The Western Heritage Since 1300 SAGE

This book makes two distinctive contributions to one of the most fundamental debates in modern European history. First, it presents readable and judicious accounts of the events and

decisions directly precipitating the outbreak of war in each of the main belligerent countries; second, it assesses the role of public opinion and popular mood in determining and responding to the 'July Crisis' of 1914. With a list of contributors who are all distinguished in different aspects of the subject, this stimulating survey covers the historiography of the immediate causes of the war, and includes new reflections on the character of the official and unofficial 'mentalités' during the last weeks of peace.

Contributors: Sir Michael Howard, Zbynek Zeman, R. J. W. Evans, D. W. Spring, Hartmut Pogge von Strandmann, Richard Cobb, and Michael Brock.

The Defender of the Peace of Marsilius of Padua is a massively influential text in the history of western political thought.

Marsilius offers a detailed analysis and explanation of human political communities, before going on to attack what he sees as the obstacles to peaceful human coexistence - principally the contemporary papacy. Annabel Brett's authoritative rendition of the Defensor Pacis was the first new translation in English for fifty years, and a major contribution to the series of Cambridge Texts: all of the usual series features are provided, included chronology, notes for further reading, and up-to-date annotation aimed at the student reader encountering this classic of medieval thought for the first time. This edition of The Defender of the Peace is a scholarly and a pedagogic event of great importance, of interest to historians, political theorists, theologians and philosophers at

all levels from second-year undergraduate upwards.

Linguists routinely emphasise the primacy of speech over writing. Yet, most linguists have analysed spoken language, as well as language in general, applying theories and methods that are best suited for written language. Accordingly, there is an extensive 'written language bias' in traditional and present day linguistics and other language sciences. In this book, this point is argued with rich and convincing evidence from virtually all fields of linguistics.

The Written Language Bias in Linguistics Corwin Press

This is a comprehensive survey of European history from the coup d'etat of Napoleon Bonaparte in France to the assassination of the Archduke Ferdinand at Sarajevo, which led to the First World War. It concentrates on the twin themes of revolution and nationalism, which often combined in the early part of the century but which increasingly became rival creeds. Going beyond traditional political and diplomatic history, the book incorporates the results of recent research on population movements, the expansion of markets, the accumulation of capital, social mobility, education, changing patterns of leisure, religious practices, and intellectual and artistic developments. The work falls into three chronological sections. The first, starting in 1800 (rather than the more usual 1815) follows the build-up of the revolutionary currents which were eventually going to erupt in the 'Year of Revolutions' 1848. The second, from 1850 to 1880, deals with the golden age of capitalism, the successful culmination of struggles for national unification, and the threat of anarchism. The concluding chapters look at the social and

political stresses caused by socialism and national minorities, at new attempts by government to order society, imperial rivalry, and the descent into a war which was to mark the end of nineteenth-century Europe. For this third edition, Dr Gildea has substantially revised the text and maps, and completely updated

the bibliography. Newly-added introductory sections guide the reader through the wealth of material in each chapter. The new edition also includes for the first time a full Chronology of the period, a list of leading state ministers, and family trees for all the major dynasties.
