This book argues that neither theories of secularisation nor theories of lived religion offer satisfactory accounts of religion and social change. Drawing from Deleuze and Guattari's idea of the assemblage, Paul-Francois Tremlett outlines an alternative. Informed by classical and contemporary theories of religion as well as empirical case studies and ethnography conducted in Manila and London, this book re-frames religion as spatially organised flows. Foregrounding the agency of non-human actors, it offers a compelling and original account of religion and social change.

Women, Religion and Social Change focuses attention on the way in which women from a number of religious traditions have been able to bring about change and the manner in which religions have either facilitated or inhibited women's participation in the process of change.

Women make up the vast majority of Protestant Christians in

China—a largely faceless majority, as their stories too often go untold in scholarly research as well as popular media. This book writes Protestant Chinese women into the history of twenty-first-century China. It features the oral histories of over a dozen women, highlighting themes of spiritual transformation, politicized culture, social mobility, urbanization, and family life. Each subject narrates not only her own story, but that of her mother, as well, revealing a deeply personal dimension to the dramatic social change that has occurred in a matter of decades. By uncovering the stories of Christian women in China, Li Ma offers a unique window onto the interactions between femininity and Christianity, and onto the socioeconomic upheavals that mark recent Chinese history.

"White's Barack Obama's America eloquently captures both the important nuances of the current political scene and its long-term consequences." ---Richard Wirthlin, former pollster for Ronald Reagan "This delightfully written and accessible book is the best available account of the changes in culture, society, and politics that have given us Barack Obama's America." ---Stan Greenberg, pollster for Bill Clinton and Chairman and CEO of Greenberg Quinlan Rosner Research "From one of the nation's foremost experts on how values shape our politics, a clear and compelling account of the dramatic shifts in social attitudes that are transforming American political culture. White's masterful blend of narrative and data illuminates the arc of electoral history from Reagan to Obama, making a powerful case for why we are entering a new progressive political era." ---Matthew R. Kerbel, Professor of Political Science, Villanova University, and author of *Netroots* "John Kenneth White is bold. He asks the big questions . . . Who are we? What do we claim to believe? How do we actually

live? What are our politics? John Kenneth White writes compellingly about religion and the role it played in making Barack Obama president. White's keen insight into America's many faiths clarifies why Barack Obama succeeded against all odds. It is a fascinating description of religion and politics in twenty-first-century America---a must-read." ---Kathleen Kennedy Townsend, former Lieutenant Governor of Maryland and author of *Failing America's Faithful* "In Barack Obama's America, John Kenneth White has written the political equivalent of Baedeker or Michelin, the definitive guide to and through the new, uncharted political landscape of our world. White captures and explains what America means---and what it means to be an American---in the twenty-first century." ---Mark Shields, nationally syndicated columnist and political commentator for PBS NewsHour "John White has always caught important trends in American politics that others missed. With his shrewd analysis of why Barack Obama won, he's done it again." ---E. J. Dionne, Jr., Senior Fellow, Brookings Institution, and University Professor in the Foundations of Democracy and Culture at Georgetown University The election of Barack Obama to the presidency marks a conclusive end to the Reagan era, writes John Kenneth White in *Barack Obama's America*. Reagan symbolized a 1950s and 1960s America, largely white and suburban, with married couples and kids at home, who attended church more often than not. Obama's election marks a new era, the author writes. Whites will be a minority by 2042. Marriage is at an all-time low. Cohabitation has increased from a half-million couples in 1960 to more than 5 million in 2000 to even more this year. Gay marriages and civil unions are redefining what it means to be a family. And organized religions are suffering, even as Americans continue to think of themselves as a religious people. Obama's inauguration was a defining moment in the political destiny of this country, based largely on demographic shifts, as described in *Barack Obama's America*. John Kenneth White is Professor of Politics at the Catholic University of America in Washington, D.C. Cover image: "Out of many, we are one: Dare to Hope: Faces from 2008 Obama Rallies" by Anne C. But since the 1950s, family life has been fundamentally reconfigured in the United States. How do religion and family fit together today? This book examines how religious congregations in America have responded to changes in family structure, and how families participate in local religious life. Based on a study of congregations and community residents in upstate New York, sociologist Penny Edgell argues that while some religious groups may be nostalgic for the Ozzie and Harriet days, others are changing, knowing that fewer and fewer families fit this traditional pattern. In order to keep members with nontraditional family arrangements within the congregation, these innovators have sought to emphasize individual freedom and personal spirituality and actively to welcome single adults and those from nontraditional families. Edgell shows that mothers and fathers seek involvement in congregations for different reasons. Men tend to think of congregations as social support structures, and to get involved as a means of participating in the lives of their children. Women, by contrast, are more often motivated by the quest for religious experience, and can adapt more readily to pluralist ideas about family structure. This, Edgell concludes, may explain the attraction of men to more conservative congregations, and women to nontraditional religious groups. **The Family and Social Change** Springer Nature Indispensable for understanding the recent conflicts in Iran,

Religion and Politics in Contemporary Iran provides a political history of the fluctuating relationships between the Islamic clergy and Iranian government since 1925. How different factions of the clergy, or ulama first lost and then regained a powerful position in Iran is the subject of this book. Akhavi analyzes how various factions within the clergy have responded to the government's efforts to encourage modernization and secularization, giving particular attention to the changes in the madrasahs, or theological colleges. He examines the main themes of the Ayatullah Khomeini's book, *Islamic Government*, and concludes by examining the alignments among the clergy in the past that indicate how they may develop in the future.

"About time! Two key experts in the field remind us of the significance and power of religion as bio-political and bio-economic." - Beverley Skeggs, Goldsmiths, University of London "A welcome addition to a continuing body of work by two distinguished theorists of religion." - Grace Davie, University of Exeter "Mellor and Shilling cement their place at the pinnacle of the contemporary sociological theorisation of religion and the sacred. If sociological work is going to have any future it is to be found in the inspiration and excitement of this sophisticated and intelligent book." - Keith Tester, University of Hull "This book is ambitious, refreshing and rewarding. It offers the best available analysis of the complex interlacing of the sacred, religion, secularization and embodied experience." - James A. Beckford, University of Warwick Drawing on classical and contemporary social theory, *Sociology of the Sacred* presents a bold and original account of how interactions between religious and secular forms of the sacred underpin major conflicts in the world today, and illuminate broader patterns of social and cultural change inherent to global modernity. It demonstrates: How the bodily capacities help religions adapt to social change but also facilitate their internal transformation That the 'sacred' includes a diverse range of phenomena, with variable implications for questions of social order and change How proponents of a 'post-secular' age have failed to grasp the ways in which sacralization can advance secularization Why the sociology of the sacred needs to be a key part of attempts to make sense of the nature and directionality of social change in global modernity today. This book is key reading for the sociology of religion, the body and modern culture.

*The Protestant ethic and the spirit of capitalism* Religion and Family in a Changing Society

Winner of the Distinguished Book Award from American Sociology Association Sociology of Religion Section Winner of the Richard Kalish Best Publication Award from the Gerontological Society of America Few things are more likely to cause heartache to devout parents than seeing their child leave the faith. And it seems, from media portrayals, that this is happening more and more

frequently. But is religious change between generations common? How does religion get passed down from one generation to the next? How do some families succeed in passing on their faith while others do not? *Families and Faith: How Religion is Passed Down across Generations* seeks to answer these questions and many more. For almost four decades, Vern Bengtson and his colleagues have been conducting the largest-ever study of religion and family across generations. Through war and social upheaval, depression and technological revolution, they have followed more than 350 families composed of more than 3,500 individuals whose lives span more than a century--the oldest was born in 1881, the youngest in 1988--to find out how religion is, or is not, passed down from one generation to the next. What they found may come as a surprise: despite enormous changes in American society, a child is actually more likely to remain within the fold than leave it, and even the nonreligious are more likely to follow their parents' example than to rebel. And while outside forces do play a role, the crucial factor in whether a child keeps the faith is the presence of a strong fatherly bond. Mixing unprecedented data with gripping interviews and sharp analysis, *Families and Faith* offers a fascinating exploration of what allows a family to pass on its most deeply-held tradition--its faith.

This timely volume explores the impact of dramatic social change that has disrupted established patterns of family life and human development in the countries of the Gulf Cooperation Council. It addresses several major deficits in knowledge regarding family issues in the Gulf countries, bringing a critical perspective to the emerging challenges facing families in this region. Lansford, Ben Brik, and Badahdah examine the role of urbanization, educational progress, emigration, globalization, and changes in the status of women on social change, as well as tackling issues related to marriage, fertility and parenthood, and family well-being. This book explores how family relationships and social policies can promote physical health, psychological well-being, social relationships, safety, cognitive development, and economic security in the Gulf countries, placing a unique emphasis on contemporary families in this region. *Families and Social Change in the Gulf Region* is essential reading for scholars from psychology, sociology, education, law, and public policy. It will also be of interest to graduate students in these disciplines.

A study of the structure, growth, and future of transnational human travel and communication. Increasingly, people travel and communicate across borders. Yet, we still know little about the overall structure of this transnational world. Is it really a fully globalized world in which everything is linked, as popular catchphrases like "global village" suggest? Through a sweeping comparative analysis of eight types of mobility and communication among countries worldwide—from migration and tourism to Facebook friendships and phone calls—*Mapping the Transnational World* demonstrates that our behavior is actually regionalized, not globalized. Emanuel Deutschmann shows that transnational activity within world regions is not so much the outcome of political, cultural, or economic factors, but is driven primarily by geographic distance. He explains that the spatial structure of transnational human activity follows a simple mathematical function, the power law, a pattern that also fits the movements of many other animal species on the planet. Moreover, this pattern remained extremely stable during the five decades studied—1960 to 2010. Unveiling proximity-induced regionalism as a major feature of planet-scale networks of transnational human activity, Deutschmann provides a crucial corrective to several fields of research. Revealing why a truly global society is unlikely to emerge, *Mapping the Transnational World* highlights the essential role of interaction beyond borders on a planet that remains spatially fragmented.

Religion is a major social institution in the United States. While the scientific community has experienced a resurgence in the idea that there are important linkages between religion and family life and religion and health outcomes, this area of study is still in its early stages of development, scattered across multiple disciplines, and of uneven quality. To date, no book has featured both reviews of the literature and new empirical findings that define this area for the present and set the agenda for the twenty-first century. *Religion, Families, and Health* fills this void by bringing together leading social scientists who provide a theoretically rich, methodologically rigorous, and exciting glimpse into a fascinating social institution that continues to be extremely important in the lives of Americans.

*Religion, Families, and Health* Princeton University Press

Despite America's famous "separation of Church and State," religion obviously holds an enormous influence on nearly all aspects of society. Prof. Falk looks at major traditional religious

groupings in the US and discusses how they influence the family, education, government, the economy, philanthropy, violence, music, and the media. Western society is becoming less religious, more secular, every day, as science answers some of the profound questions that inspired a belief in the supernatural. But society requires more than the laws of physics to hold it together, of course, and so far religion is the institution that has provided the most clear-cut moral guidelines, even for non-believers. Religion has also inspired many of our greatest artistic endeavors. But religion can also be used for crass commercial interests or worse, to divide people and fuel violence. Drawing parallels and contrasts between Catholicism, mainline Protestantism, and Judaism, Dr. Falk talks about history and philosophy, political campaigns, social movements, popular music, literature and life. He shows how religious traditions influence us and how they impact politics, social stratification and even the military.

### **FAMILY, RELIGION, AND SOCIAL CHANGE IN DIVERSE SOCIETIES**

Princeton University Press

Family and religion face a myriad of challenges in the modern age. Although many social theorists think these institutions would be greatly weakened or eliminated in the course of modernization, this book rejects that notion and demonstrates that both family and religion--no matter what significant transformations they may be undergoing--are nevertheless well rooted in societies throughout the world. The persistence and vitality of these two institutions contradict the secularization thesis or the family decline thesis. Though the importance of religion and family is manifested in different ways and in different contexts, these institutions are important virtually everywhere, in both the public and private spheres. *Family, Religion, and Social Change in Diverse Societies* deals with family and religion together, examining their unique relationship as institutions as well as the way in which they interact with other social institutions, including politics and economics. Authored by an

international group of scholars in sociology and anthropology, the fourteen essays are complex analyses of social change processes occurring within societies. Taking an inter-institutional perspective, each essay explores the special link between religion and family in a specific society. Together, the introduction and essays in the book cover societies on five continents, examining varying levels of economic development, diverse religious traditions, and differing degrees of cultural homogeneity. Providing informative and compelling studies, *Family, Religion, and Social Change in Diverse Societies* offers a good mix of both descriptive and statistical information. *The Behavioral and Social Sciences* John Wiley & Sons  
In the new edition of this widely praised text, Alan Aldridge examines the complex realities of religious belief, practice and institutions. Religion is a powerful and controversial force in the contemporary world, even in supposedly secular societies. Almost all societies seek to cultivate religions and faith communities as sources of social stability and engines of social progress. They also try to combat real and imagined abuses and excess, regulating cults that brainwash vulnerable people, containing fundamentalism that threatens democracy and the progress of science, and identifying terrorists who threaten atrocities in the name of religion. The third edition has been carefully revised to make sure it is fully up to date with recent developments and debates. Major themes in the revised edition include the recently erupted 'culture war' between progressive secularists and conservative believers, the diverse manifestations of 'fundamentalism' and their impact on the wider society, new individual forms of religious expression in opposition to traditional structures of authority, and the backlash against 'multiculturalism' with its controversial implications for the social integration of ethnic and religious minority communities. Impressive in its scholarly analysis of a vibrant and challenging aspect of human societies, the third edition will appeal strongly to students taking courses in the sociology of religion and religious studies, as well as to everyone interested in the place of religion in the contemporary world.
