The Bloomsbury Handbook of Global Education and Learning Bloomsbury Publishing

This book will explore how language & culture are connected to teaching & learning, and examine the sociocultural & sociopolitical contexts of language & culture to understand how these contexts affect student learning & achievement.

Exploring the Work of Paulo Freire Routledge

This book is an appeal to those directly and indirectly involved in education reform to reconsider the very nature of education as a process of transformation and not, as the neoliberal corporate model insists upon, as a "product." By using Paulo Freire's fundamental principle of understanding "education as the practice of freedom," and expanding upon it with bell hooks' own spiritual understanding of that principle, this book offers readers the opportunity to rethink what education is, and what it is not. Utilizing the work of diverse thinkers and critics, the book lays out a criticism of neoliberalism's profound influence on education reform and our culture generally. It reaffirms the political and ethical import of education for individuals and for our nation as a whole.

Teaching and Learning in a Multilingual School Bloomsbury Publishing

Teaching and Learning in a Multilingual School: Choices, Risks, and Dilemmas is for teachers and teacher educators working in communities that educate children who do not speak English as a first language. At the center of the book are findings from a four-year critical ethnographic case study of a Canadian high school with a large number of emigrant students from Hong Kong and rich descriptions of the multitude of ways teachers and students thought about, responded to, and negotiated the issues and dilemmas that arose. The solutions and insights they derived from their experiences of working across linguistic, cultural, and racial differences will be extremely valuable to educators in other locales that have become home to large numbers of immigrant families. The book is designed to help readers think about how the issues and dilemmas in the case study manifest themselves in their own communities and how to apply the insights they gain to their own teaching and learning contexts: * Each chapter includes four components: an excerpt from the ethnographic study; an analytic commentary on the ethnographic text drawn from a variety of theoretical perspectives and academic disciplines (including interactionist sociolinguistics, language minority education, English as a Second Language education, critical literacy, anti-racist education, and critical teacher education); a pedagogical discussion; and suggestions for further reflection and discussion. * The book features the use of ethnographic play writing to engage readers with the issues that arise in

multicultural/multilingual schools. The author's play Hong Kong, Canada is included in its entirety and is used to stimulate further discussion of the issues raised in each of the chapters. * Although it is organized around two different kinds of schooling dilemmas-- dilemmas of speech and silence, and dilemmas of discrimination-- everyday dilemmas of curriculum and assessment are also discussed throughout the book. * A methodological discussion of the choices the author made while designing, conducting, and writing up the critical ethnographic case study makes the book useful in qualitative research methodology courses. * A set of strategies and activities is provided for helping students develop English oral presentation skills.

MOVING BEYOND THE CULTURE OF REFORM

Routledge

In this book, Paulo Freire's culture circles cross linguistic, cultural, and socioeconomic borders to work across contexts in the U.S. (early education, pre-service and in-service teacher education) and in Brazil (adult education). Freire, Teaching, and Learning makes culture circles accessible to those seeking to embrace equity and democracy through everyday educational practices. *Critical Perspectives* IGI Global

This is a timely second edition of the enormously significant book which changed how teachers and community activists view their own practice. This edition concludes with personal essays by teachers, professors, and community activists explaining the direct impact which Culture and Power in the Classroom has had on their lives. Thoroughly revised to include the new thinking on diversity and learning, this edition includes a new chapter on assessment and the brain. This second edition will be welcomed by previous and new readers alike, and will help influence the approach of a new generation of teachers, whether they are based in schools, colleges or community centres.

Revisiting Paulo Freire's Pedagogy of the Oppressed

Routledge

This dialogue between two of the most prominent thinkers on social change in the twentieth century was certainly a meeting of giants. Throughout their highly personal conversations recorded here, Horton and Freire discuss the nature of social change and empowerment and their individual literacy campaigns.

Globalization and the Environmental Crisis

Routledge
Paulo Freire is one of the century's great thinkers on education and the politics of liberation. Known mostly for his literacy campaigns in Latin America and Africa, and for his seminal work *Pedagogy of the Oppressed*, his thinking continues to be rediscovered by generations of teachers, scholars, community activists and cultural workers in Europe and North America. While his name is synonymous with the practice of Critical Literacy' and A Pedagogy of Liberation', his work has been appropriated in many diverse fields of discipline and site-based projects of social reform. This volume represents a pathfinding analysis of Freire's work and in many cases it offers an extension of his thinking in order to make it more applicable to first world contexts. Peter McLaren and Peter Leonard have brought together a divergent group of scholars widely recognized for their contributions to critical theory and critical pedagogy. Themes addressed include Freire's relation to feminist critique, his philosophical roots and an evaluation of his ideas from postmodernist and postcolonialist perspectives. The collection will be essential reading for anyone interested in the radical sociology of education and the politics of liberation.

Over half of the chapters are new to this edition, bringing it up-to-date in terms of recent educational policy issues and demographic changes in our society.

What Every American Needs to Know

Routledge
In *Disturbing Pleasures* Henry Giroux demonstrates how his well-known theories of education, critical pedagogy and popular culture can be put to use in the classroom and in other cultural settings. Adding an entirely new dimension to his thinking about the cultural sites at which pedagogical practice takes place, Giroux illustrates how professors, school teachers and other cultural workers can appropriate what he refers to as a "pedagogy of cultural studies."

Disturbing Pleasures

John Wiley & Sons
This volume describes a Participatory Action Research (PAR) project involving educators from Belize and the U.S. to illustrate the critical role of shared dialogue in transnational teacher education. First identifying issues which inhibited the success of formerly didactic training delivered to Belizean teachers by U.S. educators, this volume documents the transformational impact of a shift to collaborative training approaches and uses first-person accounts from Belizean and U.S. stakeholders to illustrate their successes. Chapters powerfully illustrate that by engaging in Freirean-like dialogue and building relationships based on a mutual understanding of the cultural and historical context, as well as the identity of educators involved, partners are better able

to engage in effective transnational pedagogical collaboration. Particular attention is paid to the importance of acknowledging the post-colonial setting and unique positionality of teachers in Belize. This text will benefit researchers, academics, and educators with an interest in action research and teacher research, multicultural education, and continued professional development in particular. Those interested in teacher training, education research, and international and comparative education will also benefit from this book.

Letters to Those Who Dare Teach With New Commentary by Peter McLaren, Joe L. Kincheloe, and Shirley Steinberg Expanded Edition

Routledge
Two world renowned educators, Paulo Freire and Ira Shor, speak passionately about the role of education in various cultural and political arenas. They demonstrate the effectiveness of dialogue in action as a practical means by which teachers and students can become active participants in the learning process. In a lively exchange, the authors illuminate the problems of the educational system in relation to those of the larger society and argue for the pressing need to transform the classroom in both Third and First World contexts. Shor and Freire illustrate the possibilities of transformation by describing their own experiences in liberating the classroom from its traditional constraints. They demonstrate how vital the teacher's role is in empowering students to think critically about themselves and their relation, not only to the classroom, but to society. For those readers seeking a liberatory approach to education, these dialogues will be a revelation and a unique summary. For all those convinced of the need for transformation, this book shows the way.

FREIRE, TEACHING, AND LEARNING

Springer

This first English translation of Pedagogy of Commitment takes readers deep into the acts and meaning of living a life of community and social commitment. Paulo Friere discusses how, for teachers specifically, this commitment is not only to students, to the underprivileged, or to the education of those who speak a different language, but to the transformation of the self to become more deeply responsive to the needs of social

transformations. More than any other Freire book, this speaks directly and plainly to the lives of individuals and to teachers. It is an inspiring and passionate call from a global giant of progressive education.
