A comprehensive guide to the reuse and recycling of lithium-ion power batteries—fundamental concepts, relevant technologies, and business models *Reuse and Recycling of Lithium-Ion Power Batteries* explores ways in which retired lithium ion batteries (LIBs) can create long-term, stable profits within a well-designed business operation. Based on a large volume of experimental data collected in the author's lab, it demonstrates how LIBs reuse can effectively cut the cost of Electric Vehicles (EVs) by extending the service lifetime of the batteries. In addition to the cost benefits, Dr. Guangjin Zhao discusses how recycling and reuse can significantly reduce environmental and safety hazards, thus complying with the core principles of environment protection: recycle, reuse and reduce. Offering coverage of both the fundamental theory and applied technologies involved in LIB reuse and recycling, the book's contents are based on the simulated and experimental results of a hybrid micro-grid demonstration project and recycling

system. In the opening section on battery reuse, Dr. Zhao introduces key concepts, including battery dismantling, sorting, second life prediction, re-packing, system integration and relevant technologies. He then builds on that foundation to explore advanced topics, such as resource recovery, harmless treatment, secondary pollution control, and zero emissions technologies. *Reuse and Recycling of Lithium-Ion Power Batteries*: • Provides timely, in-depth coverage of both the reuse and recycling aspects of lithium-ion batteries • Is based on extensive simulation and experimental research performed by the author, as well as an extensive review of the current literature on the subject • Discusses the full range of critical issues, from battery dismantling and sorting to secondary pollution control and zero emissions technologies • Includes business models and strategies for secondary use and recycling of power lithium-ion batteries *Reuse and Recycling of Lithium-Ion Power Batteries* is an indispensable resource for researchers, engineers, and business professionals who work in industries involved in energy storage systems and battery recycling, especially with the manufacture and use (and reuse) of lithium-ion batteries. It is also a valuable supplementary text for advanced undergraduates and postgraduate students studying energy storage, battery recycling, and battery management.

Actor William Powell is perhaps best known for his roles as charming Nick in *The Thin Man* films and blustery Clarence Day in *Life with Father*. As diverse as those characters are, they don't begin to reveal the full scope of

talent demonstrated by one of Hollywood's most intelligent leading men. Elegant, witty and dignified, Powell created accessible and human characters in a great variety of roles. His talent was such that Powell has a large and growing fan base 50 years after his last film was released, evidenced by the popularity of DVD rereleases and the frequent appearance of his films on cable television. The focus of this book is Powell's work in more than 90 films, from the silent era to the age of CinemaScope, woven into the dramatic and touching story of the actor's life. It begins by leaping into how Powell and actress Myrna Loy were launched to stardom as husband and wife Nick and Nora Charles in *The Thin Man*. The next chapter sets the stage for the baby Powell's entry into the world in 1892 and details his childhood and upbringing. Following chapters trace Powell's journey into the film industry, his early career as a popular villain, and his transition to talkies in the late 1920s aided by his stage training. The book details his work at Warner Bros., which turned him into a leading man, and his years of stardom at MGM. The book describes turning points in Powell's life--the death of lover Jean Harlow, a 21-month hiatus from films while the actor battled cancer, and a new leap to the top in *Life with Father*. Concluding chapters detail another flurry of films and the actor's retirement. A filmography lists Powell's films from 1922 to 1955, including those believed to be lost.
