### **TRANSLATING THE FEMALE SELF ACROSS CULTURES**

Cambridge Scholars  
Publishing

This collection of essays brings together a decade of writings on translation by leading international translation studies expert, Susan Bassnett. The essays cover a range of topics and will be useful to anyone with an interest in how different cultures communicate.

#### **Translating Poetry**

Routledge

His book investigates the problems and possibilities in the translation of literature, especially poetry. The investigation is based on a comparison between Catullus' sixty-fourth poem and English translations of it published between 1870 and 1970. Several strategies for translating are analyzed, and their comparative merits and faults are

discussed. The book also tries to describe the position translation and translation studies should occupy in the wider context of the study of comparative literature. -- from publisher description.

*Reflections on Translation*  
Multilingual Matters

This major new introduction to comparative literature is for the students coming to the subject for the first time. Through an examination of a series of case studies and new theoretical developments, Bassnett reviews the current state of comparative literature world-wide in the 1990s. In the past twenty years of a range of new developments in critical theory have changed patterns of reading and approaches to literature: gender-based criticism, reception studies, the growth of translation studies, deconstruction and orientalism all have had a profound impact on work in comparative literature. Bassnett asks questions not only about

the current state of comparative literature as a discipline, but also about its future. Since its beginnings in the nineteenth century, comparative literature has been closely associated with the emergence of national cultures, and its present expansion in many parts of the world indicates that this process is again underway, after a period of narrowly Eurocentric research in the field.

#### **Diaspora as translation and decolonisation**

Routledge

Even before the biblical canon became fixed, writers have revisited and reworked its stories. The author of Joshua takes the haphazard settlement of Israel recorded in the Book of Judges and retells it as an orderly military conquest. The writer of Chronicles expurgates the David cycle in Samuel I and II, offering an upright and virtuous king devoid of baser instincts. This literary phenomenon is not contained to inner-biblical exegesis. Once the telling becomes

known, the retellings begin: through the New Testament, rabbinic midrash, medieval mystery plays, medieval and Renaissance poetry, nineteenth century novels, and contemporary literature, writers of the Western world have continued to occupy themselves with the biblical canon. However, there exists no adequate vocabulary-academic or popular, religious or secular, literary or theological-to describe the recurring appearances of canonical figures and motifs in later literature. Literary critics, bible scholars and book reviewers alike seek recourse in words like adaptation, allusion, echo, imitation and influence to describe what the author, for lack of better terms, has come to call retellings or recastings. Although none of these designations rings false, none approaches precision. They do not tell us what the author of a novel or poem has done with a biblical figure, do not signal how this newly recast figure is different from other recastings of it, and do not offer any indication of why these transformations have occurred. Sustaining Fictions sets out to

redress this problem, considering the viability of the vocabularies of literary, midrashic, and translation theory for speaking about retelling. Empire of Texts in Motion Routledge

The most important and productive statements on the translation of literature from Roman times to the 1920s are collected in this book. Arranged thematically around the main topics which recur over the centuries - power, poetics, universe of discourse, language, education - it contains texts previously unavailable in English, and translated here for the first time from classical, Medieval, and Renaissance Latin, from French and from German. As the first survey of its kind in both scope and selection it argues that translation commands a central position in the shaping of European literatures and cultures.

^Translation/History/Culture creates a framework for further study of the history of translation in the West by tracing European historical thought about translation, and discussing the topicality of many of the texts included.

**Translation Practices**  
Multilingual Matters

Lefevere explores how the process of rewriting works of literature manipulates them to ideological and artistic ends, so that the rewritten text can be given a new, sometimes subversive, historical or literary status.

### **THE ROUTLEDGE HANDBOOK OF TRANSLATION AND CULTURE**

BRILL

A Companion to Translation Studies is the first work of its kind. It provides an authoritative guide to key approaches in translation studies. All of the essays are specially commissioned for this collection, and written by leading international experts in the field. The book is divided into nine specialist areas: culture, philosophy, linguistics, history, literary, gender, theatre and opera, screen, and politics. Contributors include Susan Bassnett, Gunilla Anderman and Christina Schäffner. Each chapter gives an in-depth account of theoretical concepts, issues and debates which define a field within translation studies, mapping out past trends and suggesting how research might develop in the future. In their general

introduction the editors illustrate how translation studies has developed as a broad interdisciplinary field. Accompanied by an extensive bibliography, this book provides an ideal entry point for students and scholars exploring the multifaceted and fast-developing discipline of translation studies.

### **Feminist Experiences**

Psychology Press

By the turn of the twentieth century, Japan's military and economic successes made it the dominant power in East Asia, drawing hundreds of thousands of Chinese, Korean, and Taiwanese students to the metropole and sending thousands of Japanese to other parts of East Asia. The constant movement of peoples, ideas, and texts in the Japanese empire created numerous literary contact nebulae, fluid spaces of diminished hierarchies where writers grapple with and transculturate one another's creative output. Drawing extensively on vernacular sources in Japanese, Chinese, and Korean, this book analyzes the most active of these contact nebulae: semicolonial Chinese, occupied Manchurian, and colonial Korean and Taiwanese

transculturations of Japanese literature. It explores how colonial and semicolonial writers discussed, adapted, translated, and recast thousands of Japanese creative works, both affirming and challenging Japan's cultural authority. Such efforts not only blurred distinctions among resistance, acquiescence, and collaboration but also shattered cultural and national barriers central to the discourse of empire. In this context, twentieth-century East Asian literatures can no longer be understood in isolation from one another, linked only by their encounters with the West, but instead must be seen in constant interaction throughout the Japanese empire and beyond.

### **Language, Culture and Power**

Taylor & Francis  
Praise for the previous edition of the *Encyclopedia of Translation Studies*: 'Translation has long deserved this sort of treatment. Appropriate for any college or university library supporting a program in linguistics, this is vital in those institutions that train students to become translators.' - Rettig on

### Reference

'Congratulations should be given to Mona Baker for undertaking such a mammoth task and...successfully pulling it off. It will certainly be an essential reference book and starting point for anyone interested in translation studies.' - ITI Bulletin  
'This excellent volume is to be commended for bringing together some of [its] most recent research. It provides a series of extremely useful short histories, quite unlike anything that can be found elsewhere. University teachers will find it invaluable for preparing seminars and it will be widely used by students.' - The Times Higher Education Supplement  
'... a pioneering work of reference ...'-  
Perspectives on Translation  
The Routledge Encyclopedia of Translation Studies has been the standard reference in the field since it first appeared in 1998. The second, extensively revised and extended edition brings this unique resource up-to-date and offers a thorough, critical and authoritative account of one of the fastest growing disciplines in the

humanities. The Encyclopedia is divided into two parts and alphabetically ordered for ease of reference. Part One (General) covers the conceptual framework and core concerns of the discipline. Categories of entries include: central issues in translation theory (e.g. equivalence, translatability, unit of translation) key concepts (e.g. culture, norms, ethics, ideology, shifts, quality) approaches to translation and interpreting (e.g. sociological, linguistic, functionalist) types of translation (e.g. literary, audiovisual, scientific and technical) types of interpreting (e.g. signed language, dialogue, court). New additions in this section include entries on globalisation, mobility, localization, gender and sexuality, censorship, comics, advertising and retranslation, among many others. Part Two (History and Traditions) covers the history of translation in major linguistic and cultural communities. It is arranged alphabetically by linguistic region. There are entries on a wide range of languages which include Russian, French, Arabic, Japanese, Chinese

and Finnish, and regions including Brazil, Canada and India. Many of the entries in this section are based on hitherto unpublished research. This section includes one new entry: Southeast Asian tradition. Drawing on the expertise of over 90 contributors from 30 countries and an international panel of consultant editors, this volume offers a comprehensive overview of translation studies as an academic discipline and anticipates new directions in the field. The contributors examine various forms of translation and interpreting as they are practised by professionals today, in addition to research topics, theoretical issues and the history of translation in various parts of the world. With key terms defined and discussed in context, a full index, extensive cross-references, diagrams and a full bibliography the Routledge Encyclopedia of Translation Studies is an invaluable reference work for all students and teachers of translation, interpreting, and literary and social theory. Mona Baker is Professor of Translation Studies at the University of Manchester,

UK. She is co-founder and editorial director of St Jerome Publishing, a small press specializing in translation studies and cross-cultural communication. Apart from numerous papers in scholarly journals and collected volumes, she is author of *In Other Words: A Coursebook on Translation* (Routledge 1992), *Translation and Conflict: A Narrative Account* (2006) and *Founding Editor of The Translator: Studies in Intercultural Communication* (1995), a refereed international journal published by St Jerome since 1995. She is also co-Vice President of the International Association of Translation and Intercultural Studies (IATIS). Gabriela Saldanha is Lecturer in Translation Studies at the University of Birmingham, UK. She is founding editor (with Marion Winters) and current member of the editorial board of *New Voices in Translation Studies*, a refereed online journal of the International Association of Translation and Intercultural Studies, and co-editor (with Federico Zanettin) of *Translation Studies Abstracts and Bibliography of Translation Studies*.

### **Translation, Power, Subversion** Taylor & Francis

In a time when millions travel around the planet; some by choice, some driven by economic or political exile, translation of the written and spoken word is of ever increasing importance. This guide presents readers with an accessible and engaging introduction to the valuable position translation holds within literature and society. Leading translation theorist, Susan Bassnett traces the history of translation, examining the ways translation is currently utilised as a burgeoning interdisciplinary activity and considers more recent research into developing technologies and new media forms. Translation displays the importance of translation across disciplines, and is essential reading for students and scholars of translation, literary studies, globalisation studies, and ancient and modern languages.

### **TRANSLATION AND IDENTITY IN THE AMERICAS**

McGill-Queen's Press - MQUP  
The Routledge Handbook

of Translation and Culture collects into a single volume thirty-two state-of-the-art chapters written by international specialists, overviewing the ways in which translation studies has both informed, and been informed by, interdisciplinary approaches to culture. The book's five sections provide a wealth of resources, covering both core issues and topics in the first part. The second part considers the relationship between translation and cultural narratives, drawing on both historical and religious case studies. The third part covers translation and social contexts, including the issues of cultural resistance, indigenous cultures and cultural representation. The fourth part addresses translation and cultural creativity, citing both popular fiction and graphic novels as examples. The final part covers translation and culture in professional settings, including cultures of science, legal settings and intercultural businesses. This handbook offers a wealth of information for advanced undergraduates, postgraduates and

researchers working in translation and interpreting studies. *Translation Studies* Bloomsbury Publishing Translation is a highly contested site in the Americas where different groups, often with competing literary or political interests, vie for space and approval. In its survey of these multiple and competing groups and its study of the geographic, socio-political and cultural aspects of translation, Edwin Gentzler's book demonstrates that the Americas are a fruitful terrain for the field of translation studies. Building on research from a variety of disciplines including cultural studies, linguistics, feminism and ethnic studies and including case studies from Brazil, Canada and the Caribbean, this book shows that translation is one of the primary means by which a culture is constructed: translation in the Americas is less something that happens between separate and distinct cultures and more something that is capable of establishing those very cultures. Using a variety of texts and addressing minority and oppressed groups within cultures, Translation and Identity in

the Americas highlights by example the cultural role translation policies play in a discriminatory process: the consequences of which can be social marginalization, loss of identity and psychological trauma. Translation and Identity the Americas will be critical reading for students and scholars of Translation Studies, Comparative Literature and Cultural Studies. Translation, Linguistics, Culture Routledge

This book takes a linguistic approach to translation issues, looking first at the structural view of language that explains the difficulty of translation and at theories of cultural non-equivalence. A subsequent chapter on text types, readership and the translator's role completes the theoretical framework. The linguistic levels of analysis are then discussed in ascending order, from morpheme up to sentence, while a summarising chapter considers various translation types and strategies, again considered in relation to text type, author and reader.

Explores postcolonial discourse from the

*Constructing Cultures*  
Routledge

Translating the Female Self across Cultures examines contemporary autobiographical narratives and their Italian and French translations. The comparative analyses of the texts are underpinned by the latest developments in Translation Studies that place emphasis on identity construction in translation and the role of translation in moulding various types of identity. They focus on how the writers' textual personae make sense of their sexual, artistic and post-colonial identities in relation to the mother and how the mother-daughter dyad survives translation into the Italian and French social, political and cultural contexts. The book shows how each target text activates different cultural literary, linguistic and rhetorical frames of reference which cast light on the facets of the protagonists' quest for identity: the cult of the Madonna; humour and irony; gender and class; mimesis and storytelling; performativity and geographical sense of self. The book highlights

the fruitfulness of studying women's narratives and their translations, and the polyphonic dialogue between the translations and the literary and theoretical productions of the French and Italian cultures.

Ovid and the Cultural Politics of Translation in Early Modern England  
Taylor & Francis

In *Ovid and the Cultural Politics of Early Modern England*, Liz Oakley-Brown considers English versions of the *Metamorphoses* - a poem concerned with translation and transformation on a multiplicity of levels - as important sites of social and historical difference from the fifteenth to the early eighteenth centuries. Through the exploration of a range of canonical and marginal texts, from Shakespeare's *Titus Andronicus* to women's embroideries of Ovidian myths, Oakley-Brown argues that translation is central to the construction of national and gendered identities.

## **SUSTAINING FICTIONS**

BRILL

The contemporary fields of the study of culture, the humanities and the social sciences are

unfolding in a dynamic constellation of cultural turns. This book provides a comprehensive overview of these theoretically and methodologically groundbreaking reorientations. It discusses the value of the new focuses and their analytical categories for the work of a wide range of disciplines. In addition to chapters on the interpretive, performative, reflexive, postcolonial, translational, spatial and iconic turns, it discusses emerging directions of research. Drawing on a wealth of international research, this book maps central topics and approaches in the study of culture and thus provides systematic impetus for changed disciplinary and transdisciplinary research in the humanities and beyond – e.g., in the fields of sociology, economics and the study of religion. This work is the English translation by Adam Blauhut of an influential German book that has now been completely revised. It is a stimulating example of a cross-cultural translation between different theoretical cultures and also the first critical synthesis of cultural turns

in the English-speaking world.

### **RECLAIMING ROMEO AND JULIET**

Routledge  
British Studies' and 'British Cultural Studies' cover a wide range of facets of contemporary Britain. Studying British Cultures: An Introduction is a unique collection of essays which examine the most significant aspects of this quickly developing area of study, analyzing the ways of teaching and reading British culture. The work covers the contemporary and key issues, including: the terminological distinction between 'British Studies' and 'British Cultural Studies' the problem of national cultures and identities in contemporary Britain studying language and literature from a British Studies perspective models for studying the historical context of the development of ideas of 'Britishness' studying contemporary Britain overseas The contributors are some of the key names in current debates surrounding British Studies, and Susan Bassnett holds together their work with a substantial and accessible introduction. Studying

British Cultures: An Introduction will be essential reading for students and teachers concerned with the study of contemporary Britain. *Reading the Abrahamic Faiths Multilingual Matters* This is a study of the relationship between translation, culture and counterculture, presenting a political and ideological vision of translating. Offering an approach to the cultural turn in Translation Studies at the end of the century, the book endeavours to explore the closer links between cultural studies and translation. It presents the arguments of several scholars on the most innovative ways of understanding translation, in order to clarify the role and function of translations and translators in culture and society. *A Companion to Translation Studies Multilingual Matters* In the late 1970s a new academic discipline was born: Translation Studies. We could not read literature in translation, it was argued, without asking ourselves if linguistic and cultural phenomena really were 'translatable' and exploring in some depth the concept of

'equivalence'. When Susan Bassnett's *Translation Studies* appeared in the *New Accents* series, it quickly became the essential introduction to this new subject. Susan Bassnett tackles the crucial problems of translation and offers a history of

translation theory, beginning with the ancient Romans and encompassing key twentieth-century structuralist work. She then explores specific problems of literary translation through a close, practical analysis of texts, and completes her book with extensive

suggestions for further reading. Twenty years after publication, the field of translation studies continues to grow. Updated for the second time, Susan Bassnett's *Translation Studies* remains essential reading for anyone new to the field.
