**Treaties, Conventions, Collision, Rules and Regulations** International Labour Organization Reports, Documents, and Journals of the U.S. Senate and House of Representatives.

**Executive** Martinus Nijhoff Publishers

This calendar, with illustrations, is a reference service focusing on multilateral treaties concluded by more than two parties. It covers a period of almost 350 years of multilateral diplomacy, from the Peace of Westphalia of 1648 to the end of 1995. It lists chronologically all multilateral treaties concluded during that period, provides information on the location of their printed text in various collections (with parallel citations), adds data on duration, depository arrangements, & status, & provides extensive notes on their amendment, modification, extension, termination, & other details (with related references). It ends with appendices & a detailed index.

Journal of the Executive Proceedings of the Senate of the United States of America Food & Agriculture Org.

This book provides an overview of contemporary trends and challenges in maritime energy management (MEM). Coordinated action is necessary to achieve a low carbon and energy-efficient maritime future, and MEM is the prevailing framework aimed at reducing greenhouse gas emissions resulting from maritime industry activities. The book familiarizes readers with the status quo in the field, and paves the way for finding solutions to perceived challenges. The 34 contributions cover six important aspects: regulatory framework; energy-efficient ship design; energy efficient ship and port operation; economic and social dimensions; alternative fuels and wind-assisted ship propulsion; and marine renewable energy. This pioneering work is intended for researchers and academics as well as practitioners and policymakers involved in this important field.

Twenty-eighth (maritime) Session of the International Labor Conference BRILL

The texts of the Guidelines for flag State inspections under the Maritime Labour Convention, 2006 and Guidelines for port State control officers carrying out inspections under the Maritime Labour Convention, 2006 are to be submitted to the 303rd Session (November 2008) of the ILO Governing Body which is expected to take a decision on its publication.

### OFFICIAL BULLETIN

IMO Publishing

This volume provides a detailed legal analysis of the fourth pillar of the international maritime regulatory regime, the comprehensive Maritime Labour Convention, 2006, and its provisions to achieve decent work for seafarers and a level playing field for shipowners.

The Maritime Labour Convention, 2006 Springer

The importance of international maritime labour law - both as a component of - ternational maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years. Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the - ternational Labour Organization, the International Transport Workers' Federation, and the German Shipowners' Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals: Responsible S- powners Reliable Seafarers. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders. Institutionally, the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the International Labour Organization. It has to be said that whilst this effort achieved great progress, it has led to a haphazard, plethora of legal instruments.

**Maritime Work Law Fundamentals: Responsible Shipowners, Reliable Seafarers** IMO

Publishing

Accidents involving ships often result in deaths, loss of ships and damage to the marine environment, and they are a fact of modern times. Such accidents can be traced in part to the growth and changing nature of seaborne commerce. Equally significant, however, are the changes in labour conditions for seafarers and the problem of sub-standard ships. These guidelines are intended to assist those concerned with labour and social conditions on board ship, to help ensure that the relevant international labour standards are complied with, and to minimize the risk of accidents caused by not fulfilling these standards.

General Report and Observations Concerning Particular Countries International Labour Organization

This three-volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this a uniquely comprehensive study of this fundamental area of international law. Volume II: Shipping Law provides a detailed understanding of the historical development of shipping law looking at concepts, sources, and international organisations relating to shipping law; nationality, registration and ownership of ships; ship sale and shipping contracts; ship management and ship finance; arrest of ships; international trade and shipping documents; carriage of goods, passengers and their luggage by sea; maritime labour law; law of maritime safety; law of marine collisions; law of salvage; law of wrecks; law of general average; law of towage; law of harbours and pilotage; limitation of liability for maritime claims; and law of marine insurance. Volume II published in October 2014 addresses the major issues which arise in the law of the sea. The forthcoming Volume III will provide analysis of marine environmental law and maritime security law. The full three-volume Manual will set out the entirety of international maritime law, re-stating and re-examining its fundamental principles, how it is enacted, and the issues that are shaping its future. It will be a superlative resource for those working with or studying this area of law.

Report of the Committee of Experts on the Application of Conventions and Recommendations (articles 19, 22, and 35 of the Constitution) BRILL

This is the second of a three-volume set which will bring together the law of the sea, shipping law, maritime environmental law, and maritime security law. This volume focuses on shipping law, providing a detailed assessment of this area of law by leading practitioners and eminent scholars.

**The Maritime Labour Convention, 2006** Oxford University Press

To assist in the development of a marine safety culture by addressing the issue of fatigue, the IMO has developed practical guidance to assist interested parties to better understand and manage the issue of "fatigue".

### REPORT OF THE COMMITTEE OF EXPERTS ON THE APPLICATION OF CONVENTIONS AND RECOMMENDATIONS (ARTICLES 19, 22 AND 35 OF THE CONSTITUTION)

Oxford University Press

This volume provides a detailed legal analysis of the fourth pillar of the international maritime regulatory regime, the comprehensive Maritime Labour Convention, 2006, and its provisions to achieve decent work for seafarers and a level playing field for shipowners.

A comprehensive review of the laws and regulations governing the shipmaster including customary law, case law, statutory law, treaty law and regulatory law, covering: • A brief history of the

shipmaster • Manning and crewing requirements in relation to vessel registration • Comparison of regimes of law of agency for shipmasters and crews across jurisdictions • Examination of shipmaster liability (civil and criminal)

**The IMLI Manual on International Maritime Law Volume II Shipping Law** Manchester University Press  
The 1982 United Nations Convention on the Law of the Sea (UNCLOS) remains the cornerstone of global ocean governance. However, it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically. With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions, complementary mechanisms dealing with such aspects of global ocean governance including maritime transport, fisheries, and marine environmental sustainability, have been developed under the aegis of the United Nations and other relevant international organizations. This approach is inherently fragmented and unable to achieve sustainable global ocean governance. In light of the Sustainable Development Goals (SDGs), particularly Goal 14, the IMLI Treatise proposes a new paradigm on the basis of integrated and cross-sectoral approach in order to realise a more effective and sustainable governance regime for the oceans. This volume focuses on the role of the UN Specialized Agencies towards the development of effective and sustainable ocean governance by looking at the more elaborate mechanisms they developed in order to achieve the desired objectives laid down in UNCLOS. From FAO to UNODC, the volume examines how they ensure sustainable development and how much coordination exists among them.

**The IMLI Manual on International Maritime Law: Shipping law** International Labour Organization

The past ten years have seen rapid growth in the economic and maritime importance of the Arabian GCC states and an equally rapid modernisation of their domestic laws. Nevertheless, much of the maritime law and procedure in the region remains unknown or misunderstood both outside and even inside the region. Since the region is likely to remain significant in terms of maritime commerce, a better understanding of the law and regulations is required. The Maritime Laws of Arabian Gulf Cooperation States is intended as a guide not only for lawyers concerned with maritime law in the Gulf region, but also for all sectors of the shipping community with an involvement in the region. After a brief description of the historical maritime and legal background, Volume I discusses in detail the operation and application of GCC maritime law. The major areas are analysed and placed in the context of the accepted regime of international maritime law. The author finally draws some important general conclusions and looks to the future of maritime law in the Gulf - including the

movement for the unification of the laws of the GCC. Volume II of the work contains translations of the major GCC maritime legislation as well as tables of International Conventions that have been ratified by the GCC States.

Vol. 1, Apr. 1919/ Aug. 1920 (published 1923) is a collection of documents relating to the history and activities of the International Labor Organization from its initiation in the Commission on International Labour Legislation appointed by the Peace Conference in January 1919 to the second session of the Conference, held at Genoa in June-July 1920. Pref. note, v.1.

**A Legal Primer to an Emerging International Regime** Oxford University Press

With the Maritime Labour Convention now in force (as of August 2013), the shipping industry is faced with a new international convention that has comprehensive implications across all sectors. This vital text provides timely analysis and thought-provoking essays regarding the Convention's application and enforcement in practice. Hailed as the "Seafarer's Bill of Rights" and the "fourth pillar" of the international regulatory regime for quality shipping, the Maritime Labour Convention is set to significantly alter the playing field for key stakeholders. This book offers diverse and interesting commentary in respect of the Convention's impact on core sectors of the shipping industry, identifying both strengths and weaknesses of the Convention, as well as potential hurdles that will need to be overcome. Each chapter focuses on a different aspect of the Convention, ranging from individual rights of the seafarer to challenges of flag State implementation. Special attention is given to enforcement through examination of the innovative measures provided in the Convention itself, along with discussion of domestic enforcement mechanisms in certain States. Furthermore, the book evaluates whether the Convention has filled existing gaps in maritime labour law, resolved prior difficulties or created new problems. This book expertly addresses issues of fundamental importance to national authorities, shipping professionals and associations, maritime lawyers and academics worldwide. ---In memory of Richard Shaw---
