers, and department chairs charged with better supporting their faculties as they engage in academic work. Current and prospective

faculty members will learn about trends in mid-career faculty development resources, see examples of how to create such supports when they are lacking on their campuses, and gain insights on how to strategically advance their own careers based on the realities of the professoriate. The book features a variety of institution types: community colleges, regional/comprehensive institutions, liberal arts colleges, public research universities, ivy league institutions, international institutions, and those with targeted missions such as HSI/MSI and Jesuit. Topics include faculty development for formal and informal leadership roles; strategies to support professional growth, renewal, time and people management; teaching and learning as a form of scholarship; the role of learning communities and networks as a source of support and professional revitalization; global engagement to support scholarship and teaching; strategies to recruit, retain, and promote underrepresented faculty populations; the policy-practice connection; and gender differences related to key mid-career outcomes. While the authors acknowledge that the challenges facing the mid-career stage are numerous and varying, they offer a counter narrative by looking at ways that faculty and/or institutions can assert

themselves to find opportunities within challenging contexts. They suggest that these challenges highlight priority mentoring areas, and support the creation of new and innovative faculty development supports at institutional, departmental, and individual levels.

Knowledge, Class, and Economics: Marxism without Guarantees surveys the "Amherst School" of non-determinist Marxist political economy, 40 years on: its core concepts, intellectual origins, diverse pathways, and enduring tensions. The volume's 30 original essays reflect the range of perspectives and projects that comprise the Amherst School—the interdisciplinary community of scholars that has enriched and extended, while never ceasing to interrogate and recast, the anti-economistic Marxism first formulated in the mid-1970s by Stephen Resnick, Richard Wolff, and their economics Ph.D. students at the University of Massachusetts-Amherst. The title captures the defining ideas of the Amherst School: an open-system framework that presupposes the complexity and contingency of social-historical events and the parallel "overdetermination" of the relationship between subjects and objects of inquiry, along with a novel conception of class as a process of performing, appropriating, and distributing surplus labor. In a collection of 30 original essays, chapters confront readers with the core concepts of overdetermination and class in the context of economic theory, postcolonial theory, cultural studies, continental philosophy, economic geography, economic anthropology, psychoanalysis, and literary theory/studies. Though Resnick and Wolff's writings serve as a focal point for this collection, their works are ultimately decentered—contested, historicized, reformulated. The topics explored will be of interest to proponents and critics of the post-structuralist/postmodern turn in Marxian theory and to students of economics as social theory across the disciplines (economics, geography, postcolonial studies, cultural studies, anthropology, sociology, political theory, philosophy, and literary studies,

among others).

#### **Success After Tenure** Routledge

For decades, workers' capital stewards have invested wisely to provide a secure retirement for millions of people around the world. This money – our money – represents an enormous share of economic and capital market wealth. It has seeded and grown innumerable innovative industries that have had far-reaching impacts. However, the 2008 financial crisis has seriously threatened these trusted assets and drained away prosperity. In response, a growing number of investors are moving towards responsible investment policies and strategies, addressing the rising expectations of consumers and benefiting from the financial advantages such strategies bring. Everyday citizens now want to see their investments not only do well, but do good. But, what constitutes responsible investment, and how can it be undertaken in practice? What is the impact of responsible investment strategies on investment performance? How can trustees, managers and advisors implement these strategies in line with their fiduciary responsibilities? How can plan trustees and staff members convince all stakeholders of the need to invest in resilient growth? The Responsible Investor Handbook, commissioned by the AFL-CIO and global progressive investors, is a lay-friendly "how-to" manual, sharing the best in responsible investment practice with capital stewards and other policy leaders who want to do the right thing with our common wealth. ### **HOLDING THE LINE OR SHIFTING THE BOUNDARIES?**

Cengage Learning

Over the last half century, college textbooks on management have taught the importance of valuing the human assets of a business, and they have also focused on how to effectively and appropriately manage those assets. And yet, we look around and rarely see it practiced. In *Activate Human Capital*, author Richard N. Morrison outlines the eight People-Focused Principles of Management, and he explains them in terms of the values that motivate people to want to do the work given to them. And even more, he shows how these values will actually get employees to initiate their work because they will see how it contributes to the overall purpose of the business. Each principle—such as giving people a purpose, communicating widely, accommodating change, creating a culture of worth and hope, and rewarding performance, to name a few—is linked to a component of human fulfillment, and then through research, personal experience, and shared stories, Morrison discusses how to activate each principle and demonstrates what it should look like in the workplace. Eight simple principles can help enhance all business relationships and improve efficiency, productivity, and profitability—if only managers are willing to change. People-focused management has been done, is being done, and will be done increasingly more often as more business leaders comprehend the potential in this empowering form of leadership. When employees feel valued, respected, encouraged, and fulfilled, they will work harder and be more invested in their work—and in the success of the business.

### **ICIE2013- International Conference on Innovation and Entrepreneurship** McGill-Queen's Press - MQUP

For forty years the international watchword has been deregulation of labour law and of social security. Now, however, the rise in unemployment and lack of employment security, the dizzying inequality gulf, and the environmental disasters and mass migrations caused by this deregulation are generating an impetus that defines social justice no longer merely in terms of the equitable distribution of resources, but also – and often primarily – in terms of the just recognition of persons. This collection of incisive essays recognizes that the growing interdependence of all of the people of the earth demands that labour rights are understood as an aspect of human rights, and thus envisaged at the international level. Contributions by twenty

outstanding labour law scholars from a range of countries worldwide provide in-depth analysis of such aspects of the debate as the following: – collective action in the interests of market effectiveness as well as fair outcomes for workers; – right to strike; – resilience of trade unions and collective bargaining as mechanisms of labour market regulation; – importance of national policy, despite the influence of global market forces, in shaping national outcomes; – work as the locus of the relationship between humans and nature; – search for a legal foundation for corporate social responsibility; – litigation as an alternative to collective bargaining; – the role of collective labour relations for immigrants and disabled people; – lessons that developed countries could learn from mechanisms pioneered in developing countries in coping with conditions of austerity; and – the trap of soft law and of declarations of intent that weigh lightly in the face of the power of the interests at play in international trade. The essays take stock of the dimensions of the current situation and also explore paths leading to a better achievement of social justice in labour law. These essays recognize that economic development and the pursuit of social justice are interwoven in a quest for social progress that includes mechanisms designed to eliminate unjustifiable inequality. For lawyers and other parties committed to the emerging political will to not only respect fundamental rights, but more broadly improve labour and environmental protection, this book opens abundant avenues that can be pursued in practice and in policy. The volume is based on a selection of papers presented at the 21st World Congress of the International Society for Labour and Social Security Law in Cape Town in 2015.
