LINDBERGH

Houghton Mifflin Harcourt

This is the autobiography of the famous flier, Charles A. Lindbergh, written almost immediately after his famous flight across the Atlantic Ocean from New York to Paris on May 20-21,

1927. This historic flight by Charles Lindbergh took him from being a little known US Postal Service Air Mail pilot and made him into one of the most famous if not the most famous person in the world. The main impetus for the flight was the \$25,000 Orteig Prize offered by the French-born New York hotelier Raymond Orteig. He offered the prize to be awarded to the pilot of the first successful nonstop flight made in either direction between New York City and Paris. The book, which was also soon translated into most major languages, remained at the top of best-seller lists well into 1928, with more than 650,000 copies sold in the first year, and earned Lindbergh more than \$250,000. The book's great commercial success was considerably aided by its publication coinciding with the start of his three-month tour of the United States in the Spirit on behalf of the Daniel Guggenheim Fund for the Promotion of Aeronautics. The nation became obsessed with Lindbergh during the tour in which he was seen in person by more than 30 million Americans, a quarter of the nation's then population. No other author before or since ever had such an extensive, highly publicized tour that helped promote a book than did Lindbergh's "We" of himself and the Spirit during their 22,350-mile tour of the US. He visited 82 cities in all 48 states during which the nation's nascent aviation superhero delivered 147 speeches and rode 1,290 miles in parades.

Throughout his life, Lindbergh's value structure, interests, and activities shifted and moved, yielding a conflict between instinct and intellect. Both its presence in his life and his readjustment of values in accordance with it are representative of his time and culture. He moved, with the twentieth century itself, from a faith in technology to a disenchantment with it and finally to a balanced resolution that synthesized the seeming oppositions of technology and the human spirit. This emphasis on a balance between technology and humanity, and Lindbergh's belief that maintained the complementarity rather than the opposition of the two forces, finally culminated in a post-technological mysticism, a teleological worldview of science and nature as aspects of the same physical and spiritual environment.

Two Lives Simon and Schuster

Lindbergh was the first solo pilot to cross the Atlantic non-stop from New York to Paris, in 1927. This awe-inspiring fight made him the most celebrated men of his day-a romantic symbol of the new aviation age. However, tragedy struck in 1932, where his baby was kidnapped and found dead. The unbearable trial forced Lindbergh into exile in England and France. However, his soon fasciation and involvement with the Nazi regime, resulted in public opinion turning against him. His life was at the forefront of pioneering research in aeronautics and rocketry. Also, his wife became one of the century's leading feminist voices. This biography explores the golden couple who have been considered American royalty.

From his days as a barnstorming pilot to his transatlantic flight to his role in mapping international mail routes, Lindbergh never stopped challenging himself. This is an unprecedented view of an extraordinary man. New Introduction by Reeve Lindbergh; Index; photographs and maps.

Under a Wing Minstrel

In late May 1927 an inexperienced and unassuming 25-year-old Air Mail pilot from rural Minnesota stunned the world by making the first non-stop transatlantic flight. A spectacular feat of individual daring and collective technological accomplishment, Charles Lindbergh's flight from New York to Paris ushered in America's age of commercial aviation. In *The Flight of the Century*, Thomas Kessner takes a fresh look at one of America's greatest moments, explaining how what was essentially a publicity stunt became a turning point in history. He vividly recreates the flight itself and the euphoric reaction to it on both sides of the Atlantic, and argues that Lindbergh's amazing feat occurred just when the world--still struggling with the disillusionment of WWI--desperately needed a hero to restore a sense of optimism and innocence. Kessner also shows how new forms of mass media made Lindbergh into the most famous international celebrity of his time, casting him in the role of a humble yet dashing American hero of rural origins and traditional values. Much has been made of Lindbergh's personal integrity and his refusal to cash in on his fame. But Kessner reveals that Lindbergh was closely allied with, and managed by, a group of powerful businessmen--Harry Guggenheim, Dwight Morrow, and Henry Breckenridge chief among them--who sought to exploit aviation for mass transport and massive profits. Their efforts paid off as commercial air traffic soared from 6,000 passengers in

1926 to 173,000 passengers in 1929. Kessner's book is the first to fully explore Lindbergh's central role in promoting the airline industry--the rise of which has influenced everything from where we live to how we wage war and do business. The Flight of the Century sheds new light on one of America's fascinatingly enigmatic heroes and most transformative moments.
