Planning And Management By For the
construction phase and activities linked to
it, a contractor can prepare a construction
management plan to detail the project
schedule and costs. It includes the timing
of the individual construction tasks,
breakdowns of the projected costs (and,
therefore, the projected profitability), and
information about technologies and
materials to be used. 3 Types of
Construction Management
Plans Construction project planning is the
function in which project and construction
managers and their key staff members
prepares the master plan. Then this
master plan is put into time schedule by
scheduling people which is called project
scheduling. A project plan is mostly
responsible for the success or failure of

the project. How to Plan a Construction
Project and Types of Planning Construction
planning is a fundamental and challenging
activity in the management and execution
of construction projects. It involves the
choice of technology, the definition of
work tasks, the estimation of the required
resources and durations for individual
tasks, and the identification of any
interactions among the different work
tasks. Project Management for
