The TOGAF 9 certification program is a knowledge-based certification program. It has two levels, leading to certification for TOGAF 9 Foundation and TOGAF 9 Certified, respectively. The purpose of certification to TOGAF 9 Certified is to provide validation that, in addition to the knowledge and comprehension of TOGAF 9 Foundation level, the Candidate is able to analyze and apply this knowledge. The learning objectives at this level therefore focus on application and analysis in addition to knowledge and comprehension. This

Study Guide supports students in preparation for the TOGAF 9 Part 2 Examination, leading to TOGAF 9 Certified. This third edition contains minor updates to remove references to the TOGAF 8-9 Advanced Bridge Examination¹ and also adds four bonus practice examination questions to Appendix B. It gives an overview of every learning objective for the TOGAF 9 Certified Syllabus beyond the Foundation level.

Framework (TOGAF),

the leading EA standard. This solution-focused reference presents key techniques and illustrative examples to help you model enterprise architecture. This book describes the TOGAF standard and its structure, from the architecture transformation method to governance, and presents enterprise architecture modeling practices with plenty of examples of TOGAF deliverables in the context of a case study. Although widespread and growing quickly, enterprise architecture is delicate to manage across all its dimensions. Focusing on the architecture transformation method, TOGAF provides a wide framework, which

covers the repository, governance, and a set of recognized best practices. The examples featured in this book were realized using the open source Modelio tool, which includes extensions for TOGAF. Includes intuitive summaries of the complex TOGAF standard to let you effectively model enterprise architecture Uses practical examples to illustrate ways to adapt TOGAF to the needs of your enterprise Provides model examples with Modelio, a free modeling tool, letting you exercise TOGAF modeling immediately using a dedicated tool Combines existing modeling standards with TOGAF

Here are the results of an audit of the FAA's mgmt. and maint. of air traffic control facilities. The FAA has invested billions of dollars in new equipment for handling increasingly higher levels of air traffic in more complex airspace. However, the facilities that house those systems are deteriorating. As FAA

begins implementing plans for the Next Generation Air Transp. System, it will be critical to determine the type and number of facilities that will be needed to support the envisioned architecture. This audit determined if FAA has: (1) developed and implemented a comprehensive strategy to effectively manage the replacement, repair, and modernization of its air traffic control facilities; and (2) allocated sufficient funds to carry out those activities. Now that information has become the lifeblood of your organization, you must be especially vigilant about assuring it. The hacker, spy, or cyber-thief of today can breach any barrier if it remains unchanged long enough or has even the tiniest leak. In

Information Assurance Architecture, Keith D. Willett draws on his over 25 years of technical, security, and business experience to provide a framework for organizations to align information assurance with the enterprise and their overall mission. The Tools to Protect Your Secrets from Exposure This work provides the security industry with the know-how to create a formal information assurance architecture that complements an enterprise architecture, systems engineering, and the enterprise life cycle management (ELCM). Information Assurance Architecture consists of a framework, a process, and many supporting tools, templates and methodologies. The framework provides a

reference model for the consideration of security in many contexts and from various perspectives; the process provides direction on how to apply that framework. Mr. Willett teaches readers how to identify and use the right tools for the right job. Furthermore, he demonstrates a disciplined approach in thinking about, planning, implementing and managing security, emphasizing that solid solutions can be made impenetrable when they are seamlessly integrated with the whole of an enterprise. Understand the Enterprise Context This book covers many information assurance subjects, including disaster recovery and firewalls. The objective

is to present security services and security mechanisms in the context of information assurance architecture, and in an enterprise context of managing business risk. Anyone who utilizes the concepts taught in these pages will find them to be a valuable weapon in the arsenal of information protection.

The CBS has taken steps to establish important pillars of a proper policy framework for financial reporting, auditing, and internal controls by approving the Internal Audit and Audit Committee Charters and is committed to address the remaining

shortcomings in these areas. The Internal Audit Department (IAD) has made progress by initiating risk assessments of the various CBS business units and recruiting an Information Technology (IT) professional to join the team. The Accounting and Finance Department (AFD) is making progress in implementing accrual accounting, and accounting for foreign exchange operations (International Accounting Standard (IAS) 21), and has created a new role of Reconciliation Officer to ensure all cash transactions are recorded properly. However, the IAD functions without a director, which places the internal audit staff at a severe

disadvantage to other departments and limits their authority to effectively implement their program. Also, while the mission team has stressed the importance of adopting International Financial Reporting Standards (IFRS) during this mission and the previous mission, the CBS has not formally indicated that it will adopt this framework.² High priority recommendations were made to address these shortcomings. See Table 1 for homework assignments and high priority tasks.³

The region encompassing Afghanistan and Pakistan (Af/Pak region) is undergoing a

fundamental strategic change. This book analyses the nature of this strategic change, in order to seek possible future scenarios and to examine policy options. It also undertakes a critical review of the basic elements of the Western strategic approach towards dealing with regional conflicts in all parts of the world, with special emphasis on the Af/Pak region. Dealing with the political developments in one of the most volatile regions in the world - Afghanistan and Pakistan - the volume focuses on Western strategic concerns. The withdrawal of ISAF by 2014 will change the overall political setting and the work addresses the

challenges that will result for Western policymakers thereafter. It examines the cases of Afghanistan and Pakistan separately, and also looks at the broader region and tries to identify different outcomes. This book will be of much interest to students of Central and South Asian politics, strategic studies, foreign policy and security studies generally.

The global economic downturn marked a critical crossroad for the sales profession. This event dramatically altered the consumer landscape and forever changed the sales model required to successfully navigate it. Today, consumers are more skeptical, price conscious, product savvy and pressure resistant than at any other time in history. They don't want to be "cold called", "up sold", or "hard sold". They don't want to be "trial closed", tie-down closed" or "Columbo closed". They don't want "loss leaders", "red herrings" or "high pressure". These old

school tactics have no place in this new consumer landscape. A fresh new "partnership" approach to selling has officially trumped the old "salesmanship" approach of years past. This book represents the transition point of the sales profession by introducing you to the "Gap Analysis Sales Model", a fresh new client-centric approach to selling that puts the client's need above all else. Bridging the SELLING Gap is three books in one: In Part 1 you'll learn how to accelerate your selling success by mastering the first phase of the Gap Analysis Sales Model -- ASSESSMENT. In this part of the book, you will discover exactly what questions to ask to fully uncover the gap between two

reference points:

1. Your client's current reality condition, and
 2. Your client's desired reality outcome. After all the difference between these two points constitutes the problem to which your product (or service) offering represents the solution. You'll also learn how to identify your prospect's "engagement profile" so that you'll understand what he or she needs to hear, see and know to support a favorable buying decision. In Part 2 you'll learn how to accelerate your success by mastering the second phase of the Gap Analysis Sales Model -- PRESENTATION. In fact, everything you do that opens doors and closes deals comes down to your ability to communicate yourself

and your product or service offering in a way that compels your client to take action. In this part of the book you will learn how to tailor your content, structure your message and strengthen your delivery. In Part 3 you'll learn how to accelerate your success by mastering the third phase of the Gap Analysis Sales Model -- NEGOTIATION. It is important to know that there are only three reasons why a transaction will falter once it enters the negotiation phase. In this part of the book you will discover what these three potential deal breakers are, how to recognize them and more importantly, how to respond to them when encountered. As a point of fact, your

professional success is a direct reflection of your competence in assessing client needs, presenting product (or service) solutions and negotiating collaborative outcomes. After all, this represents the value you bring to your profession and the more competent you are, the more sales success you'll experience. It's as simple as that!The Gap Analysis Sales Model is helping sales professionals "bridge their success gap" at a global level. Gerald G. Clerx is an internationally respected sales trainer who has accelerated the success of over 80,000 sales professionals from around the world, many of them now earning over 2 million

dollars annually. Entire offices have reportedly "doubled their success rate", leaving their competitors in the dust, the moment they began applying the skills and insights taught in his training series. Now for the first time ever, he shares the Gap Analysis Sales Model in this landmark book. READ IT AND TAKE IMMEDIATE CONTROL OF YOUR SALES CAREER!
