 “Own Your Morning will guide you to create personalized daily rituals that center you, energize you, and give you the power to fully show up for your day.”
 —Jay Shetty, #1 New York Times best-selling author of *Think Like a Monk* and host of the On Purpose podcast Rise and truly shine with a life-changing new morning routine. Find clarity and happiness with this start-your-day plan that prioritizes your wellness and life goals. Good days start with good mornings and Editor-in-Chief of Women’s Health Liz Baker Plosser believes there’s no cookie cutter morning ritual that will lead you to success. Instead she advocates that your a.m. routine should reflect what matters most to you. *Own Your Morning* starts with easy prompts to help you identify your core values—the way you want to spend your energy, time, and resources. Once you’ve figured out the elements of your personal perfect morning, you’ll find proven insights from wellness experts and personal anecdotes from Liz to help you reimagine your a.m. habits to benefit your physical and mental health, focus your energy, enhance your productivity, and make the most of your day from the moment you wake up. Whether you want to amp up a killer workout (sweat changes everything!), tap into the power of meditation (Jay Shetty shares his go-to meditation practice), create mini-moments of connectivity with loved ones (such as creating emoji shorthand in

your group chat), or fuel your a.m. awesomeness with a healthy breakfast (including a few recipes!), these easy-to-implement strategies will help you set a morning routine unique to you.

WHAT YOU NEED TO KNOW

D C Books
 Sooraj and his grandma LOVE inventing! Join them on their latest adventure: using simple machines to make coconut barfi! ‘Ammachi’s Amazing Machines’ is written by Rajiv Eipe . © Pratham Books , 2017. Some rights reserved. Released under CC BY 4.0 license. This book was first published on StoryWeaver, Pratham Books. The development of this book has been supported by Oracle. Guest Editor & Art Director: Vinayak Varma
Kesava Dev Good Press

“The Confessions of a Daddy” by Ellis Parker Butler. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.
The kept woman and other stories

HOW IS THIS TOEFL BOOK DIFFERENT?
 This TOEFL book is different because it uses an integrated vocabulary learning system called recycling. Recycling is simple. Each exercise is divided into four quizzes. Quiz 1, a multiple-choice vocabulary quiz, introduces ten new words. Next, you will do Quiz 2, which is a sentence-completion quiz based on the ten words in Quiz 1. Next, you will do

Quiz 3, a spelling quiz. The speaker in the audio will say the same ten words in turn. You will then have ten seconds to spell each word by saying it and typing it. Finally, you will do Quiz 4, which is a 60-word typing test based on the ten new words you have been recycling through Quizzes 1, 2 and 3, plus words, phrases and idioms recycled from previous exercises. **BONUS MATERIAL** Learn essential rhetorical strategies and a test-proven way to develop opinion-based and fact-based TOEFL essays.

Ammachi's Amazing Machines

Independently Published

First published in Malayalam in 1973, My Story, Kamala Das' sensational autobiography, shocked readers with its total disregard for mindless conventions and its fearless articulation of a subject still considered taboo. Depicting the author's intensely personal experiences in her passage to womanhood and shedding light on the hypocrisies that informed traditional society, this memoir was far ahead of its time and is now acknowledged as a bona fide masterpiece.

Love, War and Fancy Penguin Group
Sringeri Srinivas grows sweet bananas on his farm, and yet, no one wants to buy them. Find out what he did with them in this cute story from India. 'Too Many Bananas' (English), written by Rohini Nilekani, illustrated by Angie & Upesh, published by Pratham Books (© Pratham Books, 2010) under a CC BY 4.0 license on StoryWeaver. A WAR STORY

John Wiley & Sons

Elements of Language 2009 provides practical teaching strategies, differentiated instruction, and engaging

presentation tools that offer more ways to reach more students than ever before. In partnership with teachers like you, Holt created Elements of Language to provide practical teaching strategies for today's challenging classroom, innovative ways to differentiate instruction, and streamlined technology tools. Designed with your students in mind, this program offers you the flexibility and options to manage your diverse classroom. - Publisher.

ENGG DRAWING

Holt Rinehart & Winston

A pilot goes missing somewhere over enemy territory during the 1971 war. For survival, he joins a band of nomads who steal for a living. Back in India, his wife waits endlessly for his return, firm in her belief that he is only Missing in Action. As the pilot makes vain attempts to cross the border multiple times for 28 years, his daughter, whose very existence he is unaware of, resolves to bring him home. Who will finally seize the initiative and cross the border to attempt a daring rescue? Full of surprising twists and turns, this is a story of love and hate, of the human cost of war and the apathy of governments about the lives of armed forces personnel and the lives hanging in limbo when a loved one goes missing.

Third Course Hearst Home & Hearst Home Kids

Renewable energy sources (RES) are one of the important instruments that human beings can use to tackle problems created by climate change. We expect a quick expansion of RES in the next few years. One important new technology is

the floating photovoltaic (FPV) which is at its very beginning but which after only 10 years from its first proposal has already reached the target of 2 GWp of plants installed. This book explores the reasons for such growth and the advantages of this new technology. FPV plants are easily integrated into any human settlements and can use available fresh water as well as salt water near coastal areas. So their geographic potential is unlimited. Furthermore, their environmental impact is limited and the managing and decommissioning of plants are very cheap. The book offers a perspective on the many facets of this technology as well as an analysis of the economic aspect and of the final electricity cost which in a short time will go down to less than 50 \$ per MWh. Contributions from different authors have helped in sectors such as the raft structure, the wave impact, and the environment problems. Investigates the installation of photovoltaic systems over the water's surface Offers theoretical and practical explanations on how to study, analyze and design photovoltaic energy systems Considers how the use of floating photovoltaic systems can work to fulfill domestic energy demand

RESET YOUR A.M. ROUTINE TO UNLOCK YOUR POTENTIAL

Om Books International

'But Miss Gamla did not like small boys. Or big boys, for that matter. She placed us high on her list of pests, along with monkeys (who raided her kitchen), sparrows (who shattered her sweetpeas) and goats (who ate her geraniums). We did none of these things, being strictly fun-loving creatures; but we did make a lot of noise, spoiling her afternoon siesta.' We often look back at our time

as children and think about them as the good old days-days full of mischief, wonder, curiosity and adventure. These are the days when we form lifelong bonds and make memories that become our balm on the hard days that life throws at us. These are the carefree days of galivanting, letting your imagination run wild and formulating grand plans. In *Boys Will Be Boys*, Ruskin Bond puts together a collection of stories and personal essays that capture the magical days of childhood. From adventures with wild animals and running amuck in ponds to finding ways of surviving algebra, a world of adventure awaits! This is a collection of the best of Ruskin Bond stories and essays written by him over the years. The book captures the spirit of childhood days. Contains a varied collection that'll appeal to kids and adults alike.

Omens and Superstitions of Southern India National Book Trust India

If you want to make sure your home or office equipment repair is done right or that you are keeping track of your car, motorcycle or other vehicle repairs and maintenance, grab a copy of our Maintenance Log Book and keep track of equipment and general maintenance procedures. It is simple and easy to use because it enables the user to document every repair with date and what has been done. It is designed to log all repairs and new equipment and it is a log book that records maintenance and repairs of virtually any piece of equipment or vehicles.

Boyfriend troubles? Try dating a ghost! When fourteen-year-old Skye Thackery meets Owen Wicks, it's not exactly love at first sight. She's getting over a broken

heart and he's, well, a ghost. But as Skye gets to know him, she can't help wondering what it would be like to kiss him. Dating a ghost isn't easy, and things get worse when Owen declares he's found a way to stay with Skye for ever. His plans make her uneasy - the shadowy organisation which claims to be able to help him is bad news, and it seems Nico, her ex, is involved too. As Owen prepares to risk everything, Skye begins to wonder if she really has a future with him, or if his desire to be more than just a ghost will cost them everything?

Summer in Calcutta Nova Press

An overview of the physics, concepts, theories, and models underlying the discipline of aerodynamics. This book offers a general overview of the physics, concepts, theories, and models underlying the discipline of aerodynamics. A particular focus is the technique of velocity field representation and modeling via source and vorticity fields and via their sheet, filament, or point-singularity idealizations. These models provide an intuitive feel for aerodynamic flow-field behavior and are the basis of aerodynamic force analysis, drag decomposition, flow interference estimation, and other important applications. The models are applied to both low speed and high speed flows. Viscous flows are also covered, with a focus on understanding boundary layer behavior and its influence on aerodynamic flows. The book covers some topics in depth while offering introductions and summaries of others. Computational methods are indispensable for the practicing aerodynamicist, and the book covers several computational methods in detail, with a focus on vortex lattice and panel methods. The goal is to improve

understanding of the physical models that underlie such methods. The book also covers the aerodynamic models that describe the forces and moments on maneuvering aircraft, and provides a good introduction to the concepts and methods used in flight dynamics. It also offers an introduction to unsteady flows and to the subject of wind tunnel measurements. The book is based on the MIT graduate-level course "Flight Vehicle Aerodynamics" and has been developed for use not only in conventional classrooms but also in a massive open online course (or MOOC) offered on the pioneering MOOC platform edX. It will also serve as a valuable reference for professionals in the field. The text assumes that the reader is well versed in basic physics and vector calculus, has had some exposure to basic fluid dynamics and aerodynamics, and is somewhat familiar with aerodynamics and aeronautics terminology.

Floating PV Plants MIT Press

The valve industry has become increasingly digitized over the past five years. This revised second edition reflects those developments by focusing on the latest processing plant applications for "smart valve" technology. * Updated information on testing agencies and the latest code changes Contents: Introduction to Valves * Valve Selection Criteria * Manual Valves * Control Valves * Manual Operators and Actuators * New Smart Valve Technology * Smart Valve and Positioners * Valve Sizing * Actuator Sizing * Common Valve Problems * Abbreviations of Related Organizations and Standards

DEPRESSION

Lindhardt og Ringhof Transcriptions of linguistic source materials in the collection of the Anthropology Section of Govt. Museum, Madras. The Path of the Columnist D C Books Walking through Delhi brings Ruskin Bond face-to-face with a host of colourful characters-the formidable Punjabi matriarch 'Bhabiji' of Rajouri who presides over her bustling joint family; Kamla who strikes up an unlikely friendship; Frank Brain of West Patel Nagar, of the curious name and curiouser life; feathered friends who have made the old city their own; and the 'Daryaganj Strangler' who has a special affection for the city's publishers. In this collection of short stories that is an ode to the spirit of Delhi, Ruskin Bond captures the people and the places with warmth and humour, and brings to life the magic of the city. This is a collection of the best of Ruskin Bond stories written by him over the years. The book captures the spirit of historical cities like Delhi and Agra. Contains a varied collection that'll appeal to kids and adults alike.

Gramophone Records of the Languages and Dialects of the Madras Presidency Bonnier Publishing Fiction Ltd.

This book is also available through the

Introductory Engineering Custom Publishing System. If you are interested in creating a course-pack that includes chapters from this book, you can get further information by calling 212-850-6272 or sending email inquiries to engineerjwiley.com. The authors offer a set of objectives at the beginning of each chapter plus a clear, concise description of abstract concepts.

Focusing on preparing students to solve practical problems, it includes numerous colorful illustrative examples. Along with updated material on MOSFETS, the CRO for use in lab work, a thorough treatment of digital electronics and rapidly developing areas of electronics, it contains an expansive glossary of new terms and ideas.
