Popular Mechanics Home Appliance Repair Manual Time Life Medical

Owning a coin operated Laundromat is a great business and can be very profitable. But, unless you have all new equipment, it can quickly nickel and dime you into making a loss and going out of business, losing your investment. I write this manual not as a business major or certified appliance person [and certainly not an English major]. I write it as an average 'Joe' who bought a laundromat and needs to run and maintain the business to make an honest profit. The skills needed to run and maintain a laundromat are not rocket science and don't need expensive equipment: just common sense and logic. And for the macho guys out there, you will need to ask for help from time to time. I will assume you have no previous experience in repairing washers, dryers, change machines etc. I will get you started on a journey to taking charge of your equipment. You will get great satisfaction in making common repairs and keeping your equipment working and earning you money. The only experience I have is what I have learned from MY machines. I do not represent to provide repair procedures for all brands, ages and types of laundromat equipment, but I will teach you how I become familiar with my equipment, their personalities, their moods and limitations. I consider this a work in progress as every week I learn something new in my 'mat'. I do not have any problem paying for repair parts. That is the cost of doing business. What I want to avoid is the \$95 service call to trouble shoot a problem by my local appliance repair company, then the part cost being doubled as their mark up and a second \$95 service call to install the newly inflated part. Even if you only make a one repair, you will save 10 times the cost of this book.

Repair Your Own Appliances Prentice Hall

Small Appliance Repairs Sams

HAVE YOU EVER SAID ANY OF THESE THINGS? - I don't know how to determine what's wrong with my appliance... - I don't know where to find the right parts I need for the repair... - I don't want to have to buy a new washer, dryer, oven, refrigerator, dishwasher... - I don't want to pay \$100 just to get a technician to show up at my door and then hundreds more for the repair... If you can relate to any of that, then this book is going to be life-changing for you. WHY SHOULD YOU LISTEN TO ME? Many years ago, my dryer died. I was on a shoestring budget and my wife really needed our gas dryer to work. I could not afford to get it fixed or to buy a new one, so I decided to try to fix it myself. I was able to find out that the igniter was bad, and it was really easy to replace. I was able to fix the problem in about an hour and the part only cost about \$15. Since then I have learned how to fix all of my own appliances, I have 2 years college in electrical engineering, 31 years experience in the military and with major companies in the field of electronics and computers, and for the past 8 years. I have had my own appliance repair business and now I get to share my secrets to help you learn to fix your own appliances. Many DIY appliance owners are well able to repair their appliances. They have the basic mechanical skills and the basic tools they need but they lack the knowledge of how to go about doing it. Knowledge is Power. I will help you find that knowledge and apply that power to be able to repair your own appliances. Lenny Duval is a graduate of numerous military electronics schools in both the USAF and the Navy. He graduated at the top of his classes for UHF and VHF communications equipment, Radar, Navigation, and Cryptographic equipment. He has a Bachelor of Theology degree and studied Electrical Engineering at LSU for 2 years. Lenny worked in the Electronics industry in Silicon Valley for many years as a technician and a supervisor and started his own computer company in 1976. He has managed his own Appliance Repair Business since 2013.
