In his prophetic foreword to "The Technique of Motor Racing," Fangio anticipates the importance Piero Taruffi's book would have for a generation of new drivers. Trained as both a racing driver and an industrial engineer, Taruffi provides a unique perspective on the art and science of motor racing. He drove for the work teams of Ferrari, Maserati, Alfa Romeo, Mercedes-Benz, and others, in a career that spanned over 25 years and was crowned by his victory in the 1957 Mille Miglia. First published in 1959, "The Technique of Motor Racing" has become the standard by which other driving texts are measured.

*Developing Motor Skills in  
Art* Forgotten Books  
THE CLASSIC BOOK THAT HAS INSPIRED MILLIONS A penetrating examination of how we live and how to live better Few books transform a generation and then establish themselves as touchstones for the generations that follow. Zen and the Art of Motorcycle Maintenance is one such book. This modern epic of a man's search for meaning became an instant bestseller on publication in 1974, acclaimed as one

of the most exciting books in the history of American letters. It continues to inspire millions. A narration of a summer motorcycle trip undertaken by a father and his son, Zen and the Art of Motorcycle Maintenance becomes a personal and philosophical odyssey into fundamental questions on how to live. The narrator's relationship with his son leads to a powerful self-reckoning; the craft of motorcycle maintenance leads to an austere beautiful process for reconciling science, religion, and humanism. Resonant with the confusions of existence, this classic is a touching and transcendent book of life. This new edition contains an interview with Pirsig and letters and documents detailing how this extraordinary book came to be.

## By Motor to the Firing Line an Artist's Notes and Sketches

Veloce Publishing Ltd

From the late 19th century the progress of the movies has paralleled that of the motorcar. Now, for the first time, these developments are chronicled through the medium of the Movie Poster. The book

celebrates the progression from the simple and crude, through the functional, the ambitious, the barking mad, right up to today's high-tech, computer generated, often soulless examples of both cinema and automobile. By charting the poster art of the movies chronologically, the book takes you on a journey through the 20th Century in black and white, sepia, hand coloring, stone-litho, and glorious Technicolor. The book shows the obsessively accurate, the artist's impression, the photographic and the wildly imaginative depictions of the automobile. The development of product placement in marketing is well-illustrated. Why did the Mustang appear in so little publicity for Bullitt? Where was the Mini in most of the world's publicity for The Italian Job? Why wasn't the Alfa Romeo Dueto prominent in the advertising of The Graduate? The book doesn't provide intricate plot lines or vast cast lists; there are many reference works, both in books and on-line that supply this detail. Instead it shows how different countries promoted the same movie and give a

brief guide to buying posters of movies safely. Primarily this is a book to wallow in, beautifully photographed artwork is guaranteed to bring memories favorite cars in movies and gives a fascinating insight into the evolution of cinema, marketing and the automobile. With 250 color photos, this book is a fascinating feast in all respects. With 250 pictures of rare and original posters and a star rating system for rarity, this is a beautiful book to browse and a valuable investment guide.

### **ART AND CRAFTS FOR BOYS (HOUSE BUILDER)**

U of Minnesota Press  
Once considered tools of mayhem used by greasers and gearheads, today muscle cars are recognized as works of art - as valued as collector's items as many paintings created by some of the the great master artists. With their outrageous engines, aggressive stances, and sleek styling, muscle cars define the "sex, drugs, and rock-and-roll" lifestyle of the era into which they were born.

### **The American Magazine of Art** Craft Projects for Kids

"Between 1962 and 1971, the Centro

Latinoamericano de Altos Estudios Musicales (CLAEM) of the Di Tella Institute in Buenos Aires became the central hub of Latin American avant-garde music. With the support of the Rockefeller Foundation and the wealthy Di Tella family, CLAEM offered two-year fellowships to some of the most recognized young composers of the region to undertake graduate studies in a unique privileged setting under the direction of Alberto Ginastera and with permanent and visiting faculty that included

Gerardo Gandini, Francisco Kröpfl, Mario Davidovsky, Iannis Xenakis, Luigi Nono, Aaron Copland, Luigi Dallapiccola, Bruno Maderna, Riccardo Malipiero, Olivier Messiaen, Roger Sessions, and Earle Brown. In *Elite Art Worlds*, author Eduardo Herrera combines oral histories, ethnographic research, and archival sources to reveal CLAEM as a meeting point of US and Argentine philanthropy, local experiences in transnational currents of artistic experimentation and innovation, and regional discourses of musical Latin Americanism. The story of CLAEM shows how musical avant-gardes were articulated, embodied, resignified, and institutionalized in Latin America, how composers during the 1960s engaged with discourses of Latin Americanism as professional strategy, identification marker, and musical style, and sheds light into the role of art in the legitimation and construction of elite status and identity. By looking at CLAEM as both an artistic and a philanthropic project, Herrera illuminates the

relationships between foreign policy, corporate interests, and funding for the arts concerning Latin America and the U.S. in the mid-twentieth century"--

The Art of the Motor includes analyses of such recent developments as nanotechnology and virtual reality. It conjures a world in which information is speed and duration is no more. Information as speed? This, Paul Virilio tells us, is the third dimension of

matter-the speed of the transmission of information has collapsed the extension of the dimension of space and the duration of the dimension of time.
