-A student-friendly, self-directed guide to service-learning-Develops the skills needed to succeed - Clearly links service-learning to the learning goals of the course-Combines self-study and peer-study workbook formats with activities that can be incorporated in class, to give teachers maximum flexibility in structuring their service-learning courses-Promotes independent and collaborative learning -Equally suitable for courses of a few weeks' or a few months' duration-Shows students how to assess progress and communicate end-results-Low priced-the ideal companion to disciplinary course readings-Methodology and activities extensively tested at Portland State University-Written for students participating in service-learning as a class, but also suitable for students working individually on a project This book is intended as a self-directed guide for college-level students who are engaged in service-learning. Though addressed principally to students participating in service-learning as a class, it is also suitable for students working individually. The authors' goals are to enable the reader to derive the greatest benefit from the experience - in terms of providing meaningful service to the community partner, developing his or her skills and knowledge, and connecting back what she or he learns to course objectives and the framework of their discipline. Service-learning requires students to take on new roles and to pursue learning in ways fundamentally different from traditional courses. This book begins by setting the context, explaining the differences between service and volunteerism and linking service-learning to the larger issues of citizenship and democracy. It then provides activities, exercises and other resources to develop students' skills of reflection, teamwork and cultural competence; and to help them plan, work with community partners, exercise leadership and manage change. The authors provide a framework for students to assess their progress and communicate final results to all stakeholders. By linking service-learning to the learning goals of the student's course, this workbook constitutes the ideal companion to disciplinary course readings. It is equally suitable for courses of a few weeks' or a few months' duration. The exercises can be undertaken by the students by themselves, or together with their peers, and can be incorporated as class activities by the teacher. This succinct and conversationally-written guide will engage and motivate your students while developing the skills to succeed in their service-learning.

*The Craft of Community-Engaged Teaching and Learning* Georgetown University Press

Written by scholars who have been at the forefront of the NPG debate as well as by scholar-practitioners, this book provides lessons learned from experience on how networked, contract-based and partnership-centered approaches to government can be undertaken in ways that preserve the values at the center of the American constitutional and political system.

*New Public Governance* Taylor & Francis

This authoritative volume provides state-of-the-art practices for supporting the approximately 20% of today's K-12 students who have emotional and behavioral disorders (EBD) that hinder school success. Leading experts present evidence-based approaches to screening, progress monitoring, intervention, and instruction within a multi-tiered framework. Coverage encompasses everything

from early intervention and prevention to applications for high-risk adolescents. Exemplary programs are described for broad populations of EBD students as well as those with particular disorders, including autism spectrum disorders and externalizing behavior problems. The book combines theory and research with practical information on how to select interventions and implement them with integrity.

Service learning offers students the unique opportunity to learn both in the classroom and in the real world. This exciting teaching strategy, detailed in Berman's second edition of *Service Learning*, motivates students to learn content information, processes, and skills while making authentic connections to their surrounding community. This valuable resource explains the benefits of service learning and provides a step-by-step guide for using the instructional model. It features nine service-learning projects that are broken down into basic, intermediate, and advanced levels. Each project features: - Strategies for aligning service and curricular goals - Tips for involving students in decision-making - Guidelines for managing different phases of the project - Activities that foster reflection and self-evaluation - Tips for differentiating by tapping into multiple intelligences In this single resource, teachers will find everything they need to successfully implement service learning projects, helping students gain deeper understandings of content while positively impacting their communities.

Using a new model focused on four core capacities-intellectual complexity, social location, empathetic accountability, and motivated action--*Teaching Civic Engagement* explores the significance of religious studies in fostering a vibrant, just, and democratic civic order. In the first section of the book, contributors detail this theoretical model and offer an initial application to the sources and methods that already define much teaching in the disciplines of religious studies and theology. A second section offers chapters focused on specific strategies for teaching civic engagement in religion classrooms, including traditional textual studies, reflective writing, community-based learning, field trips, media analysis, ethnographic methods, direct community engagement and a reflective practice of "ascetic withdrawal." The final section of the volume explores theoretical issues, including the delimitation of the "civic" as a category, connections between local and global in the civic project, the question of political advocacy in the classroom, and the role of normative commitments. Collectively these chapters illustrate the real possibility of connecting the scholarly study of religion with the societies in which we, our students, and our institutions exist. The contributing authors model new ways of engaging questions of civic belonging and social activism in the religion classroom, belying the stereotype of the ivory tower intellectual.

Event marketing is big business: U.S. corporations invest more than \$300 billion a year in every kind of event-from webinars, tradeshow, product launches, and golf hospitality functions, to user groups and customer conferences. In *The Event Marketing Handbook*, industry expert Allison Saget shows marketing professionals how to maximize return on investment for the dollars their companies spend on events. She believes that event marketing is a strategic, dynamic discipline linked to a firm's business objectives and sales goals. The key, according to Saget, is a great BLT-Brand

recognition, Lead generation, and Thought leadership. In this A-to-Z guide, Saget shows professionals how to drive results through integrated marketing activities, such as advertising, direct mail, and public relations. She also answers crucial questions like: "How do I reach my target audiences?" "Why and when should we use celebrities at our events?" and "How do I plan a press and analyst program within an event?" Packed with case studies, planning templates, sample time frames, event programs, and names of associations, *The Event Marketing Handbook* is designed for every marketer who wants to think strategically, remember the fundamentals, plan carefully, and achieve results. Beginners and seasoned veterans alike should own this book. Highlights In *The Event Marketing Handbook*, readers will discover:

- An end-to-end process, from planning through measurement
- Cautionary advice to help them avoid pitfalls and problems
- Myriad tricks of the trade from industry insiders, such as event producers, management companies, exhibit houses, and event moguls

*Service-Learning Essentials* is the resource you need to help you develop high-quality service-learning experiences for college students. Written by one of the field's leading experts and sponsored by Campus Compact, the book is the definitive work on this high-impact educational practice. Service-learning has been identified by the Association of American Colleges and Universities as having been widely tested and shown to be beneficial to college students from a wide variety of backgrounds. Organized in an accessible question-and-answer format, the book responds clearly and completely to the most common questions and concerns about service-learning. Each chapter addresses issues related to individual practice as well as to the collective work of starting and developing a service-learning center or program, with examples drawn from a variety of disciplines, situations, and institutional types. The questions range from basic to advanced and the answers cover both the fundamentals and complexities of service-learning. Topics include:

- Determining what service-learning opportunities institutions should offer
- How to engage students in critical reflection in academic courses and in cocurricular experiences
- Best practices for developing and sustaining mutually beneficial campus-community partnerships
- Integrating service-learning into the curriculum in all disciplines and at all levels, as well as various areas of student life outside the classroom
- Assessing service-learning programs and outcomes
- The dilemmas of service-learning in the context of power and privilege
- The future of service-learning in online and rapidly globalizing

environments Service-learning has virtually limitless potential to enable colleges and universities to meet their goals for student learning while making unique contributions to addressing unmet local, national, and global needs. However, in order to realize these benefits, service-learning must be thoughtfully designed and carefully implemented. This easy-to-use volume contains everything faculty, leaders, and staff members need to know about service-learning to enhance communities, improve higher education institutions, and educate the next generation of citizens, scholars, and leaders.

### **SERVICE LEARNING**

W. H. Freeman

This is a practical guide to designing, teaching, and coordinating service-learning courses, and for developing reciprocal community partnerships and community-based research through a lens of equity that addresses the endemic racial, social, economic, and environmental disparities across society. The text provides a comprehensive framework for developing both in-person and on-line service-learning, with a chapter on virtual delivery of courses that integrates the principles and practices described throughout the book. The authors uniquely integrate the how-to of conducting service-learning with the theoretical foundations to enact effective, equitable, and inclusive community engagement. Given this moment of enormous social inequality and divisiveness, the authors offer a new definition and set of educational principles that they characterize as Equity-Centered Community Engagement Excellence. These principles serve to guide academic and community engagement that is democratic, recognizes the voice and expertise of community partners, addresses the power imbalances between communities and academic institutions, and develops an educational experience that is potentially transformative and promotes civic responsibility. Informed by the literature of critical service-learning, critical race theory, intercultural communication theory, and social-constructivism, this book attempts to deconstruct the assumption of the preeminence of academic knowledge to reconstruct a new operational paradigm of equity-centeredness that validates community capacity to guide faculty in their redesign of service-learning curriculum, activities, collaborations, and scholarship. It is based on the principles of:

- Student Agency (demonstrated as enhanced skills, knowledge, and motivation)
- Community Efficacy (recognition of community assets and capacity-building)
- Scholarly Advocacy (leveraging evidence-based research-based for equity-centered learning, serving, and social justice)

The authors offer examples of syllabi, lessons and assignments, reflection questions, evaluation rubrics, as well as an array of teaching tips that illustrate strategies for use in the classroom and in the field. The book is addressed to faculty embarking on service-learning and to seasoned scholar practitioners looking for innovative ideas, as well as to campus administrators who coordinate community outreach or college student volunteer services, offering guidance on leveraging resources and fiscal support from external stakeholders. It is also designed to serve as a resource for professional development workshops and faculty scholar learning communities. It offers a rich compendium of ideas and examples from which faculty and practitioners can select exercises and elements to incorporate or adapt for their courses, whether designing short-term engagements or extended service-learning programs.

*Liberating Service Learning and the Rest of Higher Education Civic Engagement* Springer

Whether you are an expert or novice in developing community-campus civic engagement and service-learning collaborations, this Guide offers insights and strategies to leverage student learning and community empowerment for the benefit of both parties. Recognizing both the possibilities and the pitfalls of community-campus collaborations, it demystifies the often confusing terminology of education, explains how to locate the right individuals on campus, and addresses issues of mission, expectations for roles, tasks, training, supervision, and evaluation that can be fraught with miscommunication and misunderstanding. Most importantly it provides a model for achieving full reciprocity in what can be an unbalanced relationship between community and campus partners so that all stakeholders can derive the maximum benefit from their collaboration. Buying as a set reduces the individual book price to \$14.25 (a 20% saving) for a six copy set, and \$12.50 (a 30% saving) for a 12 copy set. This set is intended to facilitate this Guide's use in planning, for community partner orientation programs and to establish common purpose and understanding for partners, faculty, and administrators alike.

reviews of the book: "The structure of the book is great. [The authors use] language that helps the reader become engaged and invites them to start applying what they have learned to their situation immediately. The examples of the journal articles with the notations are very helpful and we use these for discussion in the class quite a bit. I also like the 'reviewing what we've learned' and 'practicing your skills' at the end of the chapter. I much prefer the consumer approach of this text over others on the market." -- Candyce Reynolds, Portland State University "Understanding Research is true to its name; it is much more user friendly, it explains WHAT research IS. It does an EXCELLENT job of covering all of the material I currently cover. [The authors] (fortunately) force me to provide a balanced, comparative description of both [quantitative and qualitative] research. . . . I find the writing style to be clear, interesting and engaging. " -- Carol A. This text examines the family through two lenses - the familiar private family in which we live most of our personal lives, and the public family in which we, as adults, deal with broader societal issues such as raising the next generation and the care of the elderly. Consequently the selected readings look both at intimate personal concerns, such as whether to marry, as well as societal concerns, such as governmental policies that affect families. The author introduces each chapter, providing helpful lead-ins to the readings that follow. The 32 readings in this edition are comprised of a well-balanced mix of highly accessible selections from the popular press as well as articles from scholarly journals. This reader serves as an excellent companion to other texts in the sociology of marriage and the family and as a useful source of information on its own. It is an excellent supplement to Cherlins text, *Public and Private Families: An Introduction*. Its 16 chapters, which address contemporary issues such as the history of the family, welfare and welfare reform, divorce and step-parenting are keyed to the 16 chapters in Cherlins text.

**Learning Through Serving** Guilford Publications

This substantially expanded new edition of this widely-used and acclaimed text maintains the objectives and tenets of the first. It is designed to help students understand and reflect on their community service experiences both as individuals and as citizens of communities in need of their compassionate expertise. It is designed to assist faculty in facilitating student development of compassionate expertise through the context of service in applying disciplinary knowledge to community issues and challenges. In sum, the book is about how to make academic sense of civic service in preparing for roles as future citizen leaders. Each chapter has been developed to be read

and reviewed, in sequence, over the term of a service-learning course. Students in a semester course might read just one chapter each week, while those in a quarter-term course might need to read one to two chapters per week. The chapters are intentionally short, averaging 8 to 14 pages, so they do not interfere with other course content reading. This edition presents four new chapters on Mentoring, Leadership, Becoming a Change Agent, and Short-Term Immersive and Global Service-Learning experiences. The authors have also revised the original chapters to more fully address issues of social justice, privilege/power, diversity, intercultural communication, and technology; have added more disciplinary examples; incorporated additional academic content for understanding service-learning issues (e.g., attribution theory); and cover issues related to students with disabilities, and international students. This text is a student-friendly, self-directed guide to service-learning that: Develops the skills needed to succeed Clearly links service-learning to the learning goals of the course Combines self-study and peer-study workbook formats with activities that can be incorporated in class, to give teachers maximum flexibility in structuring their service-learning courses Promotes independent and collaborative learning Equally suitable for courses of a few weeks' or a few months' duration Shows students how to assess progress and communicate end-results Written for students participating in service learning as a class, but also suitable for students working individually on a project. Instructor's Manual This Instructor Manual discusses the following six key areas for aligning your course with use of Learning through Serving, whether you teach a senior-level high school class, freshman studies course, or a college capstone class: 1. Course and syllabus design 2. Community-partner collaboration 3. Creating class community 4. Strategic teaching techniques 5. Developing intercultural competence 6. Impact assessment

*Engaging the Age of Jane Austen* Temple University Press

Annotation A college student wants to lead a campaign to ban a young adult novel from his child's elementary school as his service-learning project in a children's literature course. Believing the book is offensive to religious sensibilities, he sees his campaign as a service to children and the community. Viewing such a ban as limiting freedom of speech and access to information, the

students professor questions whether leading a ban qualifies as a service project. If the goal of service is to promote more vital democratic communities, what should the student do? What should the professor do? How do they untangle competing democratic values? How do they make a decision about action? This book addresses the teaching dilemmas, such as the above, that instructors and students encounter in service-learning courses. Recognizing that teaching, in general, and service-learning, in particular, are inherently political, this book faces up to the resulting predicaments that inevitably arise in the classroom. By framing them as a vital and productive part of the process of teaching and learning for political engagement, this book offers the reader new ways to think about and address seemingly intractable ideological issues. Faculty encounter many challenges when teaching service learning courses. These may arise from students' resistance to the idea of serving; their lack of responsibility, wasting clients and community agencies' time and money; the misalignment of community partner expectations with academic goals; or faculty uncertainty about when to guide students' experiences and when direct intervention is necessary. In over twenty chapters of case studies, faculty scholars from disciplines as varied as computer science, engineering, English, history, and sociology take readers on their and their students' intellectual journeys, sharing their messy, unpredictable and often inspiring accounts of democratic tensions and trials inherent in teaching service-learning. Using real incidents and describing the resources and classroom activities they employ they explore the democratic intersections of various political beliefs along with race/ethnicity, class, gender, ability, sexual orientation, and other lived differences and likenesses that students and faculty experience in their service-learning classroom and extended community. They share their struggles of how to communicate and interact across the divide of viewpoints and experiences within an egalitarian and inclusive environment all the while managing interpersonal tensions and conflicts among diverse people in complex, value-laden situations. The experienced contributors to this book offer pedagogical strategies for constructing service-learning courses, and non-prescriptive approaches to dilemmas for which there can be no definitive solutions.
