Annotation In addition, The Future of Project Management examines the challenges facing the longevity of project management as a profession. This is a book for anyone interested in project management--along with business leaders and others who enjoy exploring the future, understanding its implications, and learning to deal with change.

Regional Planning in India McGraw Hill Professional

The 2015 version of ISO 9001 brings many enriching changes to promote quality excellence by organizations. The most significant change is the reinforcement of the fact that ISO 9001 is not just a quality issue. It is relevant as an overarching management topic. The book explains the requirements of the revised (2015) version of ISO 9001 in simple and practical manner. The objective has been to enhance understanding of the subject matter by managers and quality professionals. A conceptual understanding shall enable managers and professionals to design better systems and processes uniquely suited to their respective organizations. In view of this the first five chapters of the book explain concepts on QUALITY, PROCESS, PROCESS APPROACH / MANAGEMENT and PDCA. These are relevant for all management system standards being developed by International Organization for Standardization with the High Level Structure. Part II of the book goes into details of each clause focusing on processes and process interactions. We expect that the readers will appreciate that ISO 9001, now focuses more on expected outcomes through

processes than mandating too many requirements.

Investment Analysis and Portfolio Management Emerald Group Publishing

The purpose of this text is to help the student learn how to manage their money to derive the maximum benefit from what they earn. Mixing investment instruments and capital markets with the theoretical detail on evaluating investments and opportunities to satisfy risk-return objectives along with how investment practice and theory is influenced by globalization. The material is intended to be rigorous and empirical yet not overly quantitative. Reilly/Brown provides the best foundation, used extensively by professionals, organizations, and schools across the country. A great source for those with both a theoretical and practical need for investment expertise.

From Fishing Hamlet to Red Planet Firewall Media

Financial Management by Khan and Jain is one book in the Indian market which deals with topics following step-by-step learning approach backed by large number of solved problems. Keeping in line with the previous editions, this 8th edition brings out the explanation of theories, concepts and techniques explicitly, with more excel integration in the text. This book will be useful to both finance managers and management students. Salient Features: - Updated text aligned with new SEBI guidelines and change in CSR policies - Rich pedagogy - Excel integration-based template made available online. - Web supplements - For instructors: Lecture slides - For Students: Additional cases, solved problems, chapter end solution to numerical review questions

PROJECT MANAGER'S HANDBOOK

McGraw-Hill Education

India's Westernized elite, cut off from local traditions, 'want to write a full stop in a land where there are no full stops'. From that striking insight Mark Tully has woven a superb series of 'stories' which explore Calcutta, from the Kumbh Mela in Allahabad (probably the biggest religious festival in the world) to the televising of a Hindu epic. Throughout, he combines analysis of major issues with a feel for the fine texture and human realities of Indian life. The result is a revelation. 'The ten essays, written with clarity, warmth of feeling and critical balance and understanding, provide as lively a view as one can hope for of the panorama of India.' K. Natwar-Singh in the Financial Times

FUNDAMENTALS OF FINANCIAL MANAGEMENT | 7TH EDITION

Kojo Press

The ninth edition of Projects is a comprehensive and up-to-date text that discusses key principles and techniques for evaluating capital expenditure proposals, as well as strategic, qualitative and organizational considerations impacting capital budgeting decisions. The book presents the entire gamut of capital budgeting and suggest ways of improving its practices. It is the most contemporary Indian book available that describes and evaluates business practices in various areas. It helps readers develop a thorough understanding of the theories and concepts in a systematic way.

S. Chand Publishing

Financial Management Latest Edition by Dr. F. C. Sharma, Rachit Mittal McGraw-Hill Education

The mathematical and statistical tools needed in the rapidlygrowing quantitative finance field With the rapid growth in quantitative finance, practitioners must achieve a high level of

proficiency in math and statistics. Mathematical Methods and Statistical Tools for Finance, part of the Frank J. Fabozzi Series, has been created with this in mind. Designed to provide the tools needed to apply finance theory to real world financial markets, this book offers a wealth of insights and guidance in practical applications. It contains applications that are broader in scope from what is covered in a typical book on mathematical techniques. Most books focus almost exclusively on derivatives pricing, the applications in this book cover not only derivatives and asset pricing but also risk management—including credit risk management—and portfolio management. Includes an overview of the essential math and statistical skills required to succeed in quantitative finance Offers the basic mathematical concepts that apply to the field of quantitative finance, from sets and distances to functions and variables The book also includes information on calculus, matrix algebra, differential equations, stochastic integrals, and much more Written by Sergio Focardi, one of the world's leading authors in high-level finance Drawing on the author's perspectives as a practitioner and academic, each chapter of this book offers a solid foundation in the mathematical tools and techniques need to succeed in today's dynamic world of finance.

PROJECTS Tata McGraw-Hill Education

On 21 November 1963, the first rocket took off from Thumba, a fishing hamlet near Thiruvananthapuram, announcing the birth of India's space programme. The rocket, the payload, the radar, the computer, the helicopter - all that was required for the launch - came from outside the country. Fifty years later, on 5 November 2013, when ISRO launched its Mars Orbiter Mission (MOM) from the Satish Dhawan Space Centre, Sriharikota, all of it had been indigenously manufactured. Ten months after the launch, on 24 September 2014, India became the first country in the world to put a satellite around the Red Planet in the very first attempt. From Fishing Hamlet to Red Planet tracks this stupendous journey through articles, interviews and reminiscences with contributions from intellectual giants like Dr Vikram Sarabhai, Satish Dhawan, M.S. Swaminathan, Jacques Blamont, Dr A.P.J. Abdul Kalam, U.R. Rao and Dr K. Kasturirangan, among others, this is the story of India's space journey from its modest beginnings to its rendezvous with Mars.

SBPD Publications Tata McGraw-Hill Education

This book is meant for students and professionals having fundamental engineering knowledge and familiarity with construction process and practices. It includes 18 chapters - each accompanied with an appendix - along with abbreviations and glossary of terms. Each chapter has been ensured to provide an optimal mix of theory and application. Planning, Analysis, Selection, Financing, Implementation and Review

McGraw-Hill Education

Financial Management – Concepts & Techniques is a useful resource for undergraduate students of management and commerce, as well as for practising managers. Management of finance is a notoriously difficult core subject for business undergraduates, which many find difficult to understand. The area has been dominated by large and complex introductory texts - often from the US - which many lecturers/students find too detailed and unwieldy. This carefully developed and researched text will fill this gap by providing a succinct, modular and easy to comprehend introduction to the subject of financial management. The book has a total of 20 chapters that are divided into 6 units, which is less than other financial management texts that reflect the changing needs of tutors and students. It attempts to provide a clear understanding of the fundamentals of the subject, including the concepts, theories, models, tools and techniques, and their applications. Being focused on the logical discussion, where it is needed for a contextual understanding of the topic, makes the book different from others. Since businesses, today are no more confined to national boundaries and have become truly international. Therefore, this concise and compact text has also incorporated the basic concepts, theories and practices of international business, hence it would also be of immense value to practising professionals in the field of International Finance.

PROJECTS

Penguin

Continuing the four goals from the first edition, i.e. helping students to make good financial decisions, providing a solid text for the introductory MBA course, motivating students by demonstrating finance is relevant and interesting, and presenting the material clearly, this Tenth Edition promises to be the best yet. Written by a highly-acclaimed, best selling, author team, this text remains the only MBA-level text to present a balance of financial theory and applications.

India's Space Journey Tata McGraw-Hill Education

Although a few books dealing with some specialised aspects of regional planning have appeared in India, there has been no systematic treatment of the subject from the teaching angle, embracing the whole field of regional planning, drawing attention to the work done by Indian scholars and focusing on Indian problems. The present book is an attempt in this direction. The 12 chapters of the book, besides dealing with the concepts, methods and techniques of regional planning, have been devoted to specific problems in regional development such as regional imbalances, rural development, backward area development and tribal area development. This provides the necessary orientation to the directions in which regional planning is relevant.
