The International Code on Intact Stability 2008 (2008 IS Code), presents mandatory and recommendatory stability criteria and other measures for ensuring the safe operation of ships, to minimize the risk to such ships, to the personnel on

board and to the environment. The 2008 IS Code took effect on 1 July 2010. The 2008 IS Code features: a full update of the previous IS Code; criteria based on the best state-of-the-art concepts available at the time they were developed, taking into account sound design and engineering principles and experience gained from operating ships; influences on intact stability such as the dead

ship condition, wind on ships with large windage area, rolling characteristics and severe seas. This publication also presents Explanatory Notes to the 2008 IS Code, intended to provide administrations and the shipping industry with specific guidance to assist in the uniform interpretation and application of the intact stability requirements of the 2008 IS Code.

 “[Red Notice] does for investing in Russia and the former Soviet Union what Liar’s Poker did for our understanding of Salomon Brothers, Wall

Street, and the mortgage-backed securities business in the 1980s. Browder’s business saga meshes well with the story of corruption and murder in Vladimir Putin’s Russia, making Red Notice an early candidate for any list of the year’s best books” (Fortune).  
 “Part John Grisham-like thriller, part business and political memoir.” —The New York Times This is a story about an accidental activist. Bill Browder started out his adult life as the Wall Street maverick whose instincts

led him to Russia just after the breakup of the Soviet Union, where he made his fortune. Along the way he exposed corruption, and when he did, he barely escaped with his life. His Russian lawyer Sergei Magnitsky wasn't so lucky: he ended up in jail, where he was tortured to death. That changed Browder forever. He saw the murderous heart of the Putin regime and has spent the last half decade on a campaign to expose it. Because of that, he became Putin's number one enemy,

especially after Browder succeeded in having a law passed in the United States—The Magnitsky Act—that punishes a list of Russians implicated in the lawyer's murder. Putin famously retaliated with a law that bans Americans from adopting Russian orphans. A financial caper, a crime thriller, and a political crusade, *Red Notice* is the story of one man taking on overpowering odds to change the world, and also the story of how, without intending to, he found meaning in his life.

"The Serbian cartoonist Aleksandar Zograf has created some of the most compelling comics of the last 15 years. His war stories about the 1990s in the former Yugoslavia, heartbreaking dissections of the cartoonist's inner and outer life as his world fell to pieces all around him, are as fine a group of testimonials as exists concerning the emotional and physical disruptions caused by proximity to death and destruction." -- Tom Spurgeon, *The*

Comics Reporter As the NATO bombs fell on his hometown of Panóđevo in 1999, Serbian cartoonist Aleksandar Zograf used his diary comics and e-mail to reach out to the world and offer a glimpse at the effects of the attacks. Over the weeks and months of the war, Zograf documented not only how the bombings shattered the lives of his friends and neighbors, but also how the routine of daily life remained unchanged. The most recent attacks on Pancevo's oil refinery are

contrasted with the latest local soccer matches -- and American propaganda flyers are as likely to fall from the sky as American comics are to arrive in the mail. In today's ratings-driven era of globetrotting correspondents and embedded reportage, *Regards From Serbia* rings with the truth of a man who had the headlines come to him, and offers a comprehensive account of the conflict as only a local could tell it.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a

concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.

 A devastating disaster at sea . . . an officer who refuses to hide the truth. . . a courtroom confrontation with far-reaching implications . . . The Perfect Storm meets A Civil Action in a gripping account of one of the most significant shipwrecks of the twentieth century. In 1983 the Marine Electric, a “reconditioned” World War II vessel, was on a

routine voyage thirty miles off the East Coast of the United States when disaster struck. As the old coal carrier sank, chief mate Bob Cusick watched his crew—his friends and colleagues—succumb to the frigid forty-foot waves and subzero winds of the Atlantic. Of the thirty-four men aboard, Cusick was one of only three to survive. And he soon found himself facing the most critical decision of his life: whether to stand by the Merchant Marine officers’ unspoken code of silence, or to tell the truth

about why his crew and hundreds of other lives had been unnecessarily sacrificed at sea. Like many other ships used by the Merchant Marine, the Marine Transport Line's Marine Electric was very old and made of “dirty steel” (steel with excess sulfur content). Many of these vessels were in terrible condition and broke down frequently. Yet the government persistently turned a blind eye to the potential dangers, convinced that the economic return on keeping these ships was

worth the risk. Cusick chose to blow the whistle. *Until the Sea Shall Free Them* re-creates in compelling detail the wreck of the *Marine Electric* and the legal drama that unfolded in its wake. With breathtaking immediacy, Robert Frump, who covered the story for the *Philadelphia Inquirer*, describes the desperate battle waged by the crew against the forces of nature. Frump also brings to life Cusick's internal struggle. He knew what happened to those who spoke out against the

system, knew that he too might be stripped of his license and prosecuted for "losing his ship," yet he forged ahead. In a bitter lawsuit with owners of the ship, Cusick emerged victorious. His expose of government inaction led to vital reforms in the laws regarding the safety of ships; his courageous stand places him among the unsung heroes of our time.

The last great undiscovered country is vast, wild, and weirder than you can possibly imagine. And it's nearby, waiting, accessible by the press of a button, or a simple gesture, or even just a thought. The Matrix holds a whole lot more than selfies and cat videos-it has artificial intelligences, electronic ghosts of people formerly alive (or perhaps still living), and deep wells of pure data that can swallow you whole. Oh, and a copy of every secret

ever recorded electronically. The possible rewards of exploration are great, and the dangers are greater. Data Trails is the Matrix sourcebook for Shadowrun, Fifth Edition, offering more options for decker and technomancer characters, including qualities, programs, gear and more. With detailed examinations of hacker culture, information on diving deep into immersive hosts, and briefings on the strange sites hidden in dark corners of the Matrix,

Data Trails is a vital resource for any Shadowrun players involved in the omnipresent flow of information. Non-Matrix specialists have chances to get in on the adventures as well, with game details explaining how their skills and expertise translate into the wild virtual world. Data Trails is for use with Shadowrun, Fifth Edition.

Ships operating in the Arctic and Antarctic environments are exposed to a number of unique risks. Poor weather conditions and the relative lack of good charts, communication systems and other navigational aids pose challenges for mariners. The remoteness of the areas makes rescue or clean-up operations difficult and costly. Cold temperatures may reduce the effectiveness of numerous components of the ship, ranging from deck machinery and

emergency equipment to sea suction. When ice is present, it can impose additional loads on the hull, propulsion system and appendages. The Guidelines for ships operating in polar waters aim at mitigating the additional risk imposed on shipping in the harsh environmental and climatic conditions that exist in polar waters. This publication should be of interest to maritime administrations, ship manufacturers, shipping companies, cruise and tour operators, education

institutes and others concerned with the safe operation of ships in polar waters.

Lost Sounds visits a number of lighthouses at different times over the last 130 years to reveal the philanthropic, scientific and romantic story of the fog signal - how it came about, how the machinery worked and, for the mariner and the keeper, what it sounded like! The development of fog signals complemented the

expansion of lighthouse construction worldwide from the last quarter of the 19th century and represented the attempt to provide a vital navigation aid to mariners when the beam of light from the lighthouse lens was obscured by fog. Lost Sounds reveals the

practical development of sound signals from the early percussion instruments to the later succession of compressed-air sirens and diaphones through to the last remaining electric emitters. But it is much more than that - it is a

record of another part of maritime history.
