First published in 1998, this volume emerged as part of the series Plymouth Studies in Contemporary Shipping, which

represents a unique collection of papers and texts edited from the leading maritime institute in Western Europe at the University of Plymouth. Covering research from a range of geographical sectors but with a particular emphasis on Western Europe, developing countries and Eastern Europe the topics covered emerge from the full range of business areas including maritime economics, policy, statistics, logistics, law and business studies. Designed for both the practising academics and the shipping and ports industry itself, this series is an original and novel contribution to the maritime debate. This particular volume focuses on ports in Poland and Eastern Europe more widely as transition economies after the fall of the Soviet Union. Susanne Ferch and Michael Roe examine their use of strategic management systems to determine whether and how the highly turbulent environment is reflected in the systems at Poland's largest ports, Gdynia and Gdańsk. Particular focus is given to inter-port variations.

Strategic Management Interview Questions and Answers

Over the years I watched many work of arts take place and saw how those concerned took care of their problems. There I realized that management is truly an artistic work. A case in point: In the city of Calabar in the Cross River State of Nigeria, there was a tailoring company that employed only men, but the irony is that they made women's dresses. There were other women's tailoring companies managed by women, but for some reason, most women preferred buying from the only tailoring company managed by men in the city of Calabar. During the company's general meeting, an employee stood up and asked the company to employ a few women in the interest of progress. Many employees objected to the request that women be asked to come forward and fill out forms and be subjected to the same rigorous interview as any qualified candidate who wants to be employed; they suggested that the company may be moving toward the production of substandard dresses. The

author of the idea refused to take no for an answer, because the management always turned down women candidates. A few months later, the president and the chief executive officer (CEO) joined the crusade of employing women. Months after the president and CEO joined in, two women were employed, and they brought in their own fresh perspectives, including dresses for big women (whom they never called fat women). About ten years later, there were more than seven branches of the company, most of which were managed by women. I think life itself is a container of arts and strategies. This book is made up of cases, artistic expressions, and strategic maneuverings to enable my readers to understand the core concepts of effective management.
